(57) **CLAIM**

The ornamental design for a kit for a liquid collection tank,
as shown and described.

DESCRIPTION

FIG. 1 is a perspective view from the top and front of a kit
for a liquid collection tank, comprising an upper tank portion
and a lower tank portion in an assembled condition, showing
the design.

FIG. 2 is a perspective view from the bottom and one side
of the kit for a liquid collection tank in the assembled
condition, showing the design.

FIG. 3 is a top plan view of the kit for a liquid collection tank
in the assembled condition, showing the design.

FIG. 4 is a bottom plan view of the kit for a liquid collection
tank in the assembled condition, showing the design.

FIG. 5 is a front elevational view of the kit for a liquid
collection tank in the assembled condition, showing the
design.

FIG. 6 is a side elevational view of the kit for a liquid
collection tank in the assembled condition, showing the
design.

FIG. 7 is a perspective view from the top and front of the
lower tank portion of the kit, showing the design.

FIG. 8 is a perspective view from the bottom and one side
of the lower tank portion of the kit, showing the design.

FIG. 9 is a top plan view of the lower tank portion, showing
the design.

FIG. 10 is a bottom plan view of the lower tank portion,
showing the design.

FIG. 11 is a front elevational view of the lower tank portion,
showing the design.

FIG. 12 is a side elevational view of the lower tank portion,
showing the design.

FIG. 13 is a perspective view from the top and front of the
upper tank portion, showing the design.

FIG. 14 is a perspective view from the bottom and one side
of the upper tank portion, showing the design.

FIG. 15 is a top plan view of the upper tank portion, showing
the design.

FIG. 16 is a bottom plan view of the upper tank portion,
showing the design.

FIG. 17 is a front elevational view of the upper tank portion,
showing the design; and,

FIG. 18 is a side elevational view of the upper tank portion,
showing the design.

The kit for a liquid collection tank and each of the upper and
lower tank portions are symmetrical about a vertical plane
through a diameter thereof, and thus views from the rear and
the opposite side to that illustrated in the forgoing figures are
not shown herein.
