The ornamental design for portion of display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the front view of the first image of the portion of display screen with animated graphical user interface, showing the new design; FIG. 2 is the second image thereof; FIG. 3 is the third image thereof; and FIG. 4 is the fourth image thereof. FIG. 5 is the front view of the first image of a second embodiment of the portion of display screen with animated graphical user interface; FIG. 6 is the second image thereof; FIG. 7 is the third image thereof; and, FIG. 8 is the fourth image thereof. The appearance of the first embodiment of the portion of display screen with animated graphical user interface transitions sequentially between the images shown in FIGS. 1-4.

The appearance of the second embodiment transitions sequentially between the images shown in FIGS. 5-8. The process or period in which one image transitions to another forms no part of the claimed invention. The broken line in each of FIGS. 1-8 represents the outer periphery of the portion of the display screen, and also the outer periphery of the claimed design. The broken line itself
