(57) **CLAIM**

The ornamental design for a computer display screen portion with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a computer display screen portion with transitional graphical user interface showing a first image in a sequence of a first embodiment;
FIG. 2 is a front view of a computer display screen portion with transitional graphical user interface showing a second image in the sequence of the first embodiment;
FIG. 3 is a front view of a computer display screen portion with transitional graphical user interface showing a third image in the sequence of the first embodiment;
FIG. 4 is a front view of a computer display screen portion with transitional graphical user interface showing a first image in a sequence of a second embodiment;
FIG. 5 is a front view of a computer display screen portion with transitional graphical user interface showing a second image in the sequence of the second embodiment;
FIG. 6 is a front view of a computer display screen portion with transitional graphical user interface showing a third image in the sequence of the second embodiment;
FIG. 7 is a front view of a computer display screen portion with transitional graphical user interface showing a first image in a sequence of a third embodiment;
FIG. 8 is a front view of a computer display screen portion with transitional graphical user interface showing a second image in the sequence of the third embodiment;
FIG. 9 is a front view of a computer display screen portion with transitional graphical user interface showing a first image in a sequence of a fourth embodiment; and,
FIG. 10 is a front view of a computer display screen portion with transitional graphical user interface showing a second image in the sequence of the fourth embodiment.

The subject matter in this patent includes a process or period in which an image changes into another image. The process or period in which an image transitions to another image forms no part of the claimed design.
