(57) **CLAIM**

The ornamental design for a portion of display screen with animated graphical user interface, as shown and described.

DESCRIPTION

This design patent application incorporates by reference U.S. Design application Ser. No. 29/515,009, any material of which is not present in this application forms no part of the claimed design.

FIG. 1 is a front view of a first image for a display screen portion with animated graphical user interface according to a first embodiment;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof;

FIG. 4 is a fourth image thereof;

FIG. 5 is a fifth image thereof;

FIG. 6 is a front view of a first image for a display screen portion with animated graphical user interface according to a second embodiment;

FIG. 7 is a second image thereof;

FIG. 8 is a third image thereof;

FIG. 9 is a fourth image thereof; and,

FIG. 10 is a fifth image thereof.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-5 and FIGS. 6-10. The process or period in which one image transitions to another forms no part of the claimed design.

The diagonal line pattern illustrates a contrasting appearance.

The broken line in each of FIGS. 1-10 represents the outer periphery of the portion of the display screen, and also the outer periphery of the claimed design. The broken line itself forms no part of the claimed design.
