(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a graphical user interface, substantially as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen or portion thereof with a graphical user interface according to a first embodiment.

FIG. 2 is a front view of a display screen or portion thereof with a graphical user interface according to a second embodiment.

FIG. 3 is a front view of a display screen or portion thereof with a graphical user interface according to a third embodiment.

FIG. 4 is a front view of a display screen or portion thereof with a graphical user interface according to a fourth embodiment.

FIG. 5 is a front view of a display screen or portion thereof with a graphical user interface according to a fifth embodiment.

FIG. 6 is a front view of a display screen or portion thereof with a graphical user interface according to a sixth embodiment.

FIG. 7 is a front view of a display screen or portion thereof with a graphical user interface according to a seventh embodiment.

(Continued)

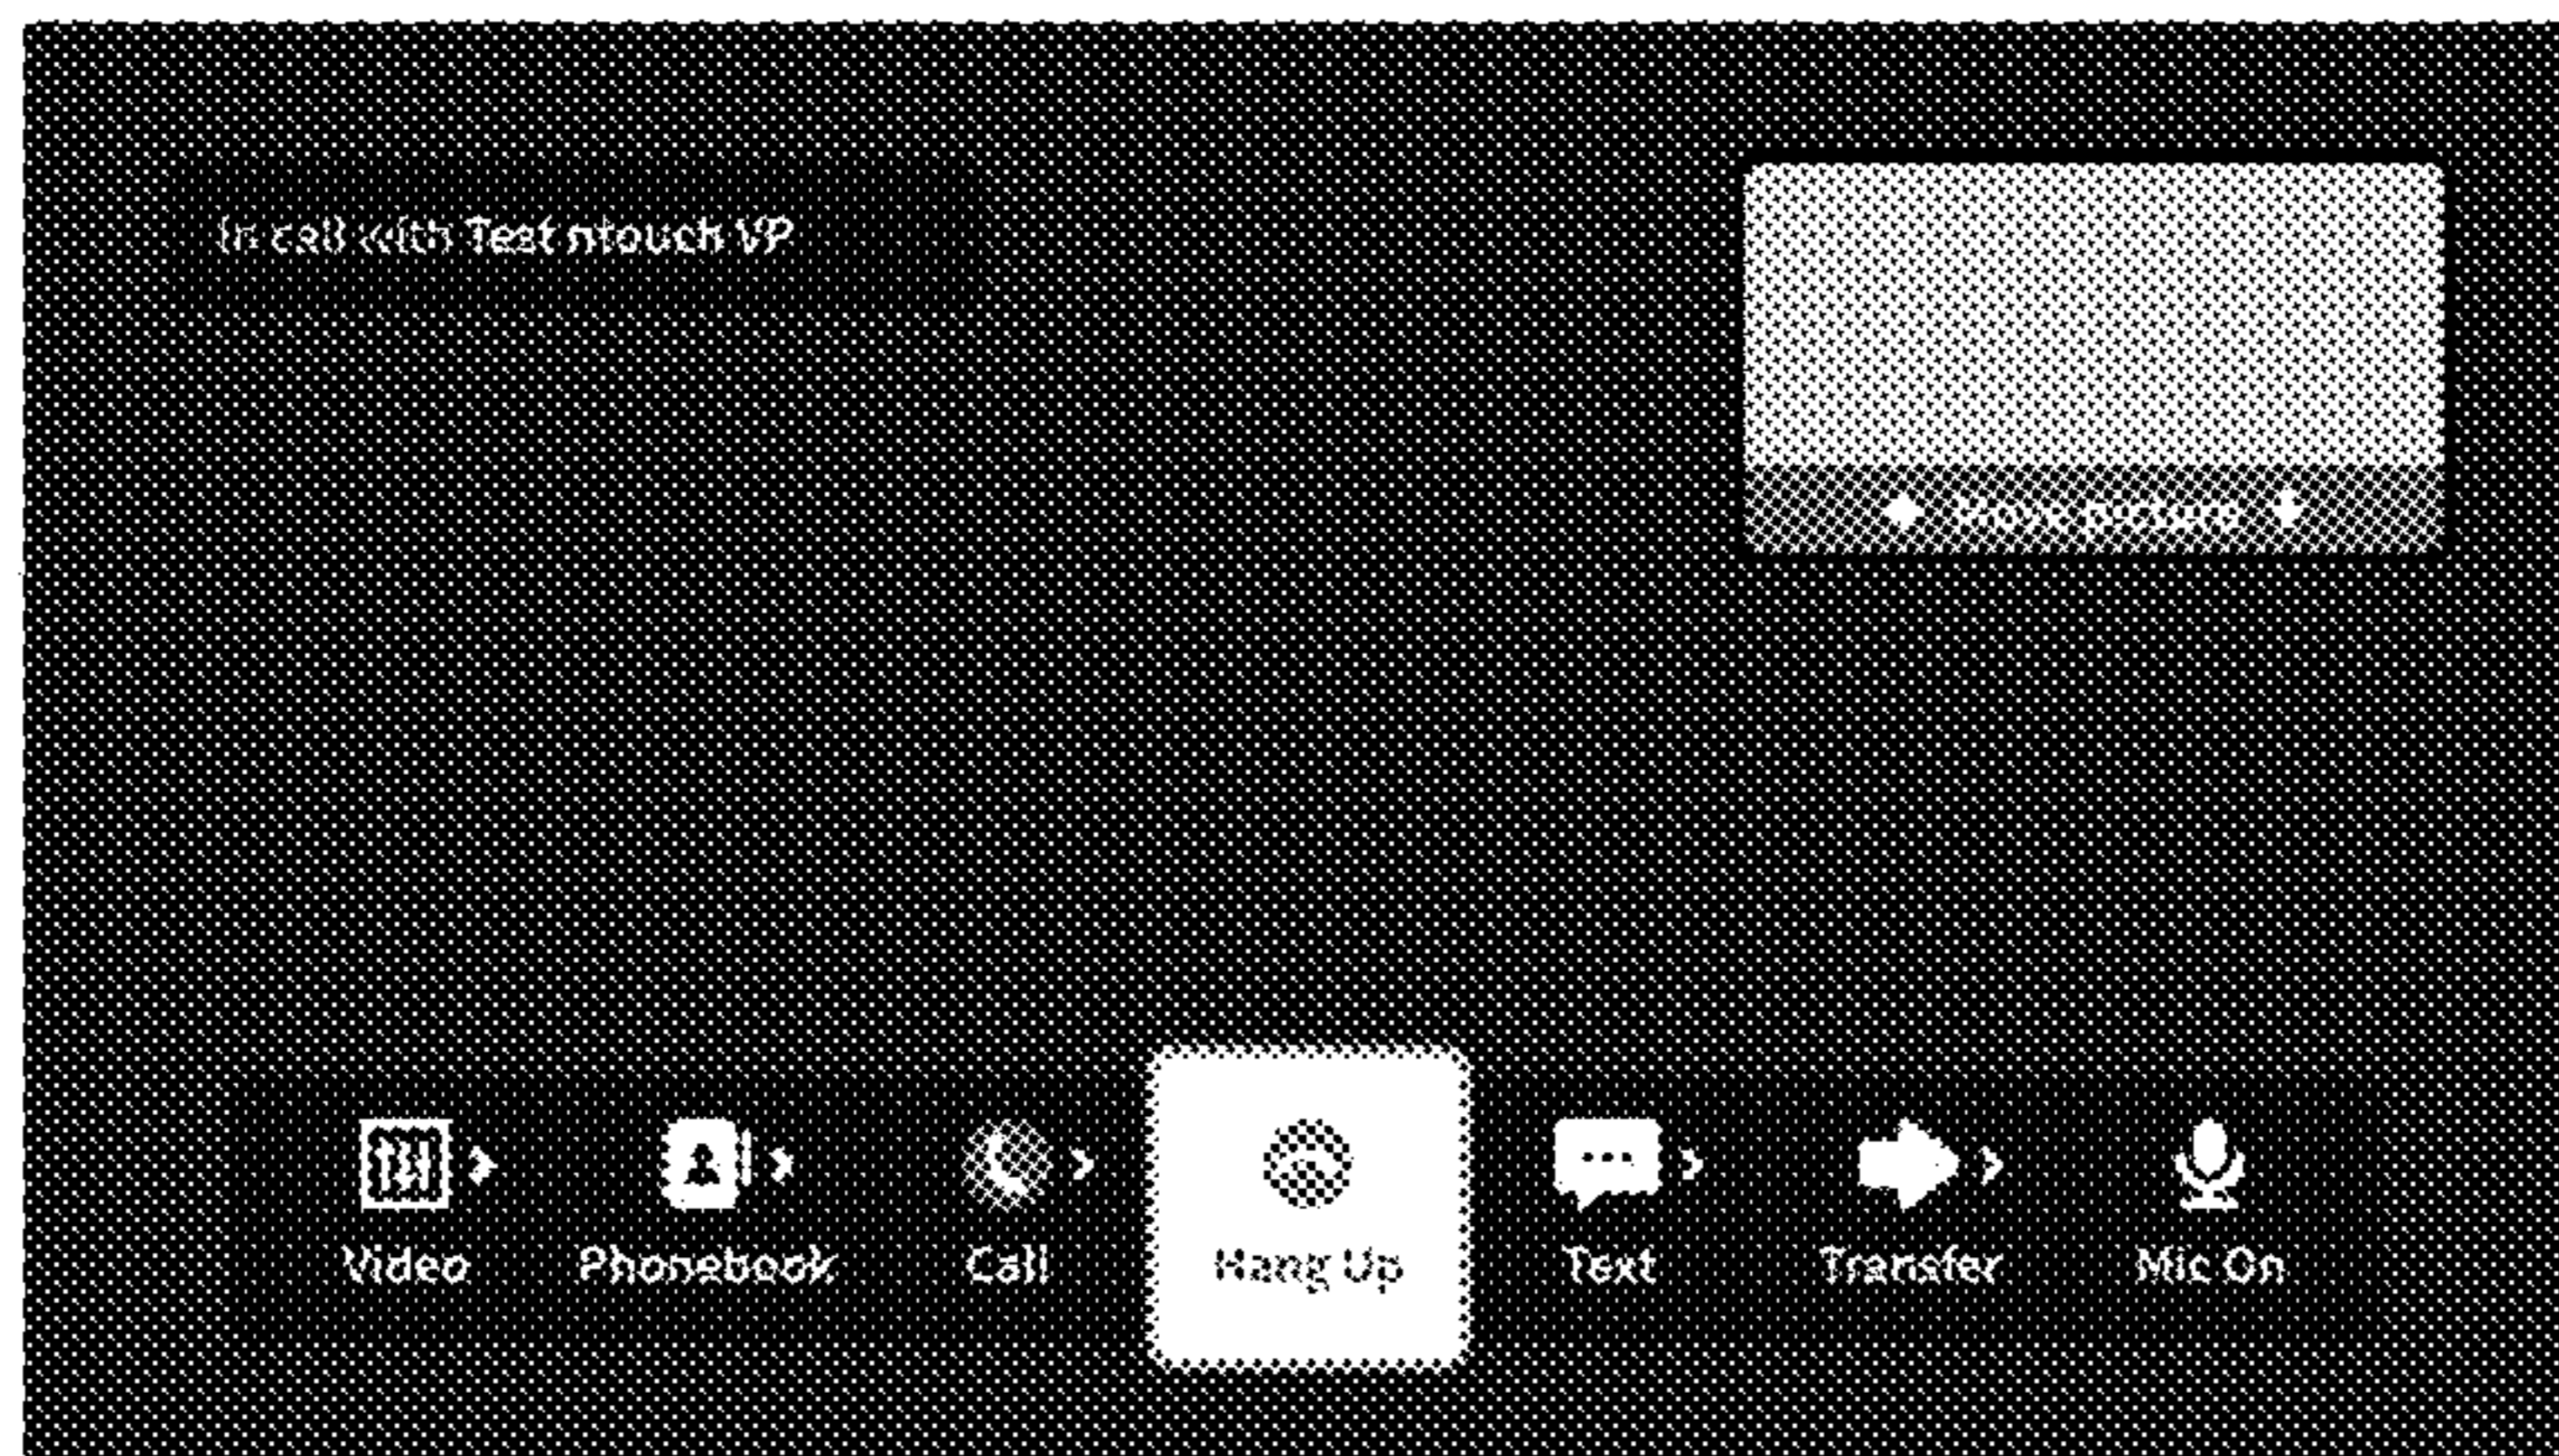

FIG. 8 is a front view of a display screen or portion thereof with a graphical user interface according to an eighth embodiment.

FIG. 9 is a front view of a display screen or portion thereof with a graphical user interface according to a ninth embodiment.

FIG. 10 is a front view of a display screen or portion thereof with a graphical user interface according to a tenth embodiment.

FIG. 11 is a front view of a display screen or portion thereof with a graphical user interface according to an eleventh embodiment.

FIG. 12 is a front view of a display screen or portion thereof with a graphical user interface according to a twelfth embodiment.

FIG. 13 is a front view of a display screen or portion thereof with a graphical user interface according to a thirteenth embodiment.

FIG. 14 is a front view of a display screen or portion thereof with a graphical user interface according to a fourteenth embodiment.

FIG. 15 is a front view of a display screen or portion thereof with a graphical user interface according to a fifteenth embodiment; and,

FIG. 16 is a front view of a display screen or portion thereof with a graphical user interface according to a sixteenth embodiment.

The rectangular broken-line perimeter illustrates a display screen and forms no part of the claimed design.
