(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface for security to reduce risk, as shown and described.

DESCRIPTION

The FIGURE is a front view showing our new design. The broken line showing of a display screen and graphical user interface is included for the purpose of illustrating portions of the article and form no part of the claimed design.

Overall Rating History

The chart below shows the evolution of the company's relative security ranking over time. The shaded area represents the range of values taken by companies in the Software industry.

Findings Summary

Issue Detected	Class
17 insecure Open Port(s) identified: this can increase risk of authentication bypass attacks.	Network Security
Network Security Profile: The network security profile score is below industry average. It is worse than 72% of industry.	Network Security
