(57) **CLAIM**

The ornamental design for computer display screen with graphical user interface for navigation, as shown and described.

DESCRIPTION

The application file contains at least one drawing executed color. Copies of this patent or patent application publication with color drawings will be provided by the Office upon request and payment of the necessary fee.

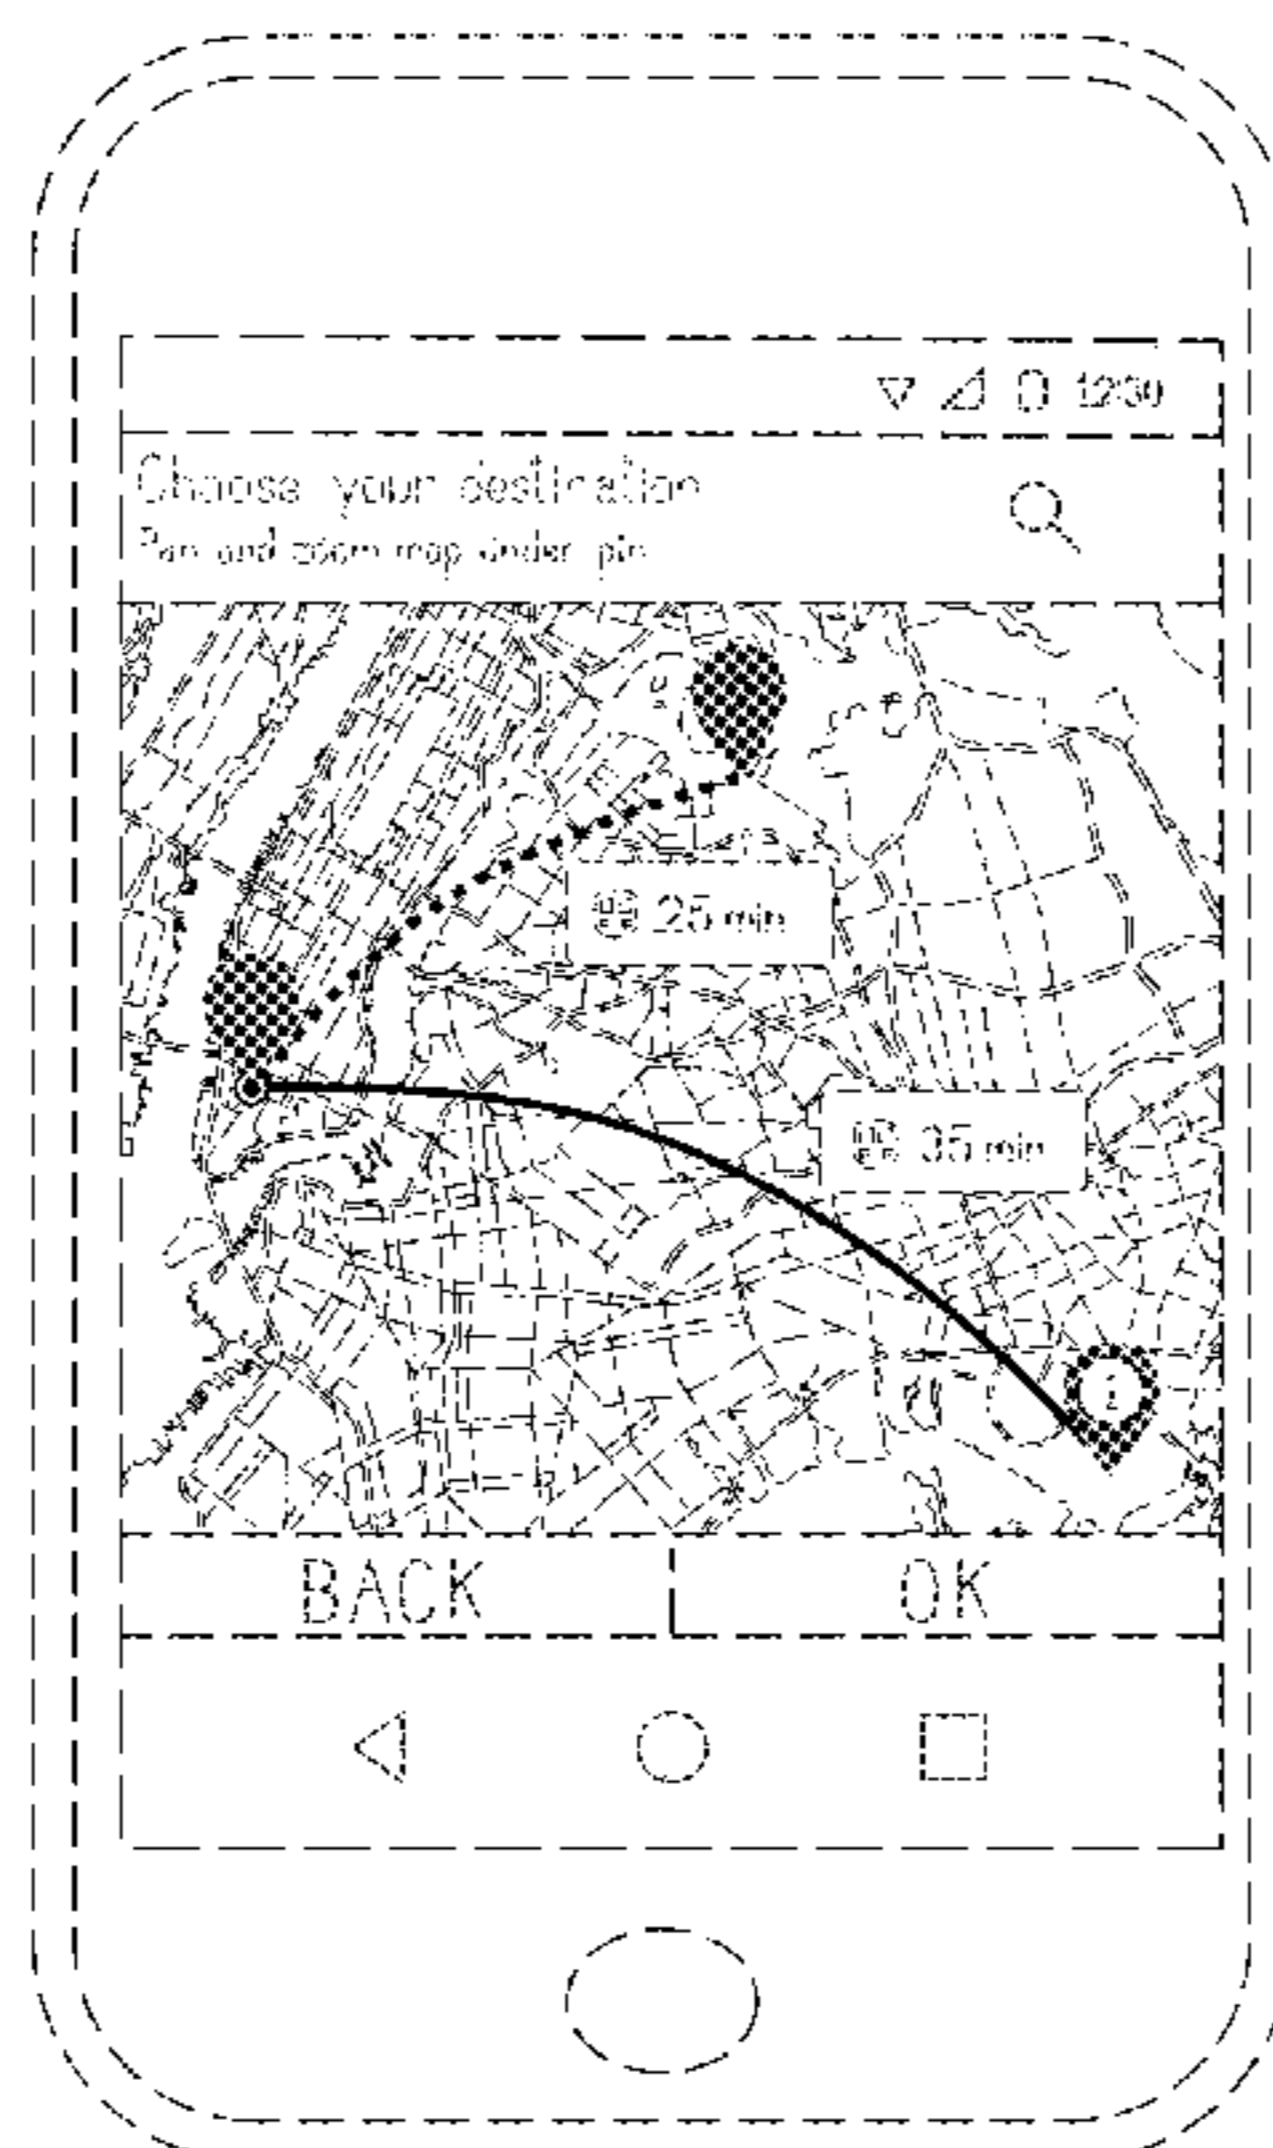

FIG. 1 is a front view of a computer display screen with graphical user interface for navigation in accordance with a first embodiment;

FIG. 2 is a front view of a second embodiment thereof; and, FIG. 3 is a front view of a third embodiment thereof.

The heavy-weight dotted line segment connecting the solid red and solid green pin icons is included in the claimed design.

The longer-incremented broken-line rectangle illustrates a computer display screen and forms no part of the claimed design. The shorter-incremented broken lines outside the rectangle illustrate an electronic device and form no part of the claimed design. The shorter-incremented broken lines within the rectangle illustrate portions of a graphical user interface and form no part of the claimed design.
