(57) **CLAIM**

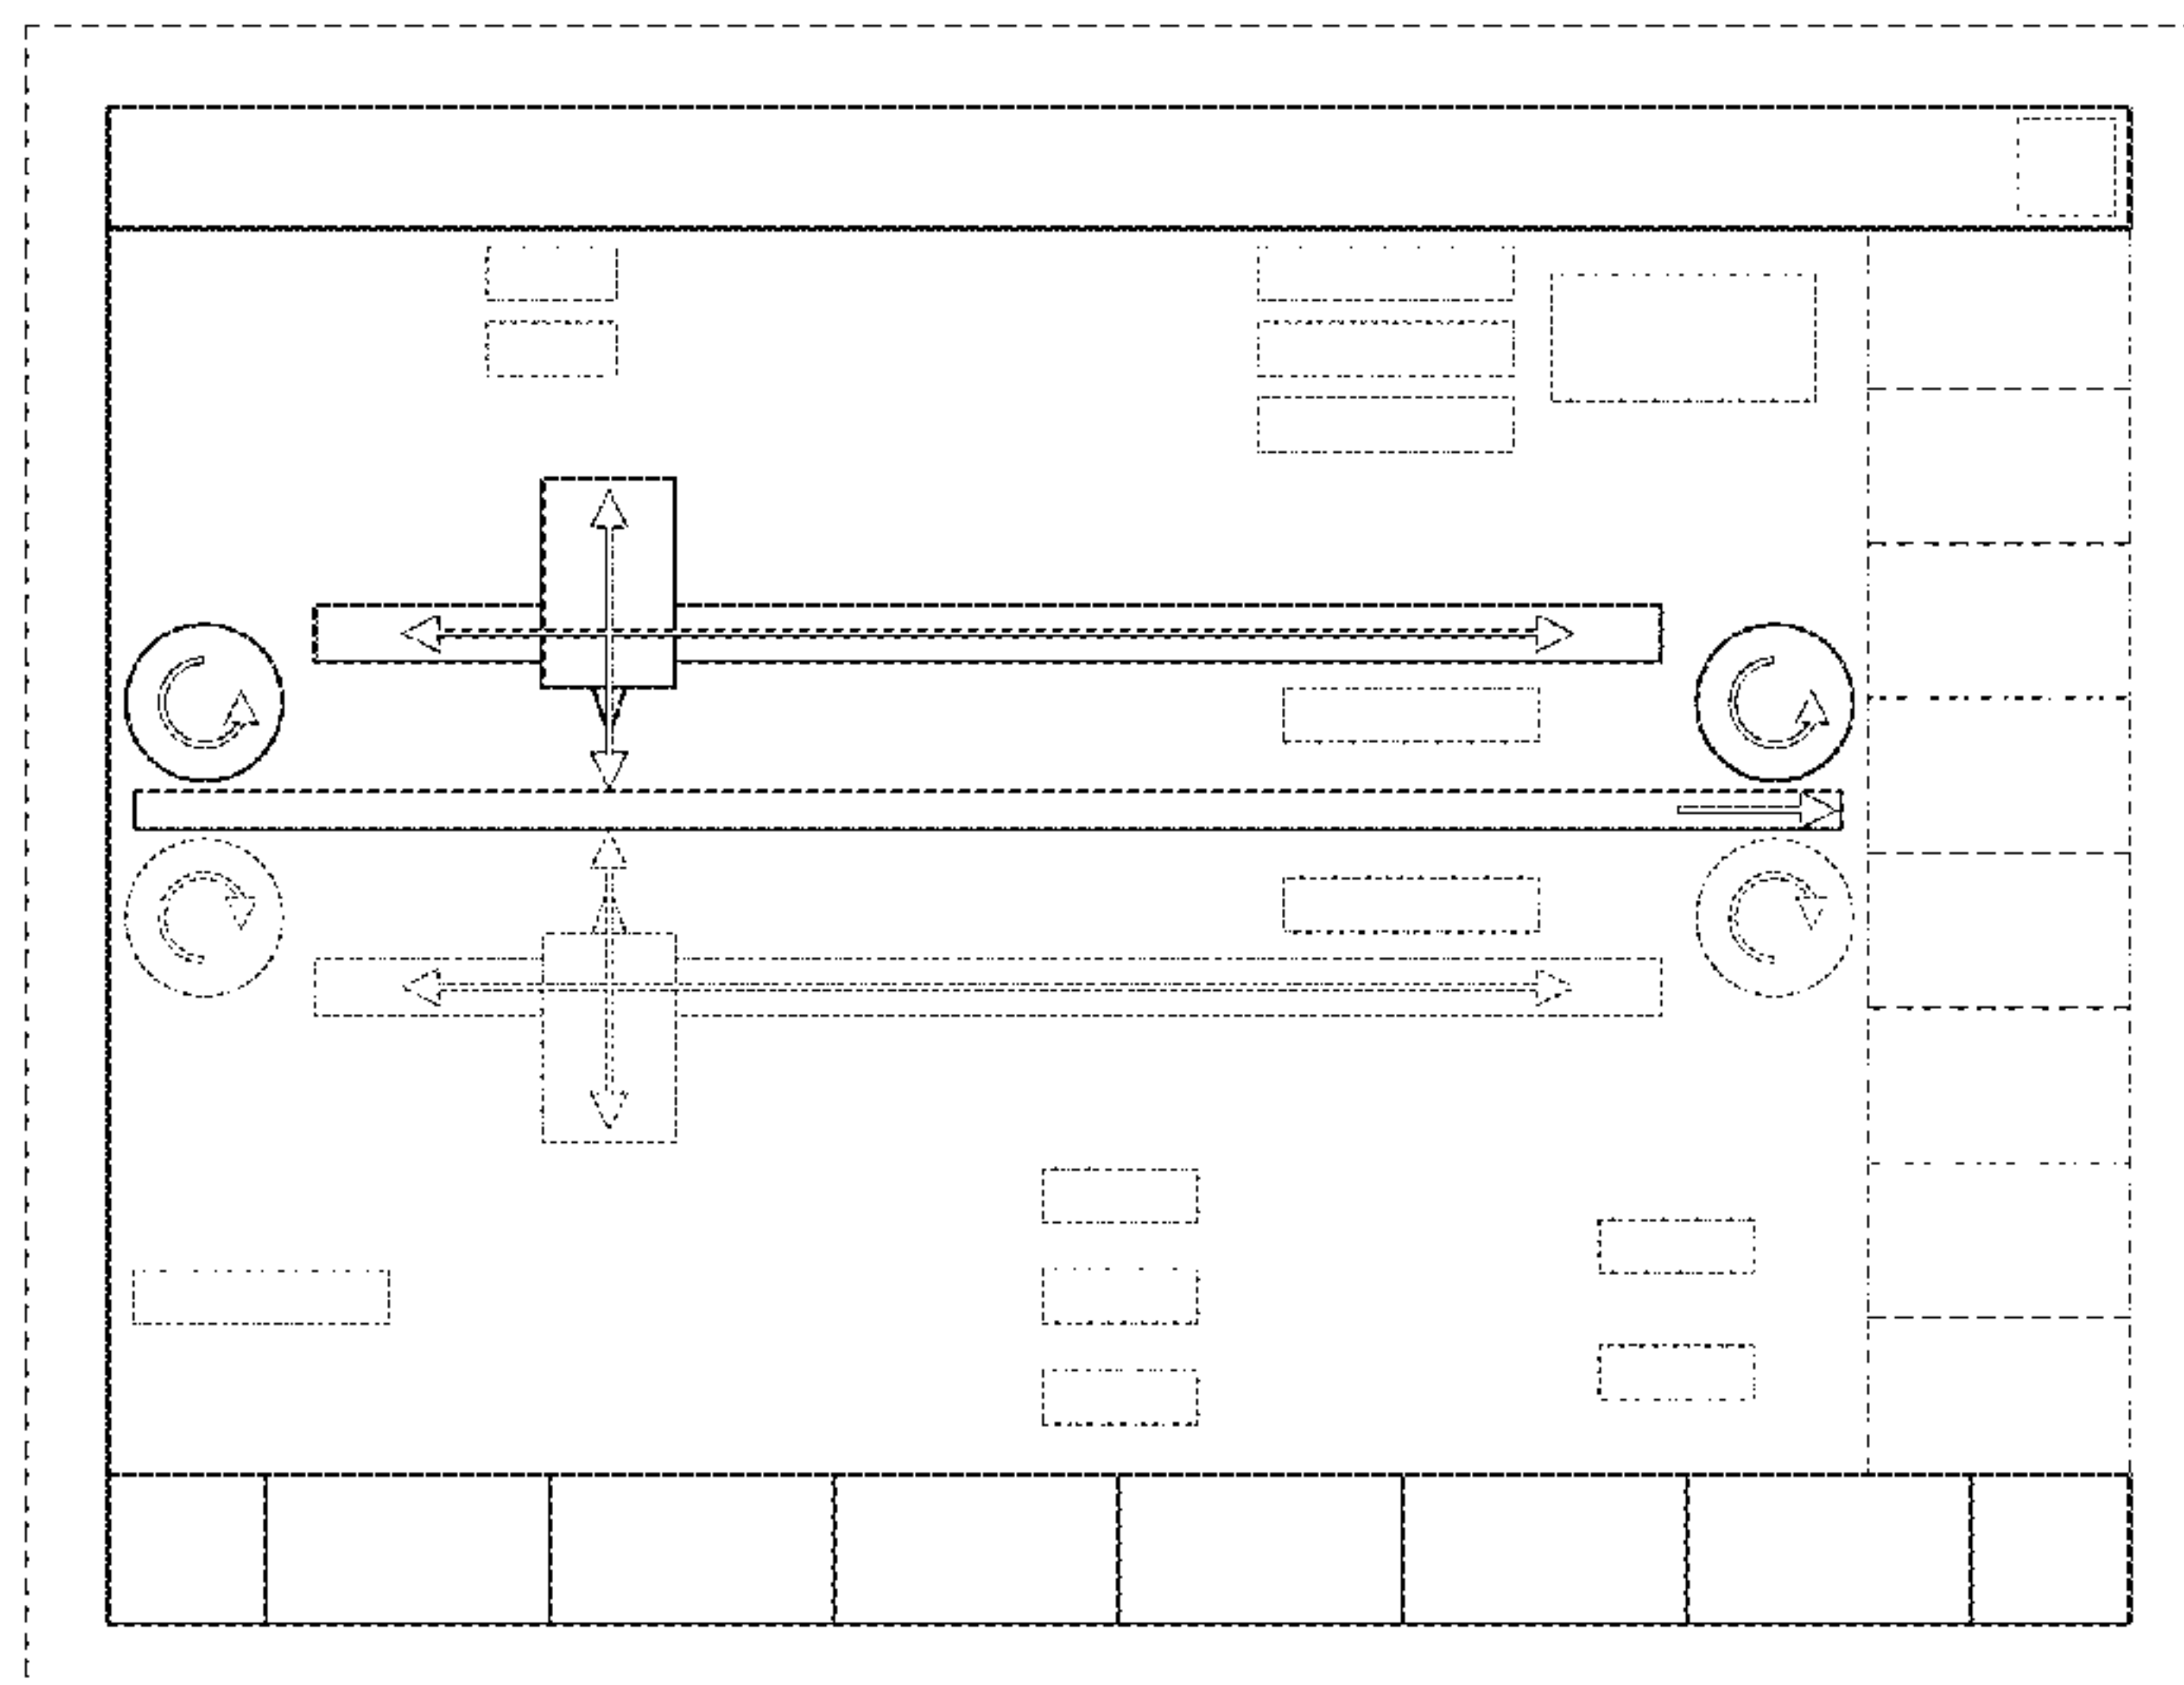

The ornamental design for a display screen with graphical user interface for controlling a processing machine, as shown and described.

DESCRIPTION

The FIGURE is a front view of a display screen with graphical user interface for controlling a processing machine, showing out new design.

The outermost broken line rectangle showing a display screen and all other broken lines illustrating portions of the graphical user interface are included for the purpose of illustrating portions of the article and form no part of the claimed design.
