(57) **CLAIM**

The ornamental design for a computer display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a computer display screen with transitional graphical user interface showing a first image in a sequence according to the claimed design; and, FIG. 2 is a front view showing a second image thereof.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The longer broken-lines showing of a portion of a computer and the intermediate-length broken-lines showing a perimeter of a display screen of the computer, as well as the features within the interface shown in broken-lines, are included for the purpose of illustrating environmental structure and form no part of the claimed design.
