The ornamental design for a display screen with graphical user interface or portion thereof, as shown and described.

#### DESCRIPTION

The present application is related to U.S. Design patent application Ser. No. 29/488,692, and to U.S. Design patent application Ser. No. 29/488,683, the entire disclosures of which are incorporated herein by reference.

FIG. 1 is a front view of an image of a display screen with graphical user interface or portion thereof according to a first embodiment;

FIG. 2 is a front view of a second image of the first embodiment;

FIG. 3 is a front view of a third image of the first embodiment;

FIG. 4 is a front view of a fourth image of the first embodiment;

FIG. 5 is a front view of a fifth image of the first embodiment;

FIG. 6 is a front view of an image of a display screen with graphical user interface or portion thereof according to a second embodiment;

FIG. 7 is a front view of a second image of the second embodiment;

FIG. 8 is a front view of a third image of the second embodiment;

FIG. 9 is a front view of a fourth image of the second embodiment; and,

FIG. 10 is a front view of a fifth image of the second embodiment.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-5 for the first embodiment and FIGS. 6-10 for the second embodiment. The process or period in which one image transitions to another image forms no part of the claimed design. The outermost broken line rectangle showing of the display screen, and all other broken lines showing portions of the graphical user interface are included for the purpose of illustrating portions of the article and form no part of the claimed design.

Areas of the design shown with a stipple fill illustrate a contrast in visual appearance.
