(57) **CLAIM**

The ornamental design for a digital camera display screen or portion thereof with transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. **1** is a front view of a first image in a sequence of a digital camera display screen or portion thereof with transitional graphical user interface, showing the new design;
FIG. **2** is an enlarged front view of the design shown in FIG. **1**, showing the first image in the sequence separately from the environment for clarity;
FIG. **3** is a front view of a second image thereof;
FIG. **4** is a front view of a first image in a sequence of a second embodiment of a digital camera display screen;
FIG. **5** is an enlarged front view of the design shown in FIG. **4**, showing the first image in the sequence of a second embodiment of a digital camera display screen;
FIG. **6** is a front view of a second image thereof;
FIG. **7** is a front view of a first image in a sequence of a third embodiment of a digital camera display screen;
FIG. **8** is an enlarged view of the design shown in FIG. **7**, showing the first image in the sequence of a third embodiment of a digital camera display screen; and,
FIG. **9** is a front view of a second image thereof.

The appearance of the image sequentially transitions between the images shown in FIGS. **2** and **3** in the first embodiment, in FIGS. **5** and **6** in the second embodiment, and in FIGS. **8** and **9** in the third embodiment. The process or period in which the first image of the embodiments transitions to the second image of the embodiments forms no part of the claimed design.

The broken line showing of the digital camera illustrates environmental structure and forms no part of the claimed design. The remaining broken lines, including all text, illustrate the display screen and portions of the graphical user interface that form no part of the claimed design.
