(57) **CLAIM**

The ornamental design for a closeable container, as shown and described.

**DESCRIPTION**

FIG. 1 is a front right perspective view of a closeable container showing a new design, the front left perspective view being a mirror image;

FIG. 2 is a front elevation view thereof;  
FIG. 3 is a rear elevation view thereof;  
FIG. 4 is a left side elevation view thereof, the right side being a mirror image;  
FIG. 5 is a top plan view thereof;  
FIG. 6 is a bottom plan view thereof;  
FIG. 7 is a front right perspective view of the closeable container of FIG. 1 in a partially opened configuration, the front left perspective view being a mirror image;  
FIG. 8 is a plan view, showing the closeable container of FIG. 1 in a blank configuration;  
FIG. 9 is a front right perspective view of the closeable container of FIG. 1 showing an alternate embodiment thereof, the front left perspective view being a mirror image;  
FIG. 10 is a left side elevation view thereof, the right side being a mirror image;  
FIG. 11 is a front right perspective view of the closeable container of FIG. 9 in a partially opened configuration, the front left perspective view being a mirror image;  
FIG. 12 is a plan view, showing the closeable container of FIG. 9 in a blank configuration;  
FIG. 13 is a front right perspective view of the closeable container of FIG. 1 showing an alternate embodiment thereof having a perforated window cover, the front left perspective view being a mirror image;  
FIG. 14 is a front elevation view thereof;  
FIG. 15 is a rear elevation view thereof;  
FIG. 16 is a left side elevation view thereof, the right side being a mirror image;  
FIG. 17 is a top plan view thereof;  
FIG. 18 is a bottom plan view thereof;  
FIG. 19 is a front right perspective view of the closeable container of FIG. 13 in a partially opened configuration, the front left perspective view being a mirror image;  
FIG. 20 is a plan view, showing the closeable container of FIG. 13 in a blank configuration;  
FIG. 21 is a front right perspective view of the closeable container of FIG. 13 in a partially open configuration showing an alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
FIG. 22 is a top view thereof in a closed configuration;

(Continued)

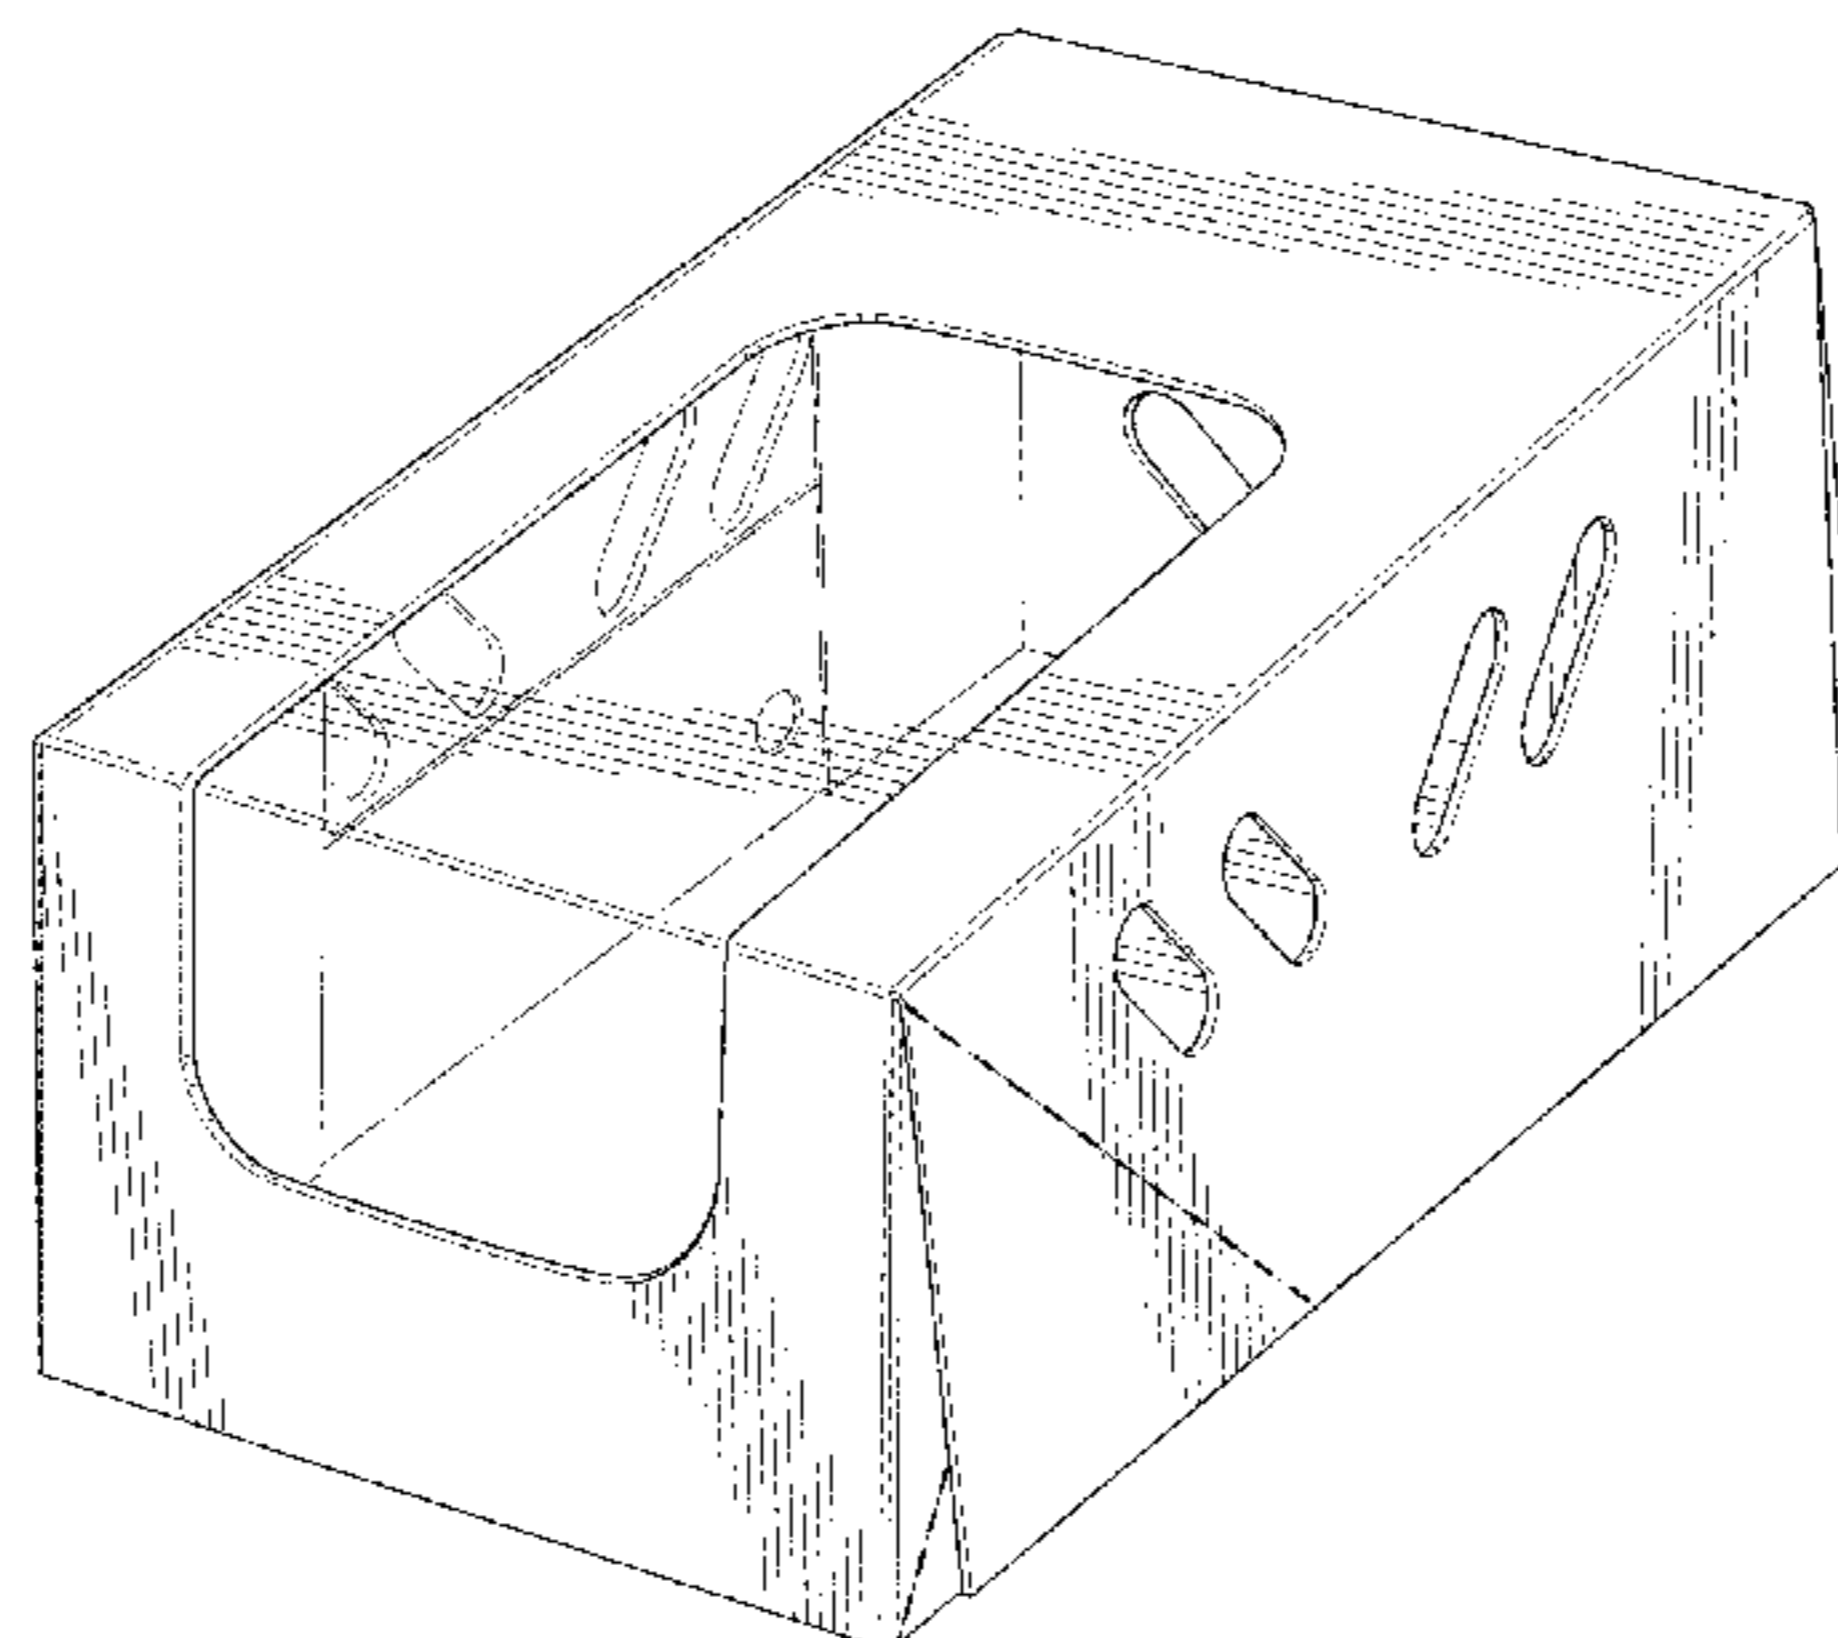

FIG. 23 is a top view thereof in a fully opened configuration;  
 FIG. 24 is a right side elevation view thereof in a fully opened configuration, the left side being a mirror image;  
 FIG. 25 is a rear right perspective view thereof in a partially opened configuration, the rear left perspective view being a mirror image;  
 FIG. 26 is a front right perspective view of the closeable container of FIG. 13 in a partially open configuration showing another alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
 FIG. 27 is a top view thereof in a closed configuration;  
 FIG. 28 is a top view thereof in a fully opened configuration;  
 FIG. 29 is a right side elevation view thereof in a fully opened configuration, the left side being a mirror image;  
 FIG. 30 is a rear right perspective view thereof in a partially opened configuration, the rear left perspective view being a mirror image;  
 FIG. 31 is a front right perspective view of the closeable container of FIG. 13 in a partially open configuration showing yet another alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
 FIG. 32 is a top view thereof in a closed configuration;  
 FIG. 33 is a top view thereof in a fully opened configuration;  
 FIG. 34 is a rear right perspective view thereof in a partially opened configuration, the rear left perspective view being a mirror image;  
 FIG. 35 is a front right perspective view of the closeable container of FIG. 9 showing an alternate embodiment thereof having a perforated window cover, the front left perspective view being a mirror image;  
 FIG. 36 is a left side elevation view thereof, the right side being a mirror image;  
 FIG. 37 is a front right perspective view of the closeable container of FIG. 35 in a partially opened configuration, the front left perspective view being a mirror image;  
 FIG. 38 is a plan view, showing the closeable container of FIG. 35 in a blank configuration;  
 FIG. 39 is a front right perspective view of the closeable container of FIG. 35 in a partially open configuration

showing an alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
 FIG. 40 is a top view thereof in a closed configuration;  
 FIG. 41 is a top view thereof in a fully opened configuration;  
 FIG. 42 is a front right perspective view of the closeable container of FIG. 35 in a partially open configuration showing another alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
 FIG. 43 is a top view thereof in a closed configuration;  
 FIG. 44 is a top view thereof in a fully opened configuration;  
 FIG. 45 is a front right perspective view of the closeable container of FIG. 35 in a partially open configuration showing yet another alternate configuration with the perforated window cover removed and inserted as a divider in the interior of the carton, the front left perspective view being a mirror image;  
 FIG. 46 is a top view thereof in a closed configuration; and,  
 FIG. 47 is a top view thereof in a fully opened configuration.
