(57) **CLAIM**

The ornamental design for a connection device for mounting electrical equipment, as shown and described.

DESCRIPTION

FIG. 1 illustrates a perspective view of a connecting device for mounting electrical equipment according to the disclosed embodiment.

FIG. 2 illustrates a front view of the connecting device for mounting electrical equipment.

FIG. 3 illustrates a rear view of the connecting device for mounting electrical equipment.

FIG. 4 illustrates a right side view of the connecting device for mounting electrical equipment.

FIG. 5 illustrates a left side view of the connecting device for mounting electrical equipment.

FIG. 6 illustrates a top view of the connecting device for mounting electrical equipment.

FIG. 7 illustrates a bottom view of the connecting device for mounting electrical equipment.

FIG. 8 illustrates a perspective view of a connecting device for mounting electrical equipment according to another disclosed embodiment.

FIG. 9 illustrates a front view of the connecting device for mounting electrical equipment.

FIG. 10 illustrates a rear view of the connecting device for mounting electrical equipment.

FIG. 11 illustrates a right side view of the connecting device for mounting electrical equipment.

FIG. 12 illustrates a left side view of the connecting device for mounting electrical equipment.

FIG. 13 illustrates a top view of the connecting device for mounting electrical equipment; and,

FIG. 14 illustrates a bottom view of the connecting device for mounting electrical equipment.

The broken lines in the drawings show portions of the connecting device for mounting electrical equipment that form no part of the claimed design.

1 Claim, 14 Drawing Sheets
