(57) **CLAIM**

The ornamental design for a portion of a display panel with a graphical user interface component for flight operations management, as shown and described.

**DESCRIPTION**

The FIGURE is a front view of a portion of a display panel with a graphical user interface component for flight operations management according to the new design. The broken lines including the showing of a portion of a display panel of a computing device, such as a smartphone, tablet, laptop, desktop, wearable computing device, or other computing device, surrounding the illustrated graphical user interfaces are included for the purpose of illustrating environmental structure and form no part of the claimed design. The broken lines forming part of the graphical user interface are included for illustrating environmental aspects of a graphical user interface and form no part of the claimed design.
