(57) **CLAIM**

The ornamental design for a network access point, as shown and describe.

DESCRIPTION

FIG. 1 is a perspective view of a network access point showing our design, with the network access point being in a first configuration in which a decorative insert of the network access point is seated within a corresponding recess of a main body of the network access point.

FIG. 2 is a top plan view of the network access point showing our design with the network access point being in the first configuration.

FIG. 3 is a bottom plan view of the network access point showing our design with the network access point being in the first configuration.

FIG. 4 is a back profile view of the network access point showing our design with the network access point being in the first configuration.

FIG. 5 is a front profile view of the network access point showing our design with the network access point being in the first configuration.

FIG. 6 is a right side profile view of the network access point showing our design with the network access point being in the first configuration.

FIG. 7 is a left side profile view of the network access point showing our design with the network access point being in the first configuration.

FIG. 8 is a perspective view of the network access point showing our design, with the network access point being in a second configuration in which the decorative insert of the network access point is not seated within the corresponding recess of the main body of the network access point.

FIG. 9 is a front profile view of the network access point showing our design with the network access point being in the second configuration.

FIG. 10 is a bottom plan view of the decorative insert of the network access point showing our design with the network access point being in the second configuration; and,

FIG. 11 is a top plan view of the main body of the network access point showing our design with the network access point being in the second configuration.

(Continued)

The details shown in broken lines illustrate features that form no part of the claimed design. The claim is directed to the design shown in solid line, and all unshaded surfaces shown between the broken lines and solid lines form no part of the claimed design.

1 Claim, 7 Drawing Sheets
