(57) **CLAIM**

The ornamental design for a wide-brimmed hat, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of a design for a wide-brimmed hat according to the present invention.

FIG. 2 is a left side elevation view thereof.

FIG. 3 is a right side elevation view thereof.

FIG. 4 is a back elevation view thereof.

FIG. 5 is a top plan view thereof; and,

FIG. 6 is a bottom plan view thereof.

The evenly incremented dashed lines represent environmental structure only and form no part of the claimed design. The dash-and-dot style broken lines on the brim of the hat illustrate stitching that forms part of the claimed design.

In FIG. 6, the dash-and-dot style broken lines shown in the interior of the crown represent boundary lines. The area enclosed by the boundary lines, and the boundary lines themselves form no part of the claimed design.

Patterned shading shown on the hat crown is included in FIGS. 1-6 to show contrasting materials of the wide-brimmed hat, where repeating patterns of offset rows of rounded shapes shown in FIGS. 1-5 and dot stippling shown in FIGS. 2-5 each indicate contrast in material, namely material appearance, relative to each other.
