FIG. 1 is a front view of a first image in a sequence for a display screen with animated graphical user interface for a healthcare command center computing system, according to the present invention; and, FIG. 2 is a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.

The outermost rectangular broken line showing the display screen and all other broken lines showing portions of the graphical user interface are included for the purpose of illustrating portions of the article and environmental structure and form no part of the claimed design. The diagonal hatching in FIG. 2 depicts a contrast in appearance.
