(57) **CLAIM**

The ornamental design for a display screen or portion thereof with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a first embodiment of the design.

FIG. 2 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the first embodiment.

FIG. 3 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the first embodiment.

FIG. 4 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a second embodiment of the design.

FIG. 5 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the second embodiment.

FIG. 6 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the second embodiment.

FIG. 7 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a third embodiment of the design.

FIG. 8 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the third embodiment.

FIG. 9 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the third embodiment.

FIG. 10 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a fourth embodiment of the design.

FIG. 11 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the fourth embodiment.

FIG. 12 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the fourth embodiment.

FIG. 13 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a fifth embodiment of the design.

FIG. 14 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the fifth embodiment.

FIG. 15 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the fifth embodiment.

(Continued)

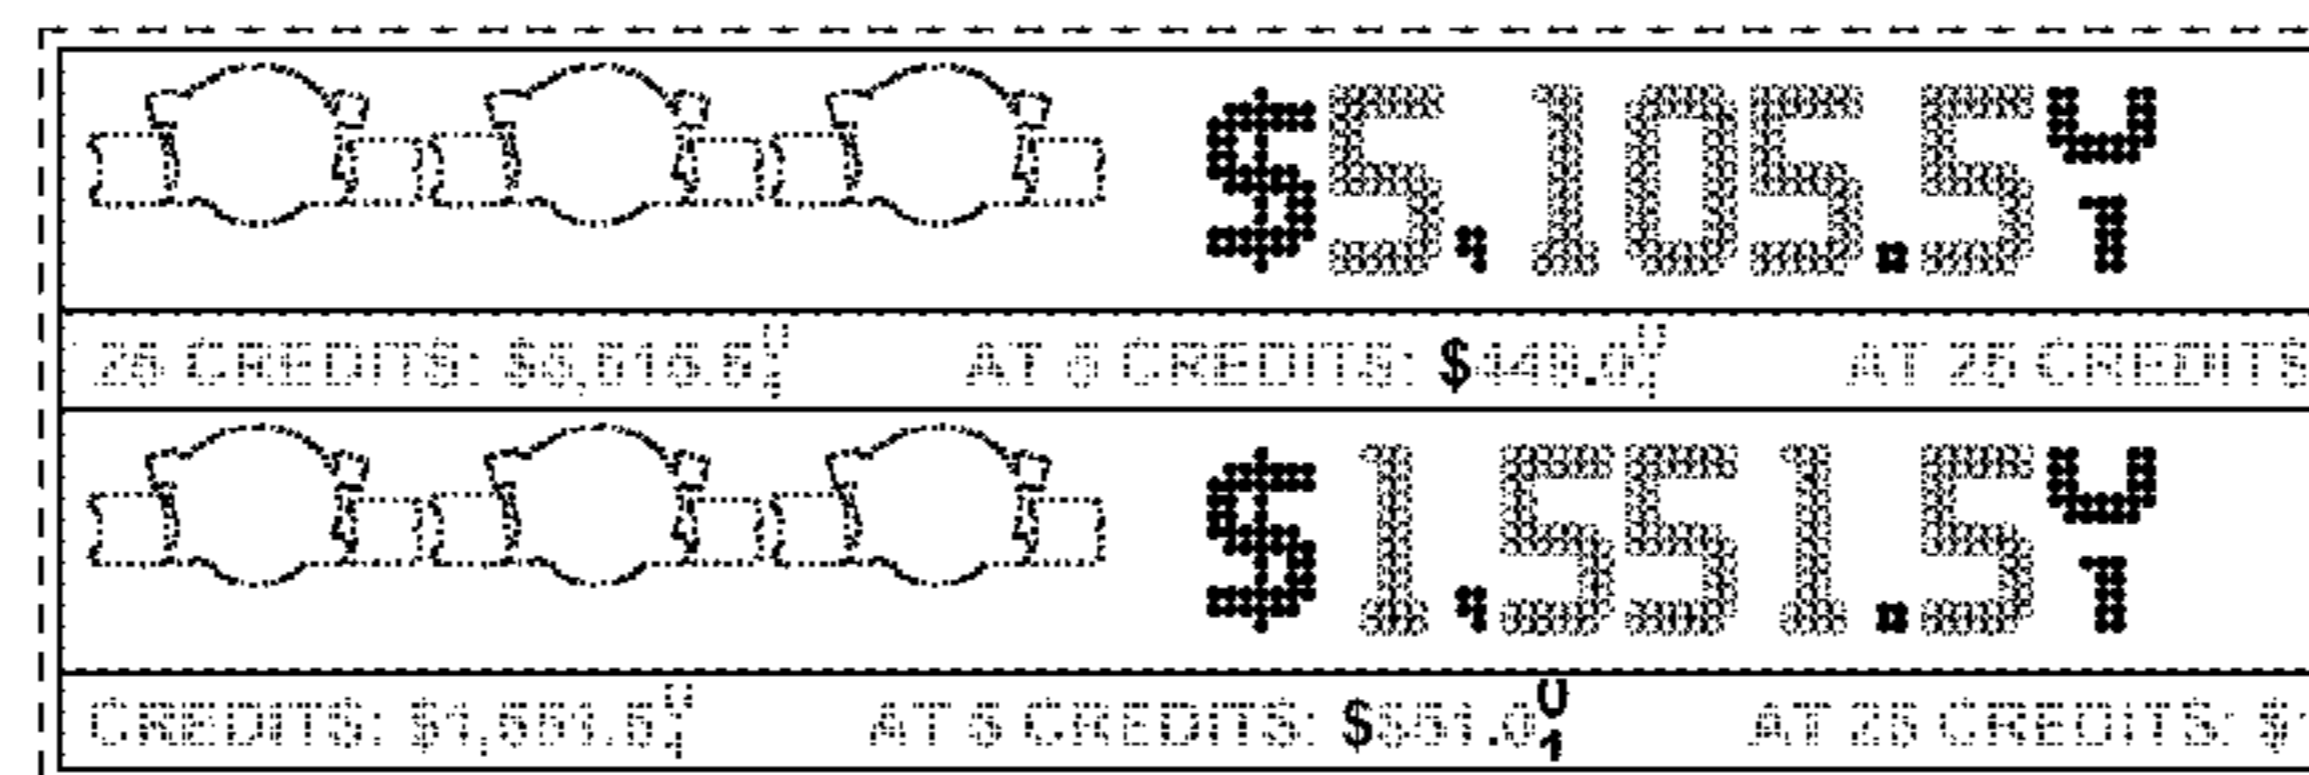

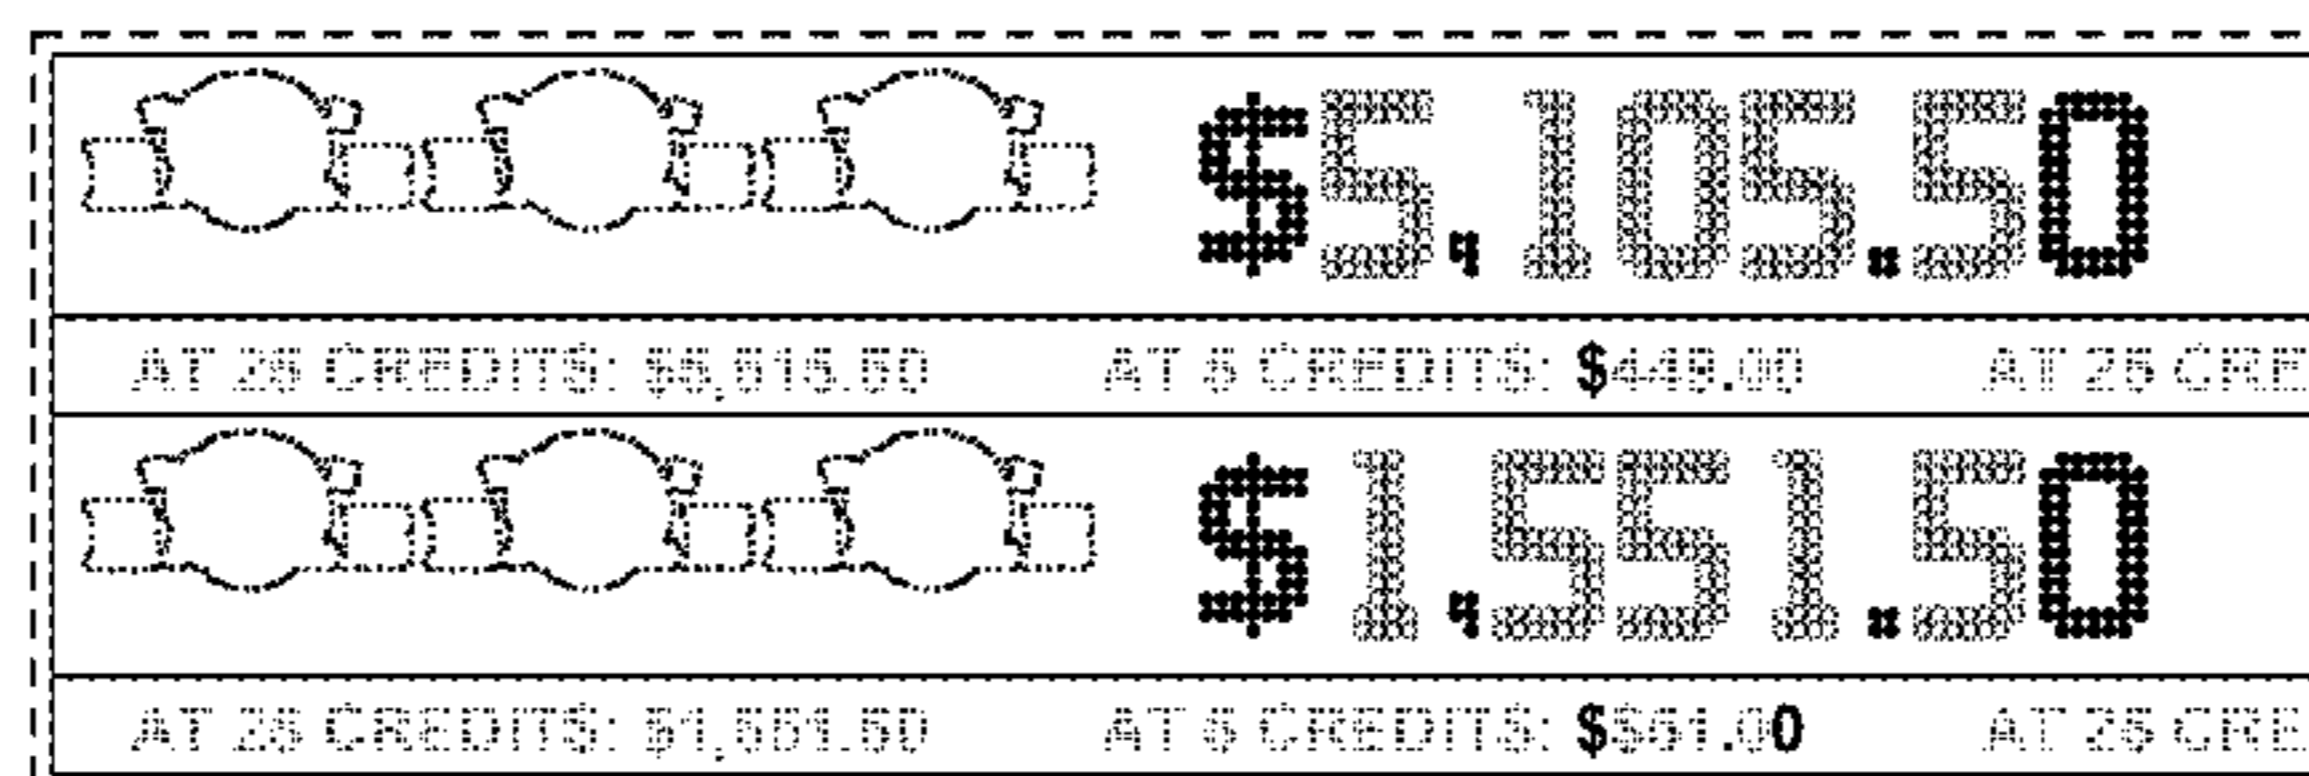

FIG. 16 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a sixth embodiment of the design.

FIG. 17 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the sixth embodiment.

FIG. 18 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the sixth embodiment.

FIG. 19 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a seventh embodiment of the design.

FIG. 20 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the seventh embodiment.

FIG. 21 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the seventh embodiment.

FIG. 22 is a front view of a display screen or portion thereof showing an image in an animated sequence according to an eighth embodiment of the design.

FIG. 23 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the eighth embodiment.

FIG. 24 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the eighth embodiment.

FIG. 25 is a front view of a display screen or portion thereof showing an image in an animated sequence according to a ninth embodiment of the design.

FIG. 26 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the ninth embodiment; and,

FIG. 27 is a front view of the display screen or portion thereof showing another image in the animated sequence according to the ninth embodiment.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design. The broken line at the periphery of each figure illustrates the display screen or a portion thereof and forms no part of the claimed design.

The broken line showing of alphanumeric characters and icons (illustrated with both short dashed lines and with a

white grid overlay) illustrate portions of the animated graphical user interface and form no part of the claimed design.
