(57) **CLAIM**

The ornamental design for a portion of a computer screen with an animated icon, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a computer screen with an animated icon showing the first image of the new design. FIG. 2 shows the second image of the design.

FIG. 3 is a front view of the portion of the computer screen with the first image of the animated icon, but shown with a different broken line disclosure.

FIG. 4 shows the second image of the design, but shown with a different broken line disclosure.

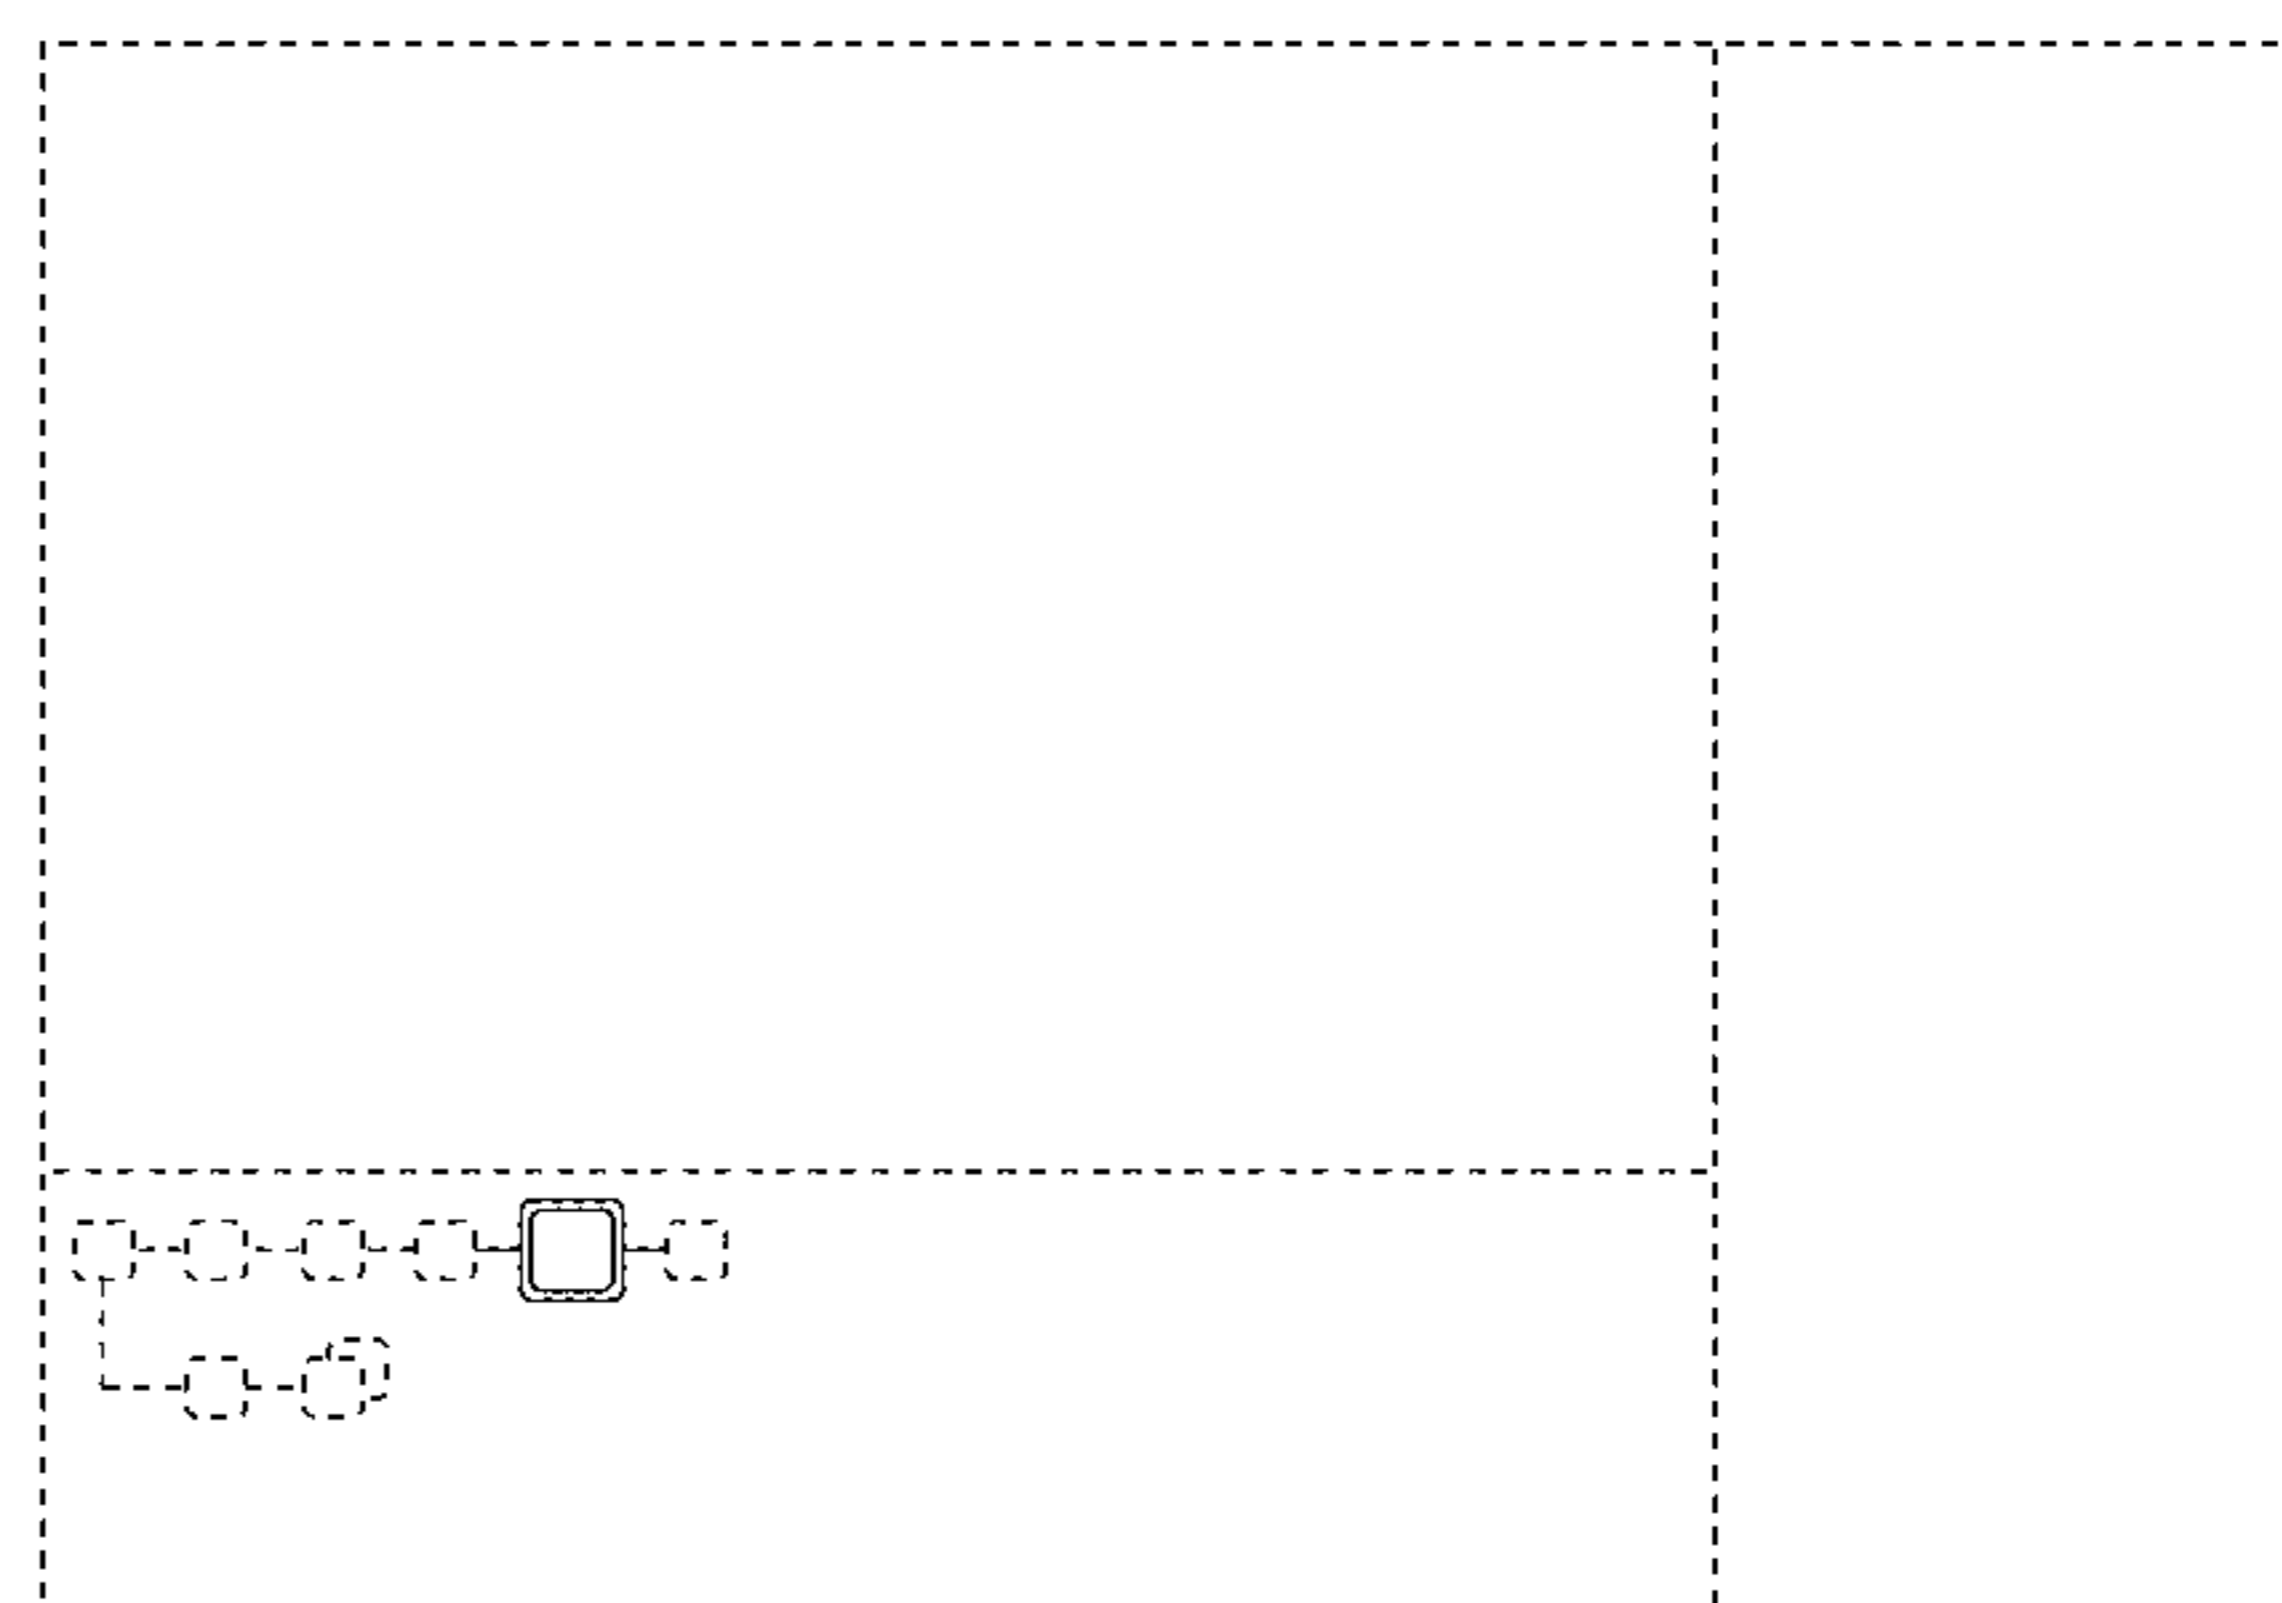

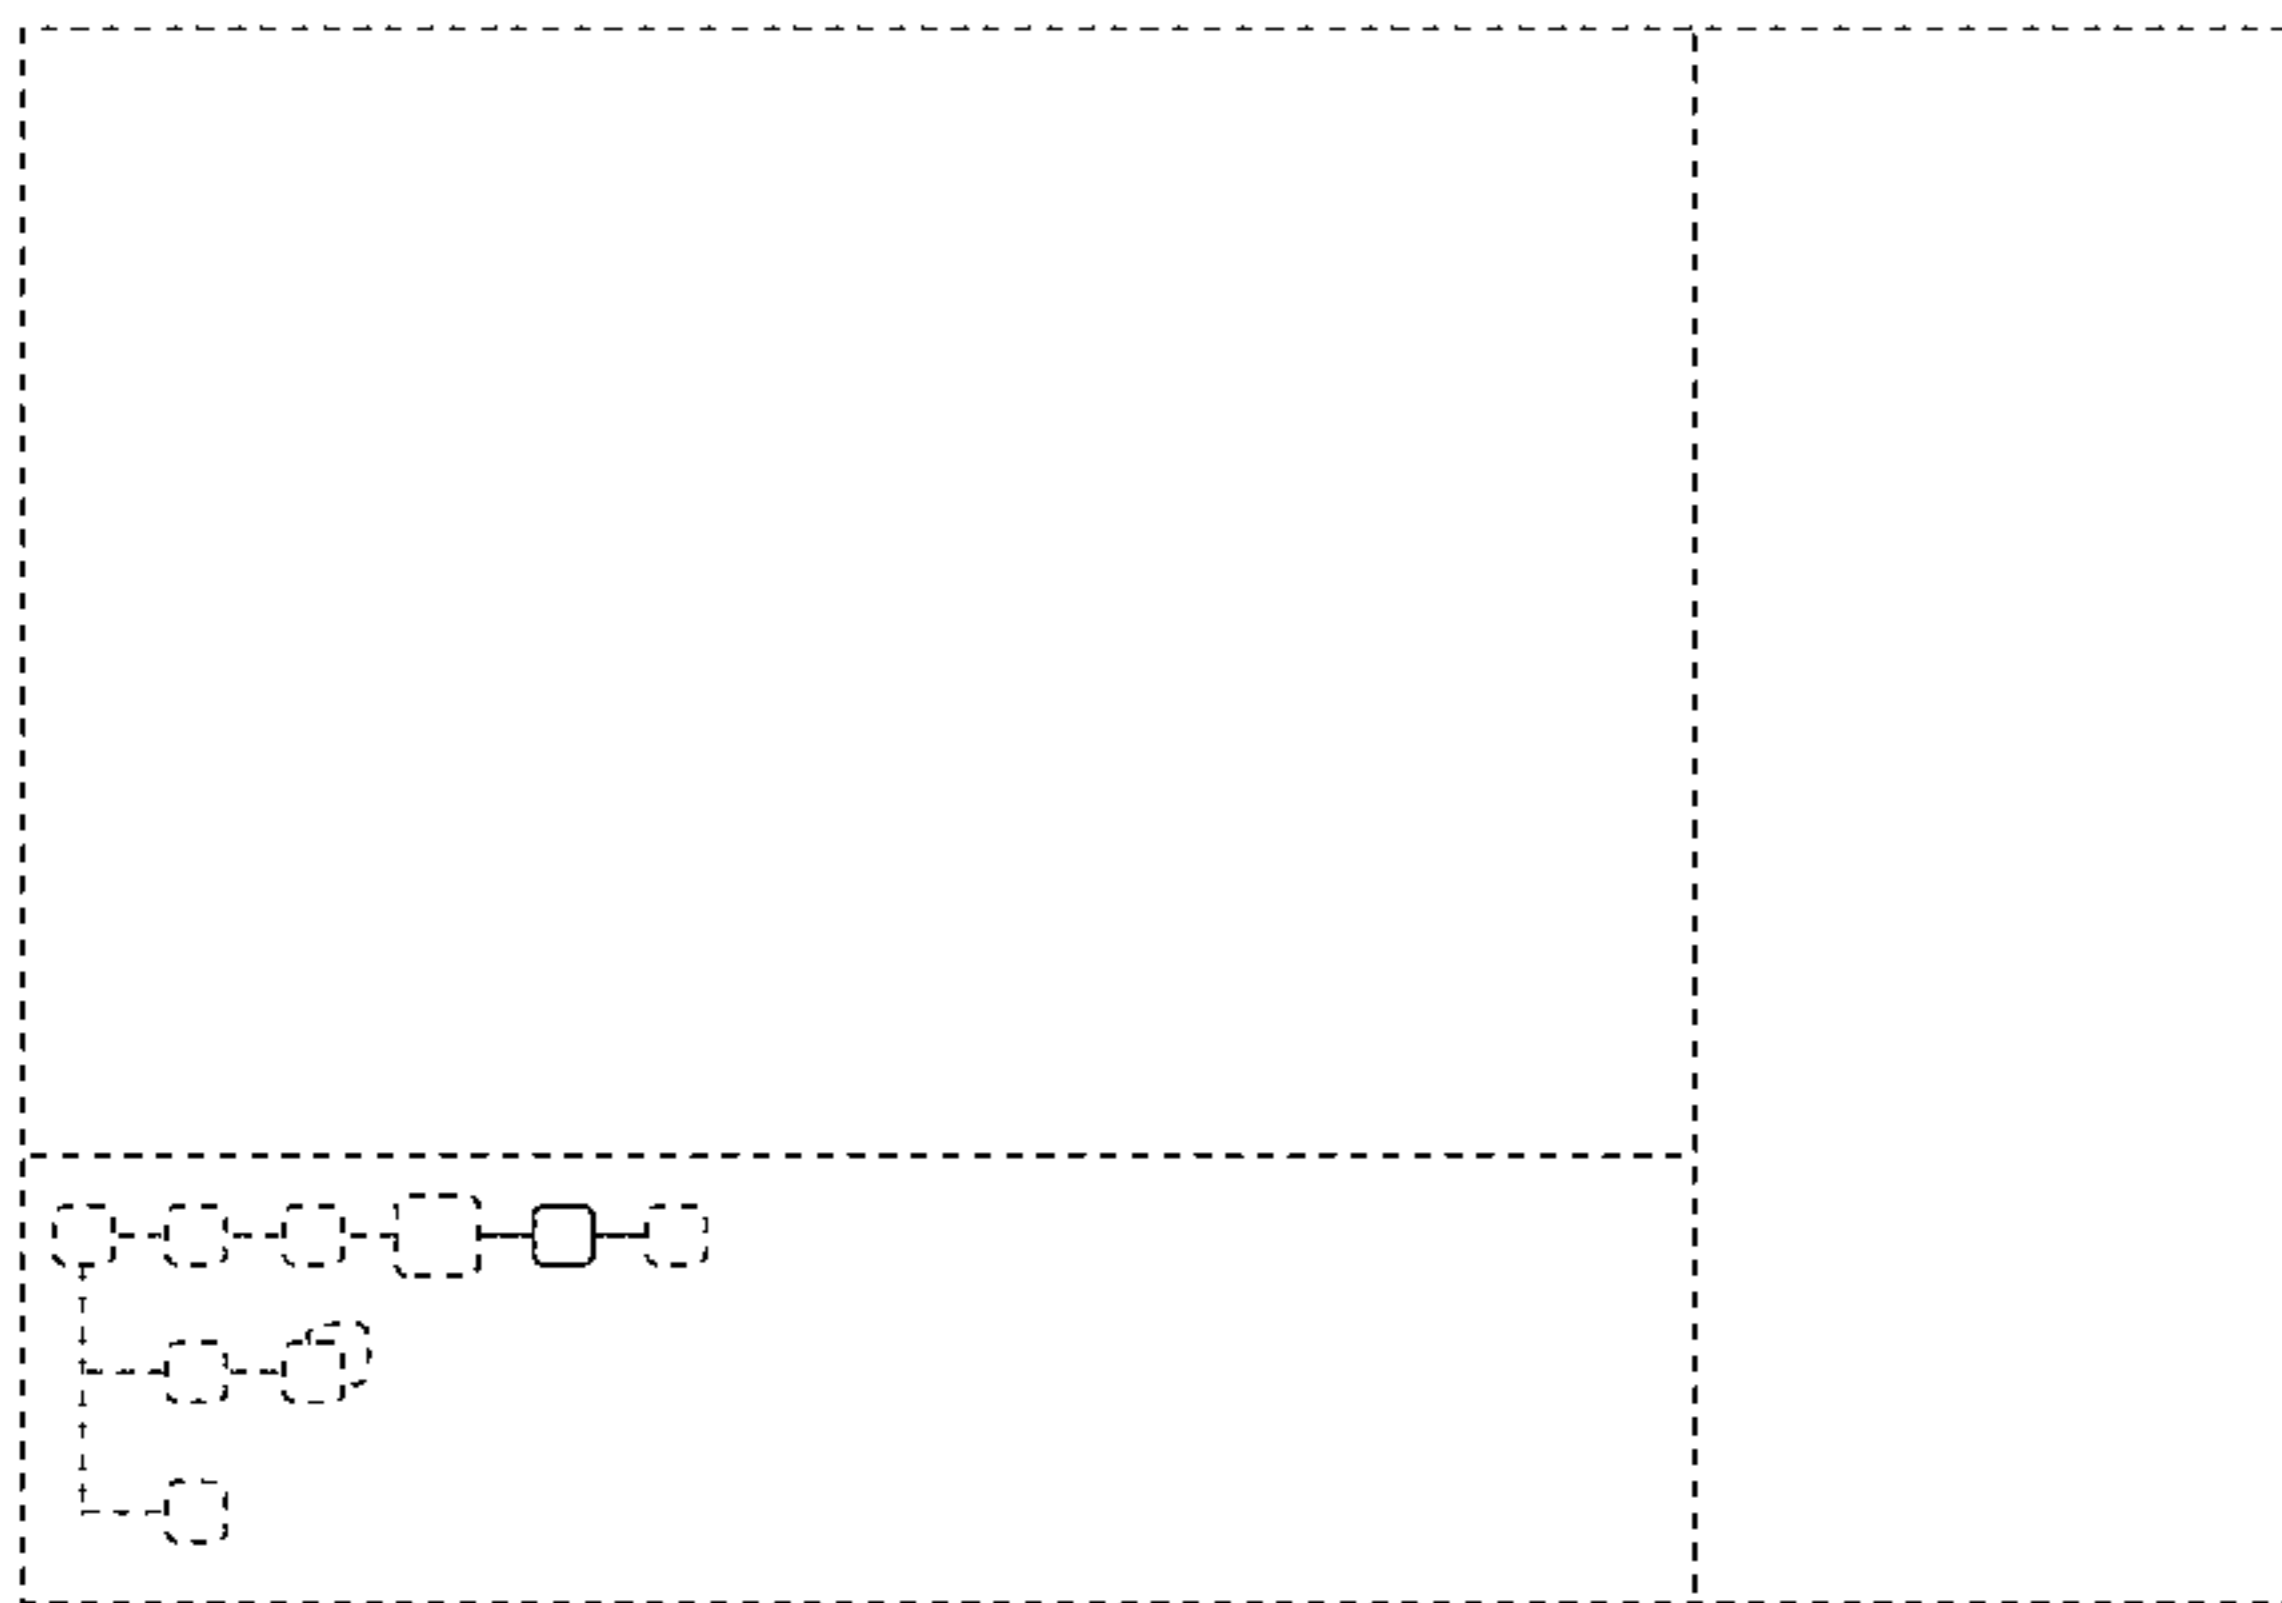

FIG. 5 is a front view of the portion of the computer screen with the first image of the animated icon, but shown with a different broken line disclosure.

FIG. 6 shows the second image of the design, but shown with a different broken line disclosure.

The subject matter in this patent includes a process in which an image changes into another image. The appearance of the icon sequentially changes between the images shown in FIGS. 1 and 2, between the images shown in FIGS. 3 and 4, and between the images shown in FIGS. 5 and 6. The process or period in which one image changes to another image forms no part of the claimed design.

The outermost dashed broken lines illustrate a portion of a computer screen. The remaining dashed broken lines illustrate portions of a graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 6 Drawing Sheets
