(57) **CLAIM**

The ornamental design for an orthopedic pillow having oblong central aperture, as shown and described.

DESCRIPTION

FIG. 1 is top or bottom plan view of an orthopedic pillow having oblong central aperture showing my new design; FIG. 2 is a side elevational view of the orthopedic pillow having oblong central aperture of FIG. 1, from a view point along an intersection of two planes of symmetry, one of which is a lateral axis of symmetry, the other passing between the opposed faces of the orthopedic pillow; FIG. 3 is a cross-sectional view of the orthopedic pillow having oblong central aperture of FIG. 1, taken through plane 3-3, which is the longitudinal plane of symmetry; and, FIG. 4 is a cross-sectional view of the orthopedic pillow having oblong central aperture of FIG. 1, taken through plane 4-4, which is the lateral plane of symmetry. The broken lines shown in FIG. 1 represent stitching on the orthopedic pillow having oblong central aperture and form no part of the claimed design.
