(57) **CLAIM**

The ornamental design for a display screen portion having a graphical user interface with a transitional icon, as shown and described.

**DESCRIPTION**

FIG. 1 is a face view of a display screen portion having a graphical user interface with a transitional icon, showing my new design, according to a first embodiment and illustrating a first image thereof.

(Continued)

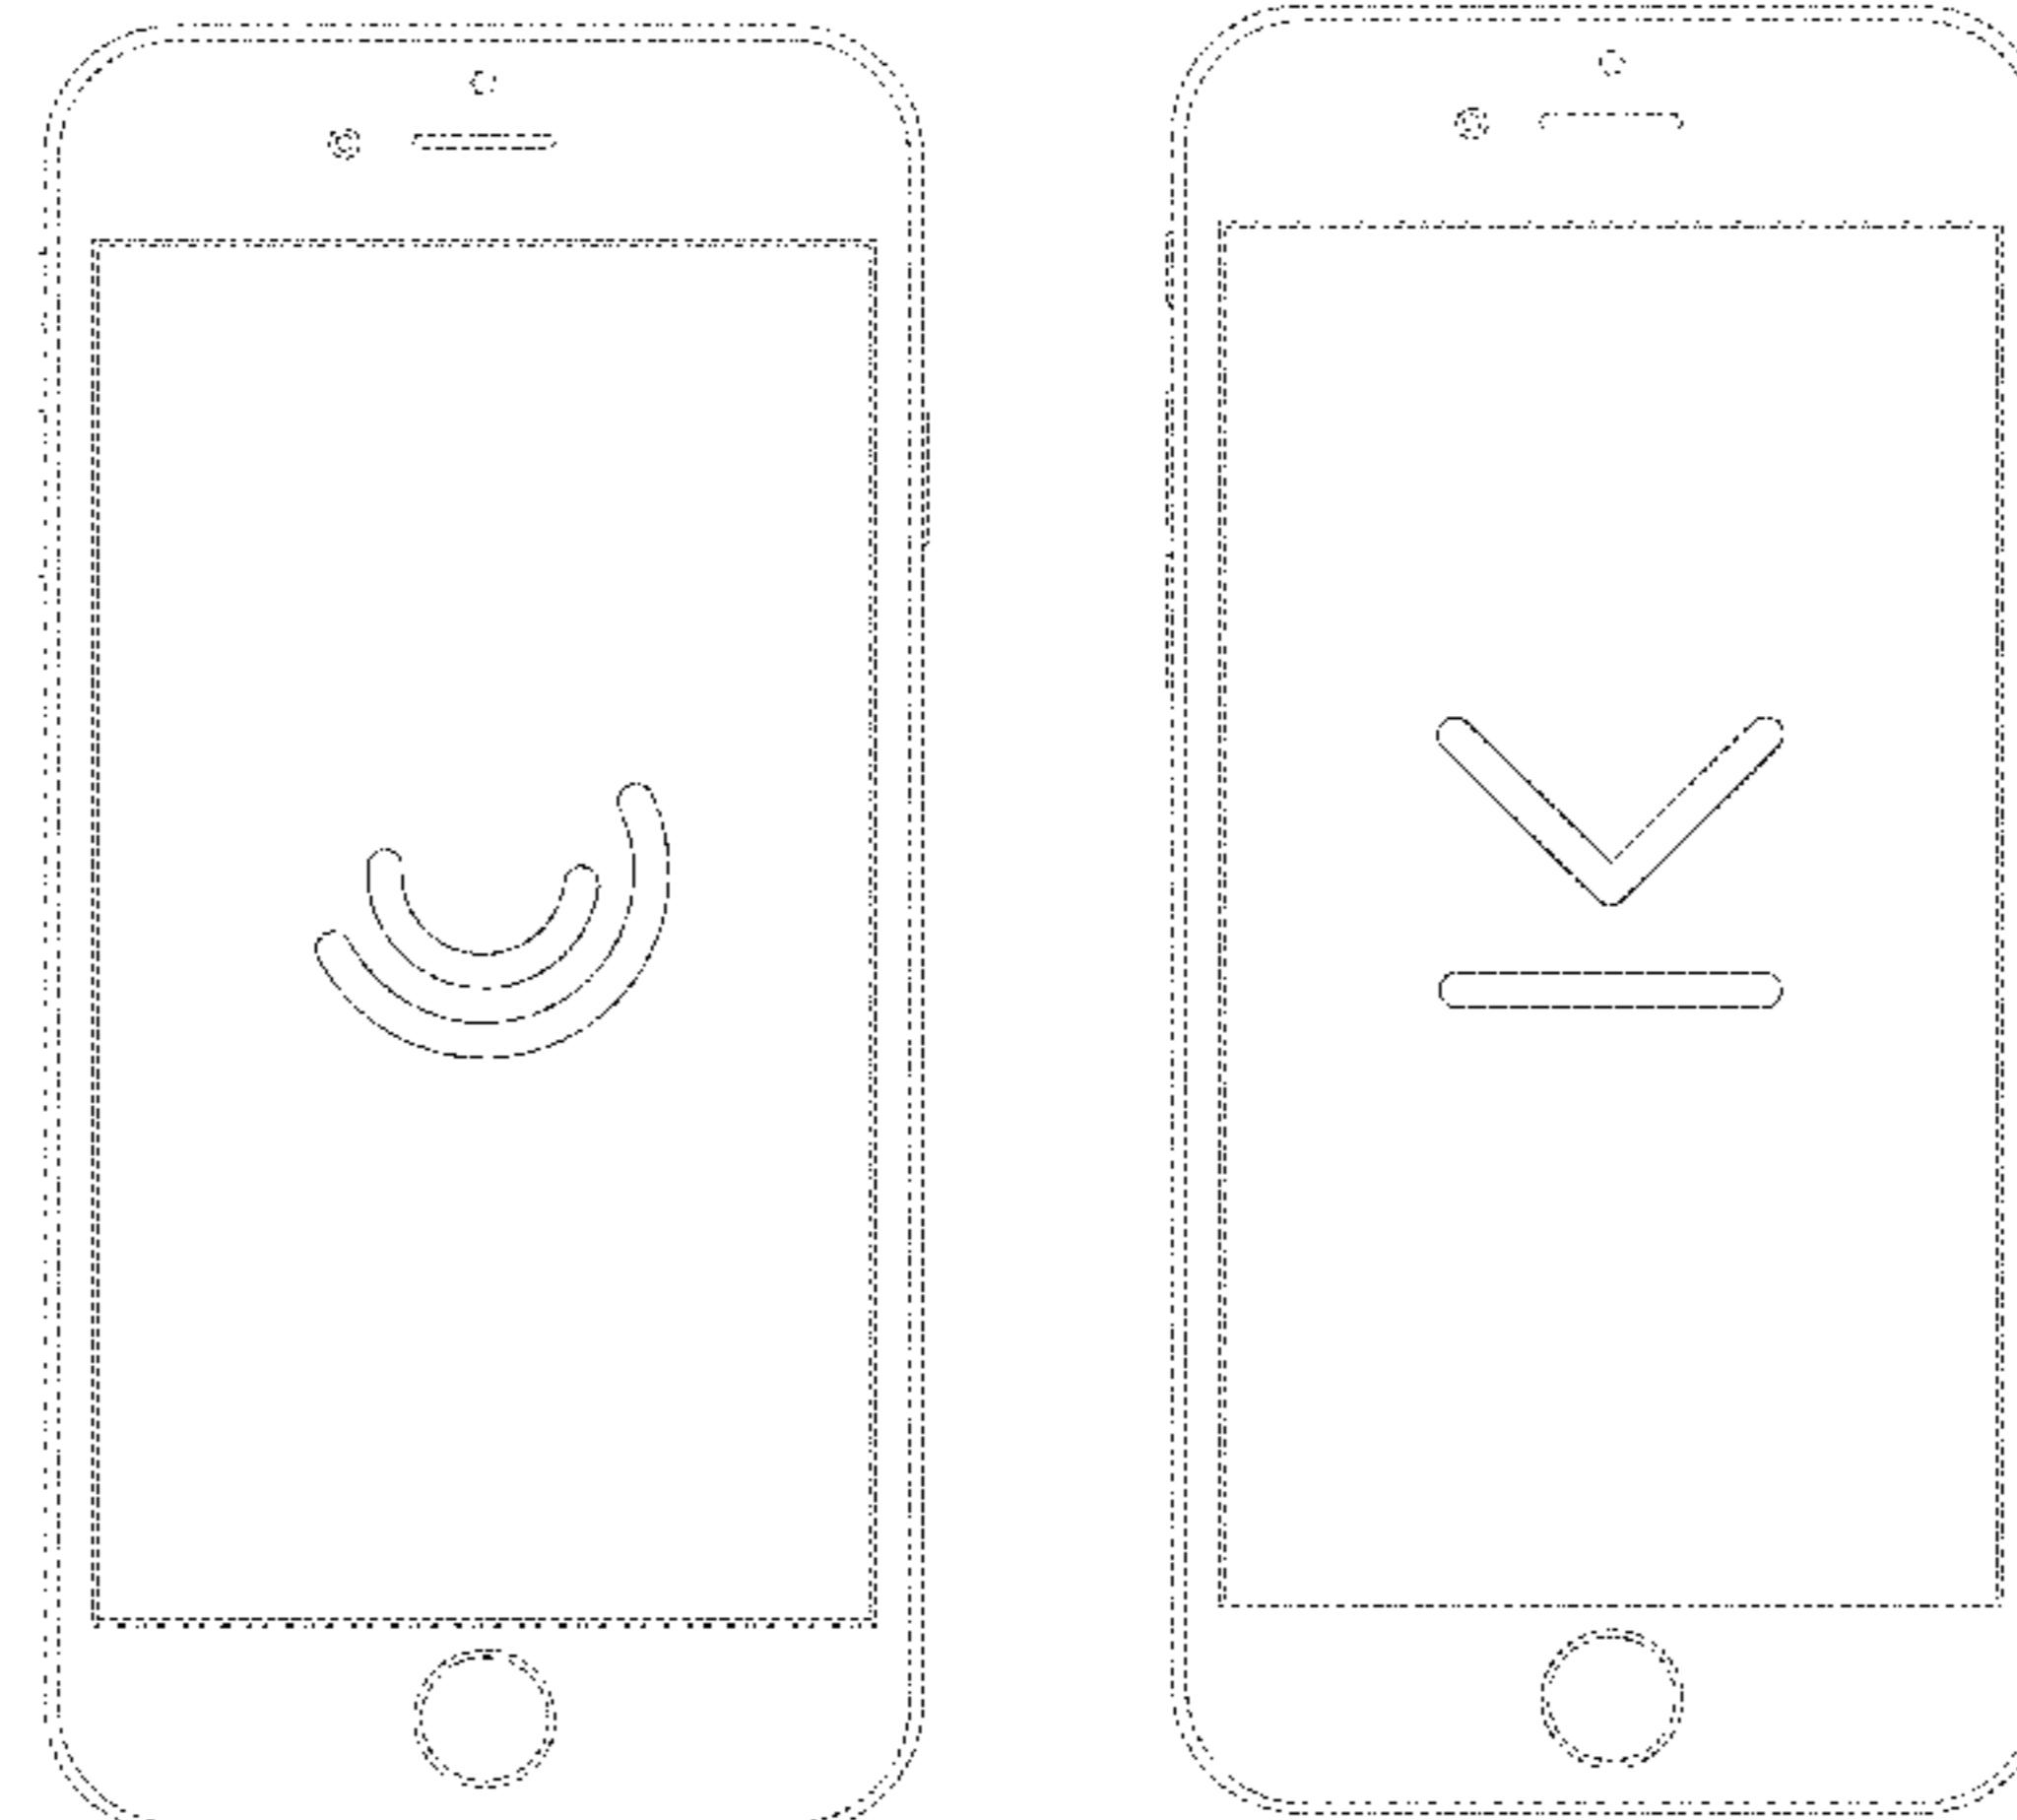

FIG. 34 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a tenth image thereof.

FIG. 35 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating an eleventh image thereof.

FIG. 36 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twelfth image thereof.

FIG. 37 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a thirteenth image thereof.

FIG. 38 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a fourteenth image thereof.

FIG. 39 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a fifteenth image thereof.

FIG. 40 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a sixteenth image thereof.

FIG. 41 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a seventeenth image thereof.

FIG. 42 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating an eighteenth image thereof.

FIG. 43 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a nineteenth image thereof.

FIG. 44 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twentieth image thereof.

FIG. 45 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twenty-first image thereof.

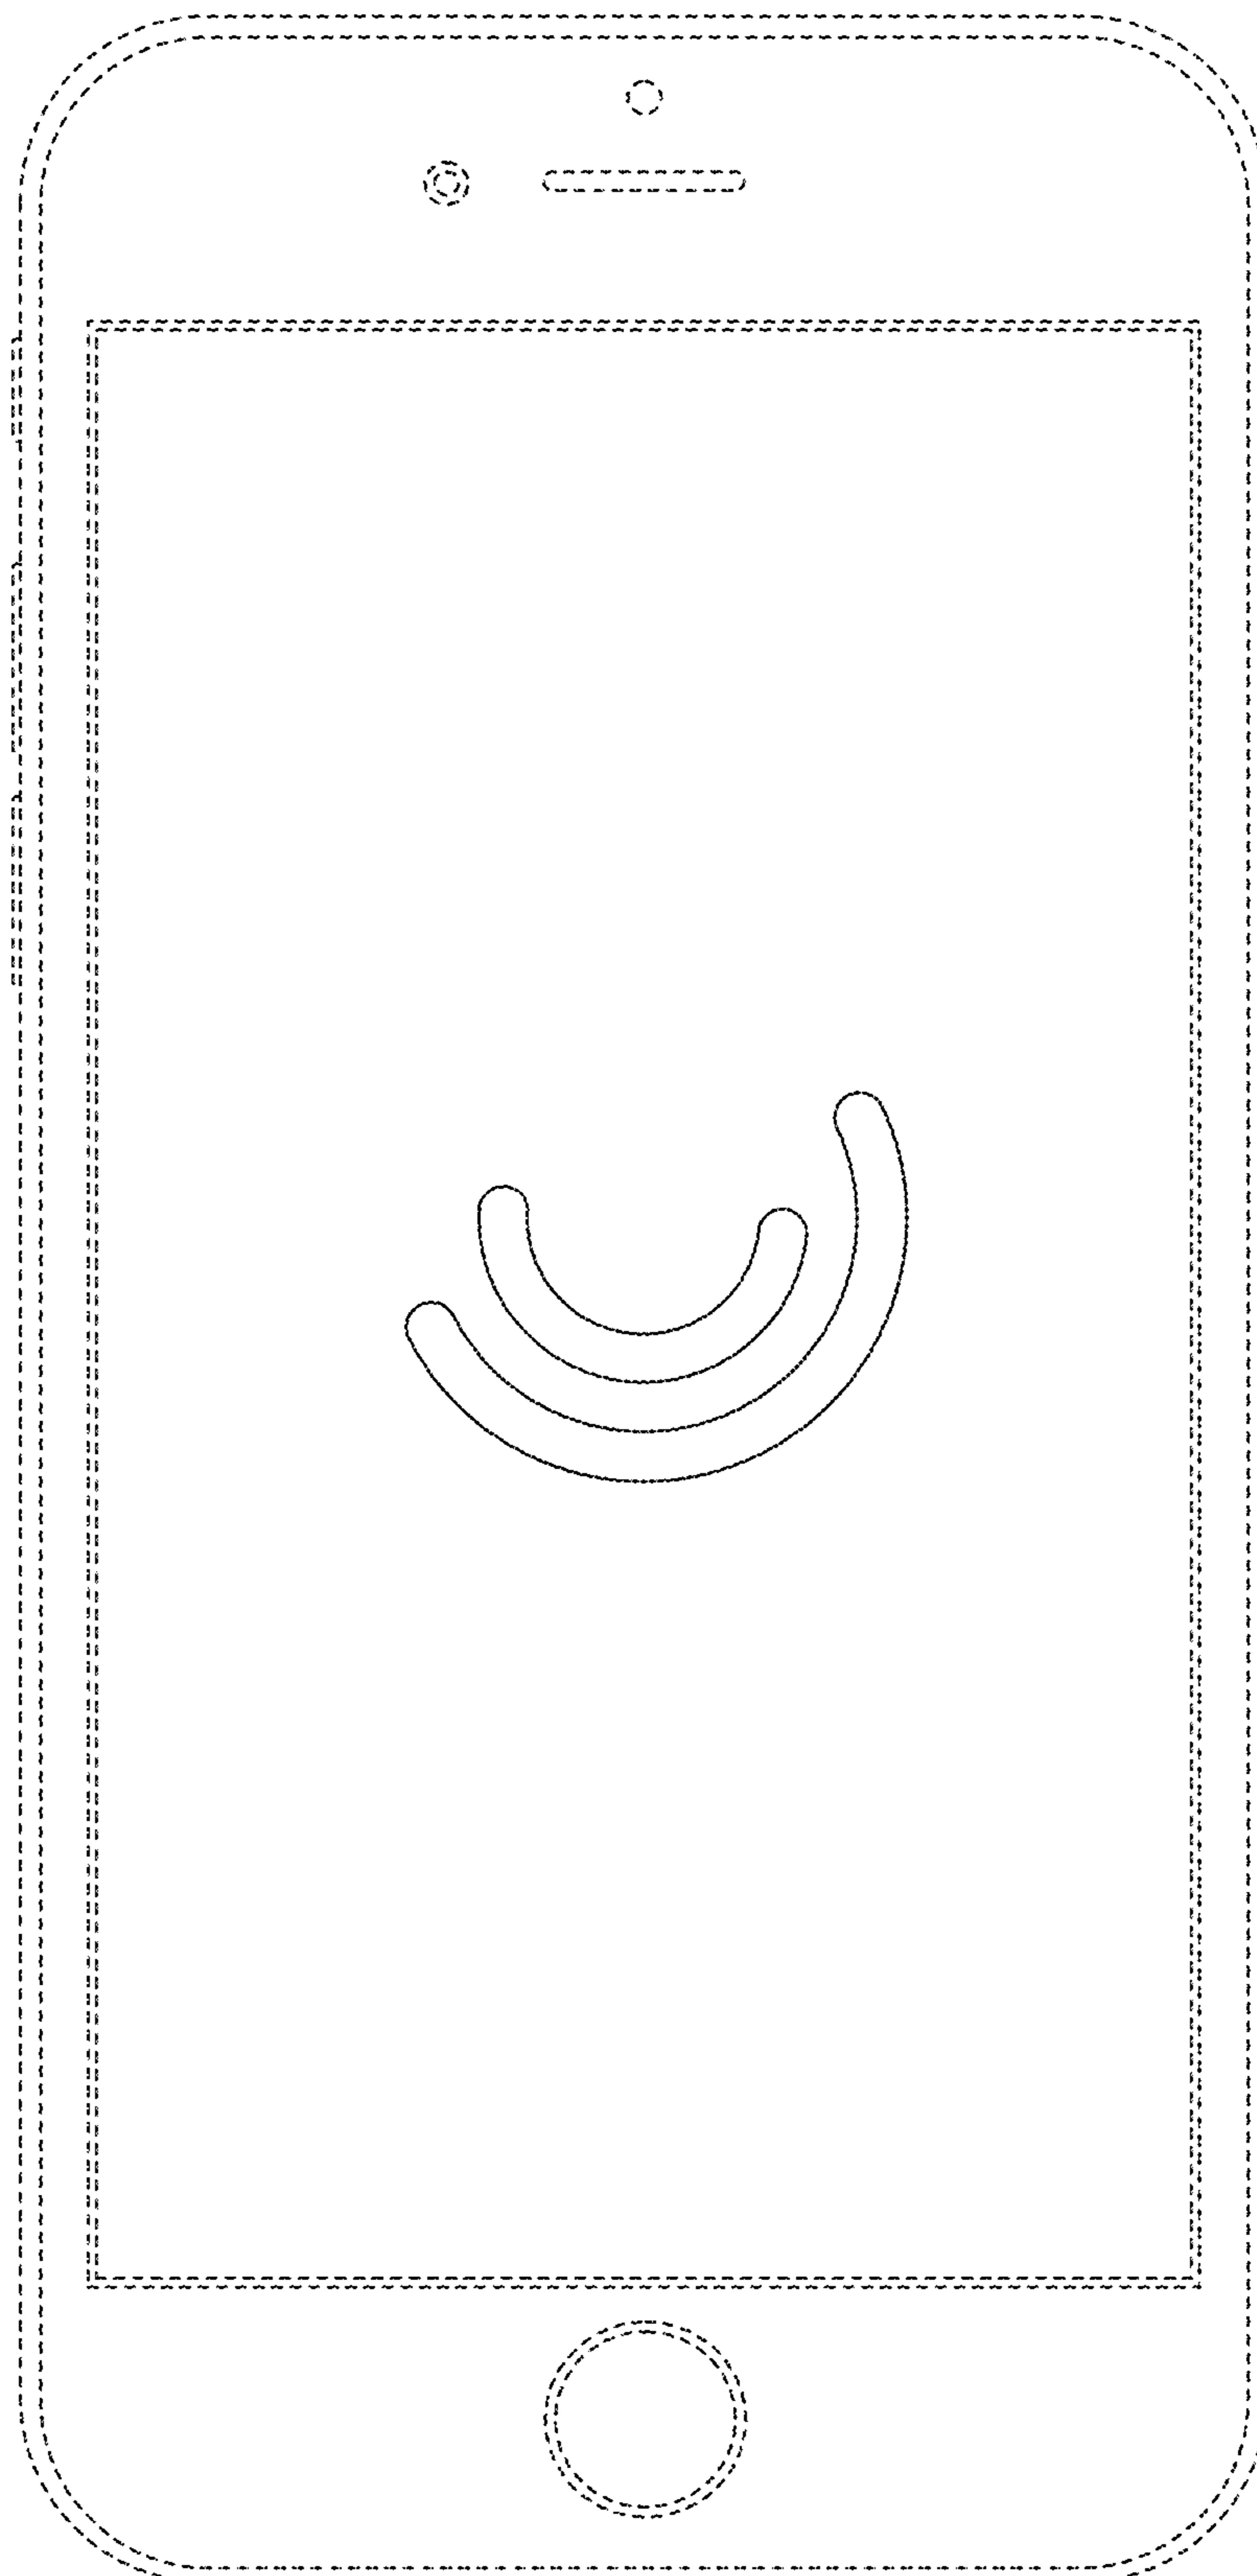

FIG. 46 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twenty-second image thereof.

FIG. 47 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twenty-third image thereof; and,

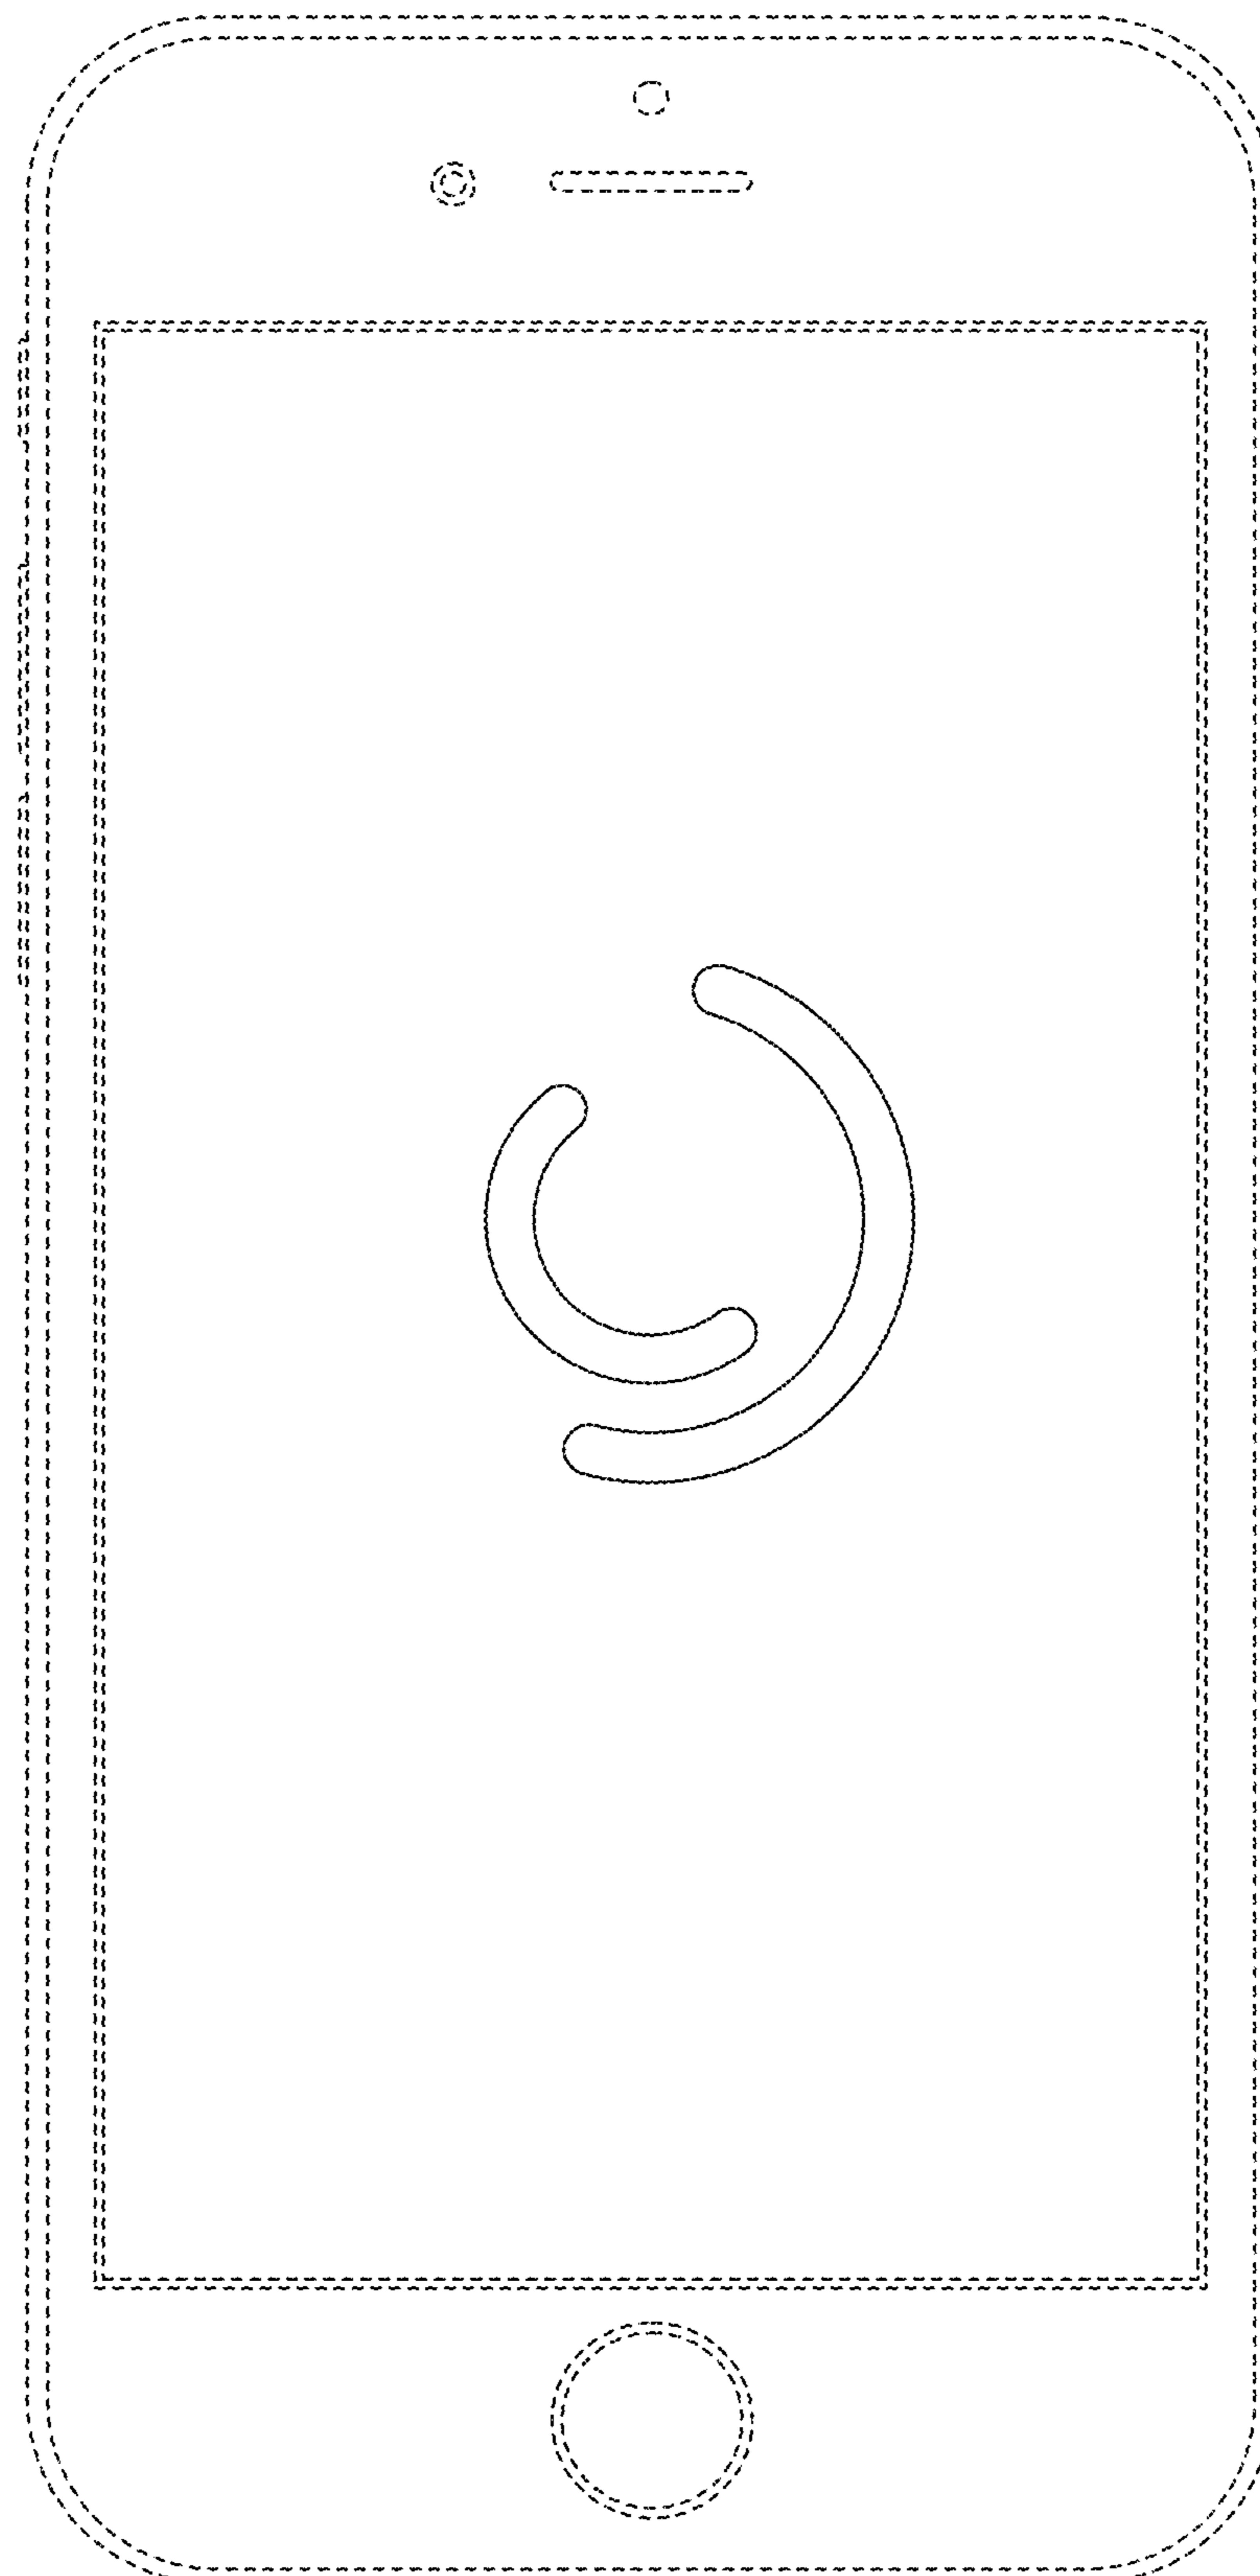

FIG. 48 is a face view of a display screen portion having the graphical user interface with the transitional icon, according to the second embodiment and illustrating a twenty-fourth image thereof.

The appearance of the transitional icon sequentially transitions among the images shown in FIGS. 1-24, or among the images shown in FIGS. 25-48. The process or period in which one image transitions to another image forms no part of the claimed design.

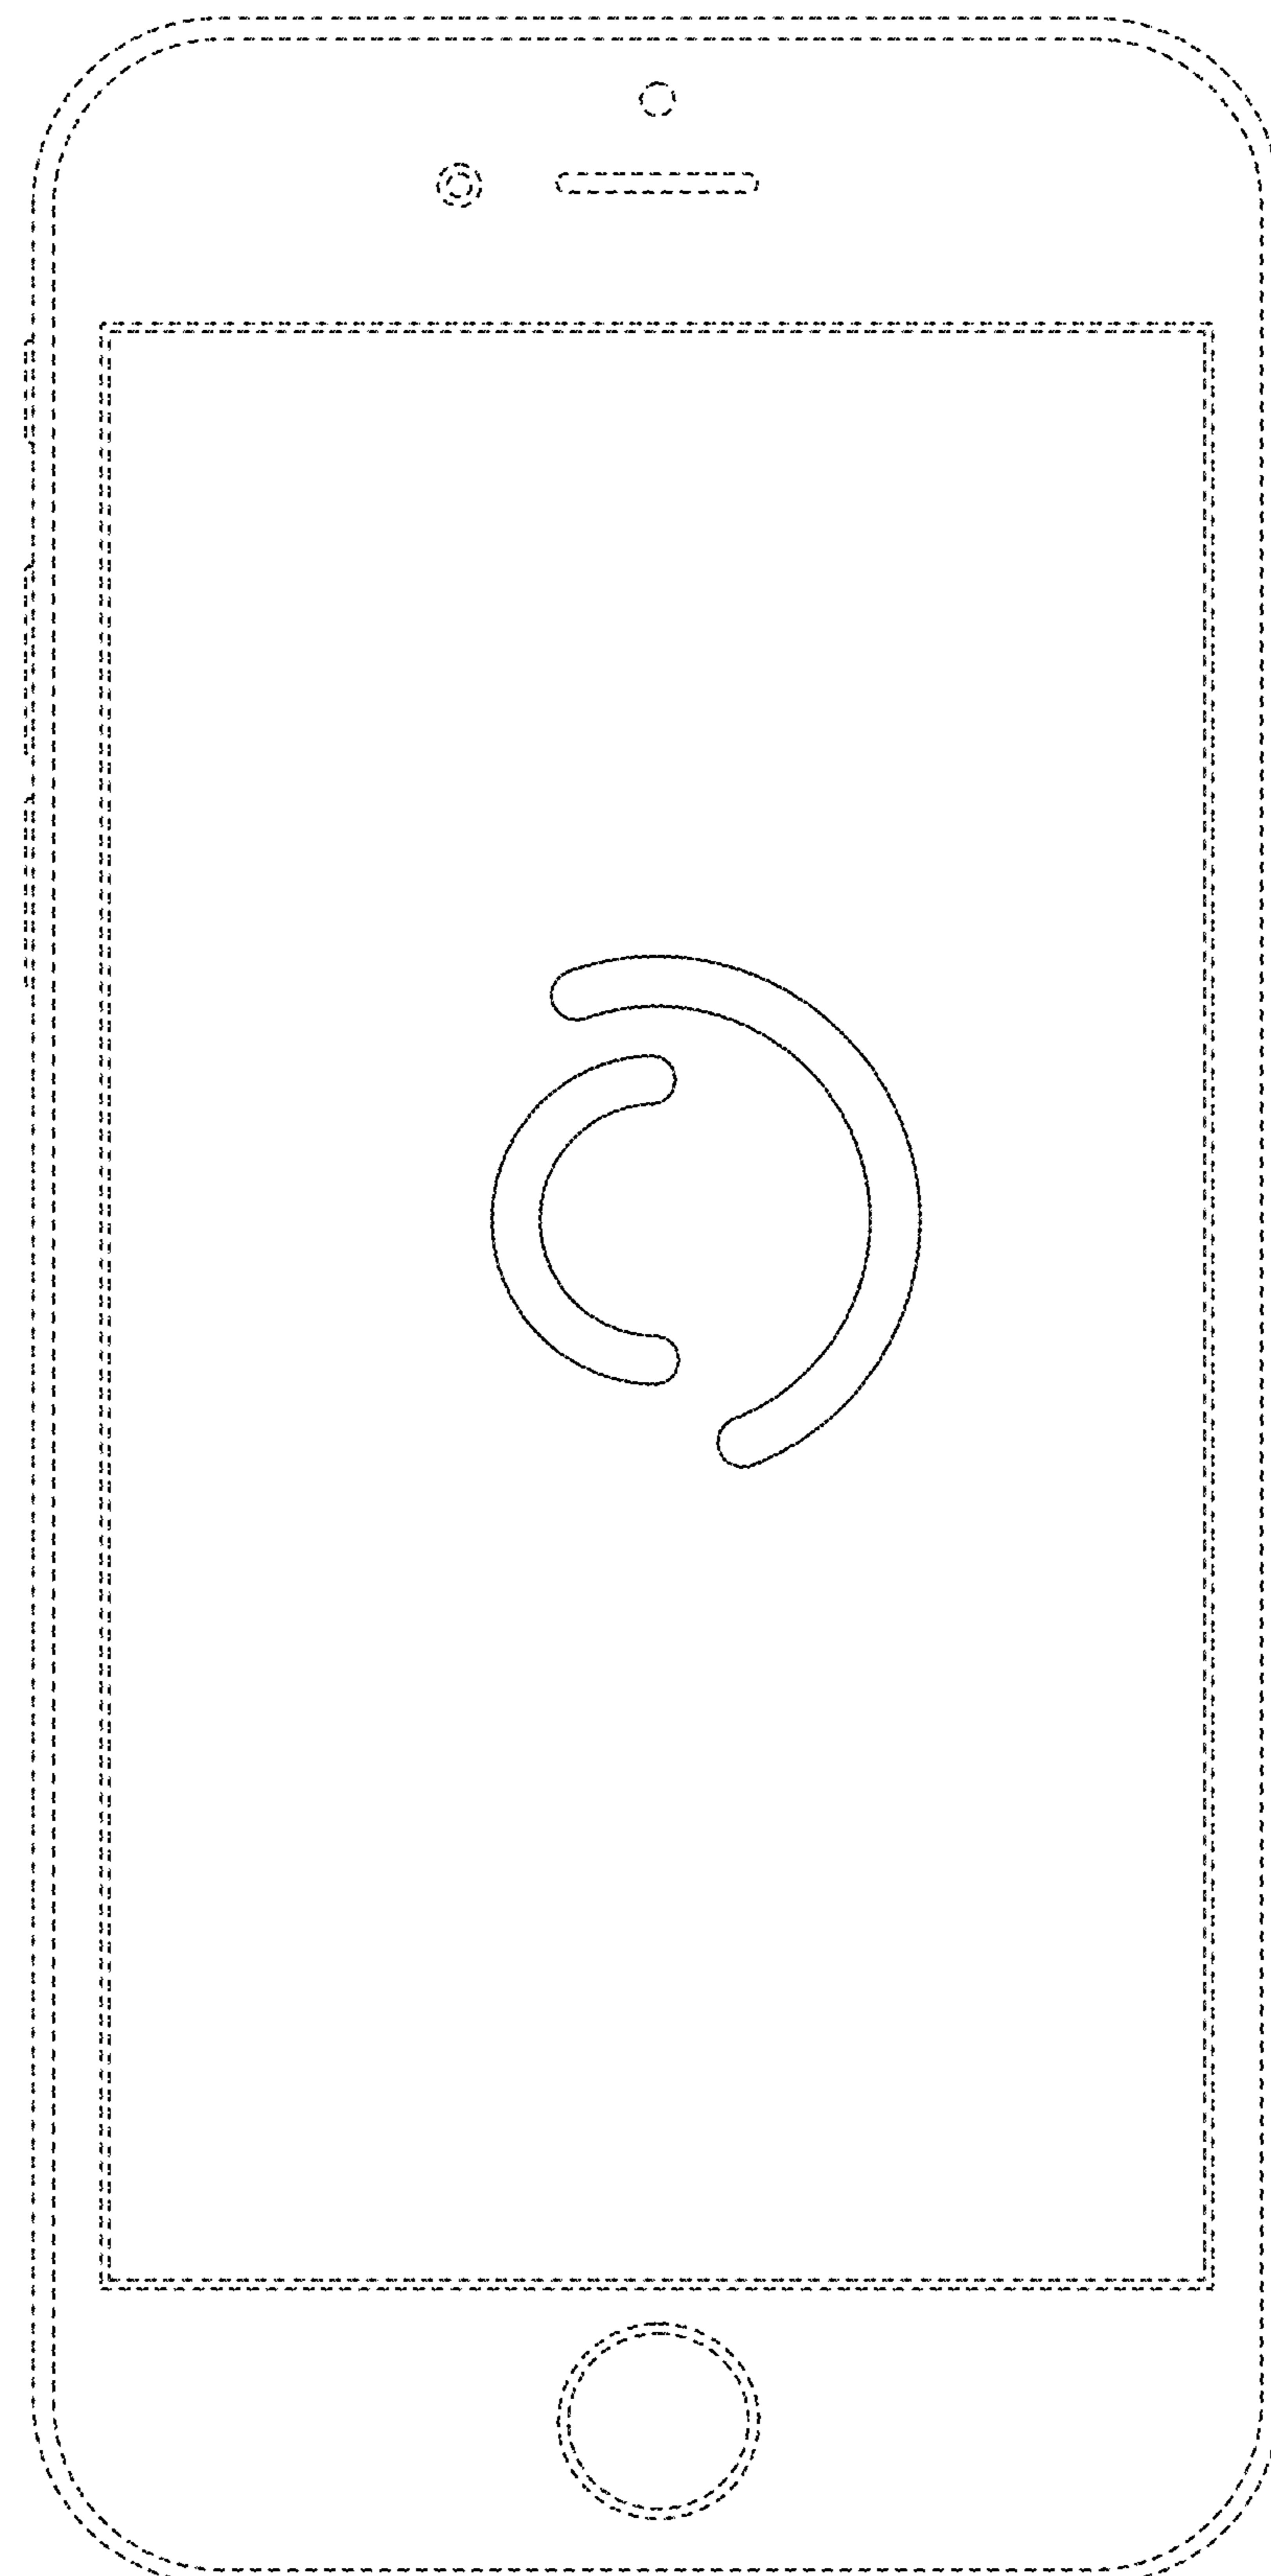

Subject matter shown in broken lines is environmental and forms no part of the claimed design. However, Applicant reserves the right to claim any combination or subset of subject matter, whether shown in broken lines or solid lines, in this application or in one or more divisional applications thereof.
