(57) **CLAIM**

The ornamental design for a display screen for digital camera with graphical user interface, as shown and described.

**DESCRIPTION**

The sole FIGURE is a rear elevation view of a display screen for digital camera with graphical user interface, in which the same image is displayed on the display screen and within a viewfinder of a camera body.

The broken line showing of the digital camera, illustrates the environment of the claimed design and forms no part thereof. The broken lines within display screen in the

(Continued)

drawings illustrate portions of the graphical user interface which form no part of the claimed design.
