(57) **CLAIM**

The ornamental design for a liquid container, substantially
as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a liquid container of my new
design. The container includes a lid illustrated in a closed
position. Stippling illustrates a lower bottom portion of the
container having a color different from the color of the body
of the container. Dashed lines illustrate a logo on the liquid
container, grip knurls on a cap for a pouring spout on the lid,
and a handle grip and form no part of the claimed design.

FIG. 2 is a front view of the liquid container.

FIG. 3 is a right side view of the liquid container.

FIG. 4 is a rear view of the liquid container.

FIG. 5 is a left side view of the liquid container.

FIG. 6 is a bottom view looking upward on the liquid
container; and,

FIG. 7 is a top view looking downward on the liquid
container.

The surface shading and contour lines in the drawings is a
drawing convention to represent character and contour; it
does not illustrate material, surface ornamentations, or sur-
face decoration and forms no part of the claimed design.

The dashed broken lines in the drawings are for environ-
mental structure and form no part of the claimed design.

In some embodiments my design also includes the image of
the logo.

1 Claim, 3 Drawing Sheets
