(57) **CLAIM**

The ornamental design for a portion of a display panel with an animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a portion of a display panel, showing a first image of our animated graphical user interface.

FIG. 2 is a front view of the portion of the display panel, showing a second image of our animated graphical user interface.

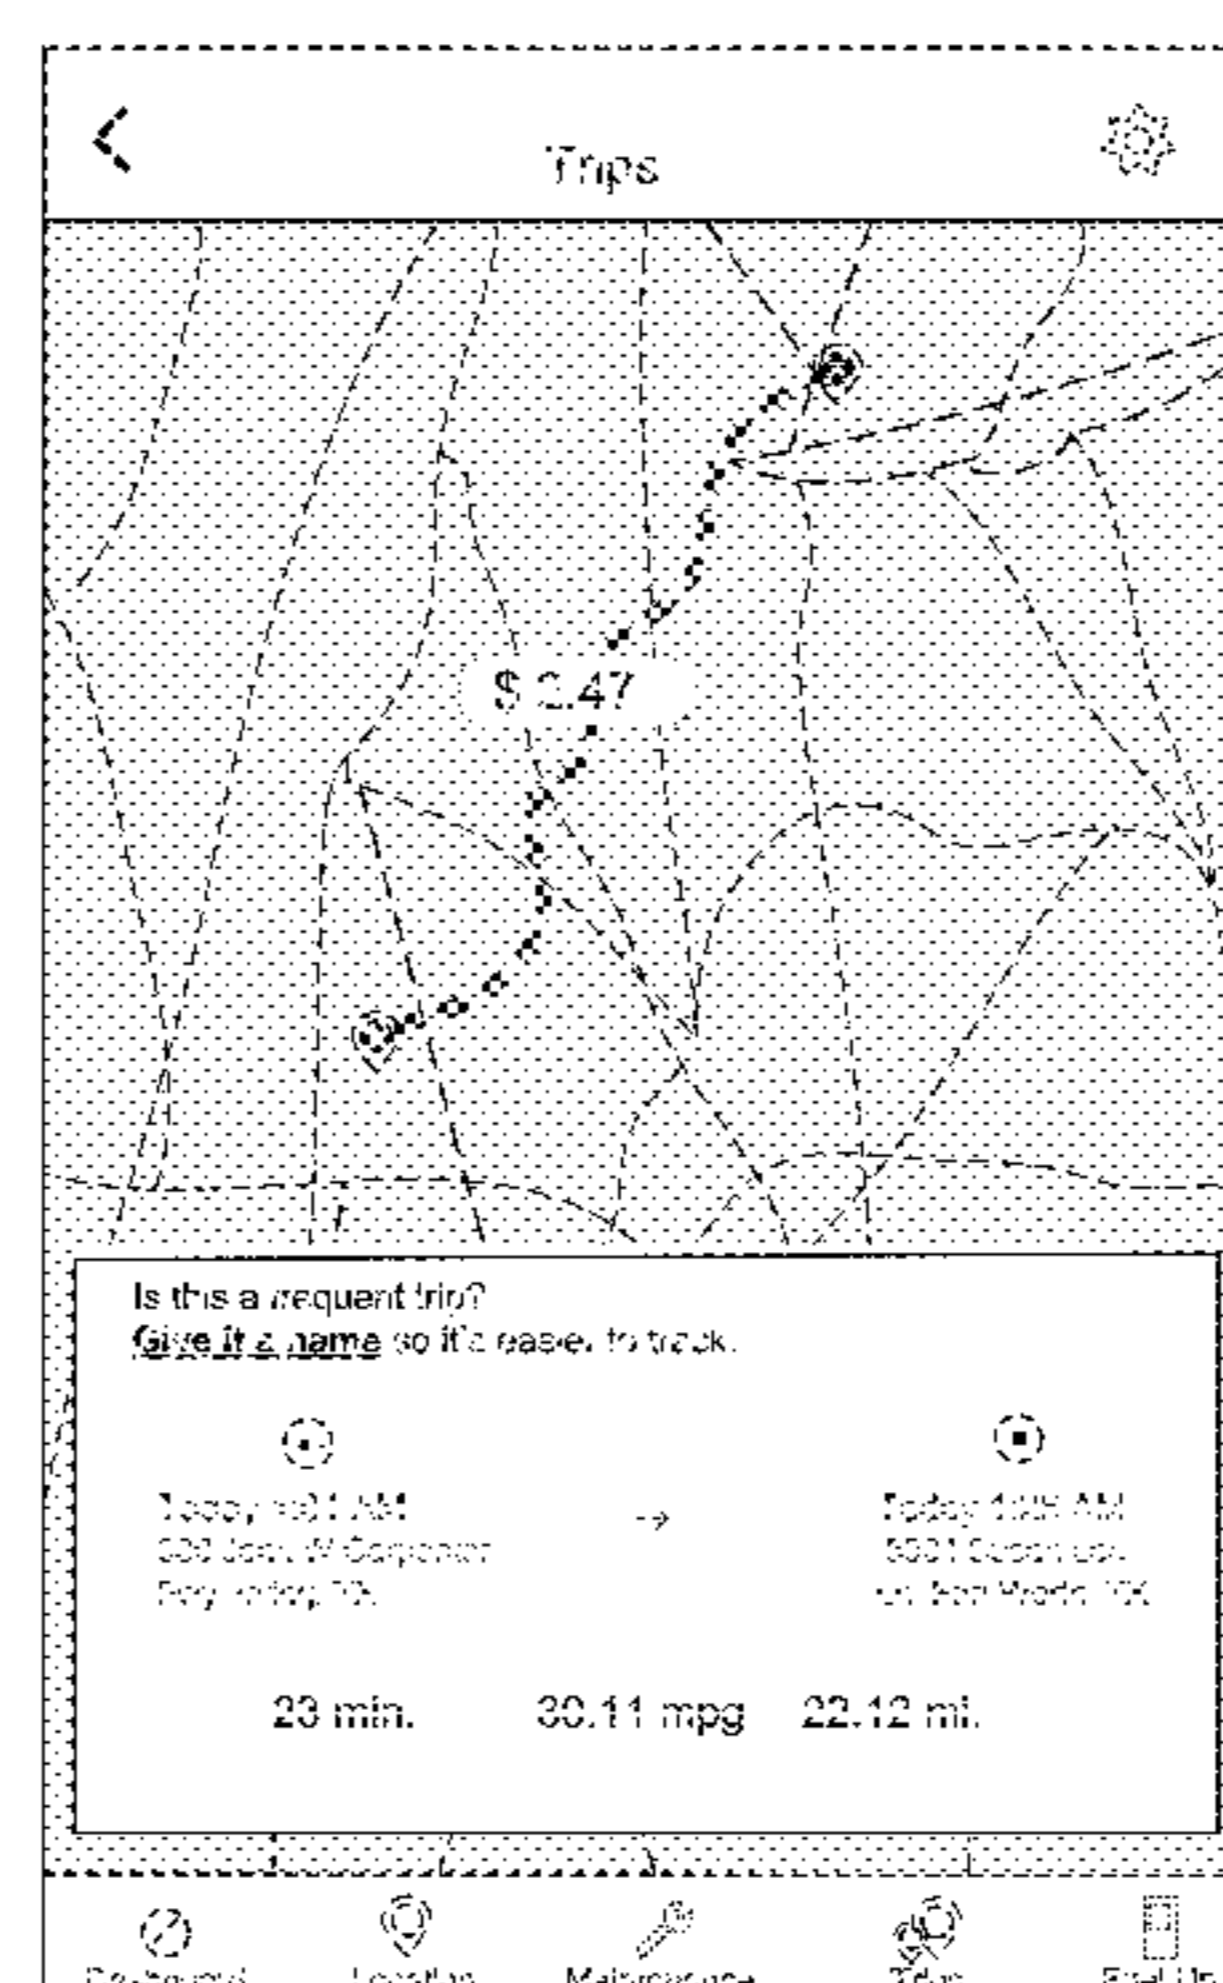

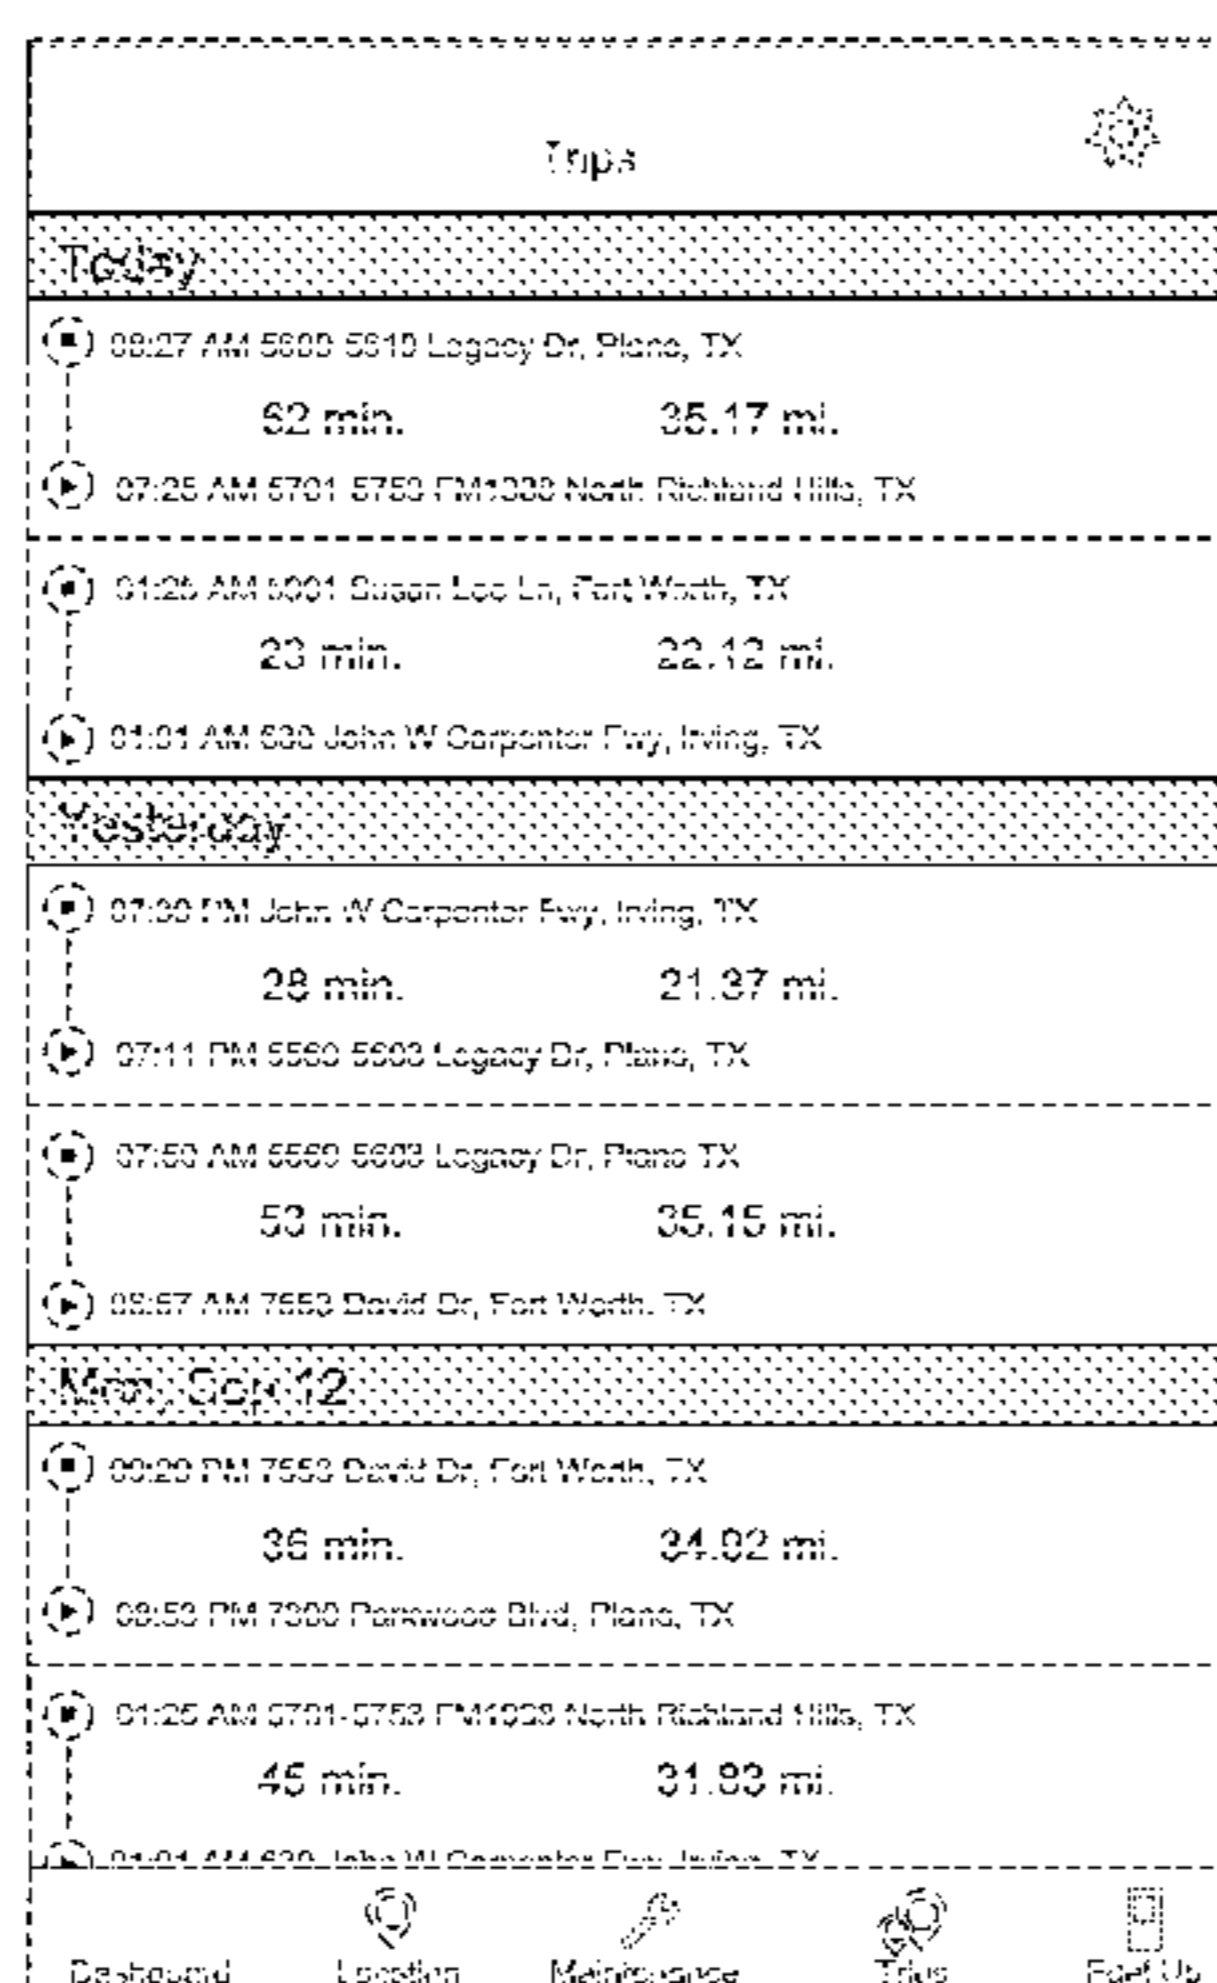

FIG. 3 is a front view of the portion of the display panel, showing a third image of our animated graphical user interface; and,

FIG. 4 is a front view of the portion of the display panel, showing a fourth image of our animated graphical user interface.

The subject matter in this patent includes a process or period in which an image changes into another image. The process or period in which the images transition forms no part of the claimed design.

The broken line bordering each figure illustrates the display panel portion (such as of a mobile device, or an outline of an entire screen of a mobile device) and forms no part of the claimed design. The broken lines within each figure illustrate graphical environmental features that form no part of the claimed design. The outer edge of the portion of the display panel is understood to be congruent with the outer edge of the graphical user interface.
