(57) **CLAIM**

The ornamental design for a display support, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a display support showing our new design; FIG. 2 is a front elevation view thereof; FIG. 3 is a left side elevation view thereof; FIG. 4 is a top plan view thereof; and, FIG. 5 is a bottom plan view thereof.

The right side view of the design is a mirror image of the left side view of FIG. 3. The rear view is omitted and forms no part of the claimed design. The dashed-dotted broken lines shown in the figures depict the bounds of the claim. The dashed broken lines depict portions of the display support. The broken lines form no part of the claimed design. The pairs of jagged break lines joined by braces which wrap around the vertical beam and the horizontal beams of the display support apparatus indicate that the appearance of any portion of the beams between the break lines forms no part of the claimed design. In the left side view of FIG. 3, the pair of jagged break lines and accompanying brace that is located on the visible horizontal beam in the remaining figures have been omitted from view for the purpose of not obscuring portions of the claim.

1 Claim, 4 Drawing Sheets
