(57) **CLAIM**

I claim the ornamental design for a variable compression foam roller, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the design of the present invention for a variable compression foam roller;  
FIG. 2 is a front elevation view of the variable compression foam roller of FIG. 1;  
FIG. 3 is a rear elevation view of the variable compression foam roller of FIG. 1;  
FIG. 4 is a left side elevation view of the variable compression foam roller of FIG. 1; and,  
FIG. 5 is a top end view of the variable compression foam roller of FIG. 1.  
The right side elevation view of the variable compression foam roller is a mirror image of FIG. 4 and the bottom end view of the variable compression foam roller is identical to FIG. 5, and therefore a right side elevation and a bottom end view have been omitted.
