#### (57) CLAIM

The ornamental design for a display screen with transitional graphical user interface for a medical image data processing application, as shown and described.

#### DESCRIPTION

A portion of the disclosure of this patent document contains material to which a claim for copyright is made. The copyright owner has no objection to the reproduction of the patent document or the patent disclosure, as it appears in the U.S. Patent Office records, but reserves all other copyright rights whatsoever.

FIG. 1 is a front view of a first image of a display screen with transitional graphical user interface for a medical image data processing application;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a first image of a second embodiment thereof; and,

FIG. 4 is a front view of a second image of the second embodiment.

The broken lines of the display screen and the other broken lines in the drawings form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 2, and between the images shown in FIGS. 3 and 4. The process or period in which one image transitions to another, form no part of the claimed design.
