(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. **1** is a front view of the first image in the sequence for a display screen with graphical user interface showing a first embodiment of the new design;

FIG. **2** is a front view of the second image of the first embodiment thereof;

FIG. **3** is a front view of the third image of the first embodiment thereof;

FIG. **4** is a front view of the fourth image of the first embodiment thereof;

FIG. **5** is a front view of the first image in the sequence for a display screen with graphical user interface showing a second embodiment of the new design;

FIG. **6** is a front view of the second image of the second embodiment thereof;

FIG. **7** is a front view of the third image of the second embodiment thereof;

FIG. **8** is a front view of the fourth image of the second embodiment thereof;

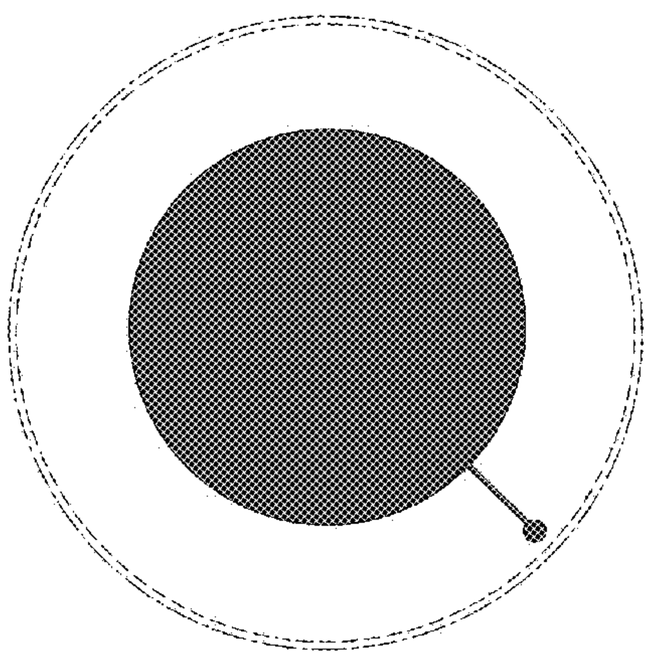
FIG. **9** is a front view of the first image in the sequence for a display screen with graphical user interface showing a third embodiment of the new design;

FIG. **10** is a front view of the second image of the third embodiment thereof;

FIG. **11** is a front view of the third image of the third embodiment thereof;

FIG. **12** is a front view of the fourth image of the third embodiment thereof;

FIG. **13** is a front view of the first image in the sequence for a display screen with graphical user interface showing a fourth embodiment of the new design;
(Continued)



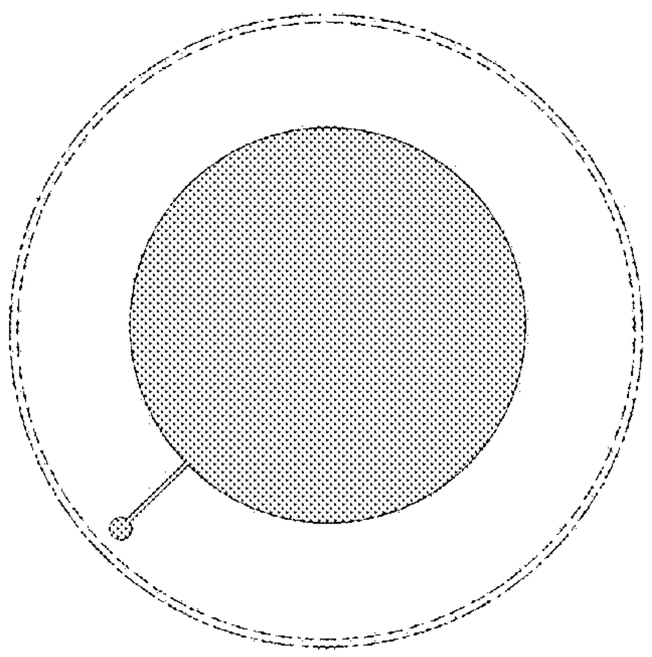


FIG. **14** is a front view of the second image of the fourth embodiment thereof;
FIG. **15** is a front view of the third image of the fourth embodiment thereof; and,
FIG. **16** is a front view of the fourth image of the fourth embodiment thereof.
The dot-dash perimeter illustrates a display screen and forms no part of the claimed design. The remaining broken lines illustrate portions of a graphical user interface and form no part of the claimed design.
The appearance of the transitional image sequentially transitions between the images shown in FIGS. **1-4** in the first embodiment, FIGS. **5-8** in the second embodiment, FIGS. **9-12** in the third embodiment, and FIGS. **13-16** in the fourth embodiment. The process or period in which one image transitions to another forms no part of the claimed design.
