(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for closed-loop medication delivery, as shown and described.

DESCRIPTION

This application is a continuation-in-part of U.S. patent application Ser. No. 29/607,911, filed Jun. 16, 2017, pending, the disclosure of which is hereby incorporated herein in its entirety by this reference.

FIG. **1** is a front view of a display screen with graphical user interface for closed-loop medication delivery, showing the new design;

FIG. **2** shows the design in the context of different broken line subject matter;

FIG. **3** shows the design in the context of different broken line subject matter; and,

FIG. **4** shows the design in the context of different broken line subject matter.

The broken line showing of the device illustrates environmental subject matter, and the display screen, and portions of the graphical user interface are included for the purpose of illustrating portions of the article and form no part of the claimed design.

1 Claim, 4 Drawing Sheets
