(57) **CLAIM**

We claim the ornamental design for a dual way magazine loader, as shown and described.

**DESCRIPTION**

FIG. 1 is a front, right side, top perspective view of a dual way magazine loader showing our new design; and, FIG. 2 is a rear, left side, top perspective view thereof. The bottom of the dual way magazine loader is not shown in the drawing and forms no part of the claimed design. Broken lines shown in the drawings illustrate structure or features which form no part of the claimed design. We understand that the embodiments of our inventions includes features and components illustrated by the drawings herein and shown in the applications incorporated by reference, in all permutations and combinations of such components and features. In other words, we understand embodiments our inventions include the discrete components illustrated by the drawings herein and the applications incorporated by reference, with or without specific features in the various drawings claimed. We understand embodiments of our inventions includes different combinations of such discrete components as illustrated by the drawings herein and in the applications incorporated by reference. Whereby we reserve the right and contemplate making solid lines dashed for any specific feature or component, part, or portion in the various embodiments illustrated herein and in the drawings of the applications incorporated by reference herein as we have contemplated such as being embodiments of our invention, and we reserve the right and contemplate making dashed lines solid for any specific feature or component, part, or portion.
