(57) **CLAIM**

The ornamental design for a display screen with graphical  
user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen with graphical user  
interface according to our new design, the view showing a  
first image in a sequence of movement of the graphical user  
interface;

FIG. 2 is another view thereof showing a second image in  
the sequence of movement of the graphical user interface;

FIG. 3 is another view thereof showing a third image in the  
sequence of movement of the graphical user interface;

FIG. 4 is another view thereof showing a fourth image in the  
sequence of movement of the graphical user interface;

FIG. 5 is another view thereof showing a fifth image in the  
sequence of movement of the graphical user interface;

FIG. 6 is another view thereof showing a sixth image in the  
sequence of movement of the graphical user interface;

FIG. 7 is another view thereof showing a seventh image in  
the sequence of movement of the graphical user interface;

FIG. 8 is a front view of a display screen with graphical user  
interface according to another embodiment of our new  
design, the view showing a first image in a sequence of  
movement of the graphical user interface;

FIG. 9 is another view thereof showing a second image in  
the sequence of movement of the graphical user interface;

FIG. 10 is another view thereof showing a third image in the  
sequence of movement of the graphical user interface;

(Continued)

FIG. 11 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface; FIG. 12 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface; FIG. 13 is another view thereof showing a sixth image in the sequence of movement of the graphical user interface; and, FIG. 14 is another view thereof showing a seventh image in the sequence of movement of the graphical user interface. The dot-dash line representations of the display screen in the figures form no part of the claimed design. The dashed line representations of interface environment in the figures form no part of the claimed design. The outermost broken lines illustrate a display screen and form no part of the claimed design. The stippling illustrates a contrasting appearance. The remaining broken lines illustrate portions of the graphical user interface that form no part of the claimed design. The appearance of the embodiments of the graphical user interface sequentially transitions between the sets of images shown in FIGS. 1-7 and 8-14, respectively. The process or period in which one image transitions to another forms no part of the claimed design.
