(57) **CLAIM**

The ornamental design for a pocket holster, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of a pocket holster showing my new design;
 FIG. 2 is a perspective view of the pocket holster of FIG. 1 engaged with a SMITH AND WESSON® J-FRAME model pistol;
 FIG. 3 is a rear elevational view thereof;
 FIG. 4 is a front elevational view thereof;
 FIG. 5 is a left elevational view thereof;
 FIG. 6 is a right elevational view thereof;
 FIG. 7 is a top plan view thereof;
 FIG. 8 is a bottom plan view thereof;
 FIG. 9 is an environmental view of the pocket holster shown in use; and,
 FIG. 10 is a left elevational view of a second embodiment of my pocket holster design.
 The circular eyelets and all other broken line environment depicts structure that is for illustrative purposes only and forms no part of the claimed design.
 The right elevational view of the second embodiment of my pocket holster design is a mirror image of the left elevational view as shown in FIG. 10. The top plan, bottom plan, rear elevational and front elevational views of the second pocket holster embodiment are equivalent to the top plan, bottom plan, rear elevational and front elevational views shown for the first pocket holster embodiment, except for slight difference in proportion with respect to the trigger guard receptacle feature that receives the trigger guard of the pistol and the cylinder receptacle that receives the cylinder of the pistol. The text in FIG. 10 is for informative purposes and forms no part of the claimed design. The design of the second embodiment is such that the pocket holster can receive a RUGER® LCR pistol in the same manner that the first embodiment can receive a SMITH & WESSON® J-FRAME model pistol as heretofore described and illustrated in FIG. 2.
