(57) **CLAIM**

The ornamental design for a vessel for a candle, as shown and described.

DESCRIPTION

This application is related to three other U.S. design patent applications, each of them filed on the same date herewith, all of them also titled “Vessel for a Candle.” These three applications have been assigned application Ser. Nos. 29/585,304, 29/585,305, and 29/585,310, respectively.

FIG. 1 is a perspective view of a vessel for a candle, illustrating our new design;

FIG. 2 is a side elevational view of the vessel of FIG. 1, each side being identical to the others, save for potential variations in wood grain;

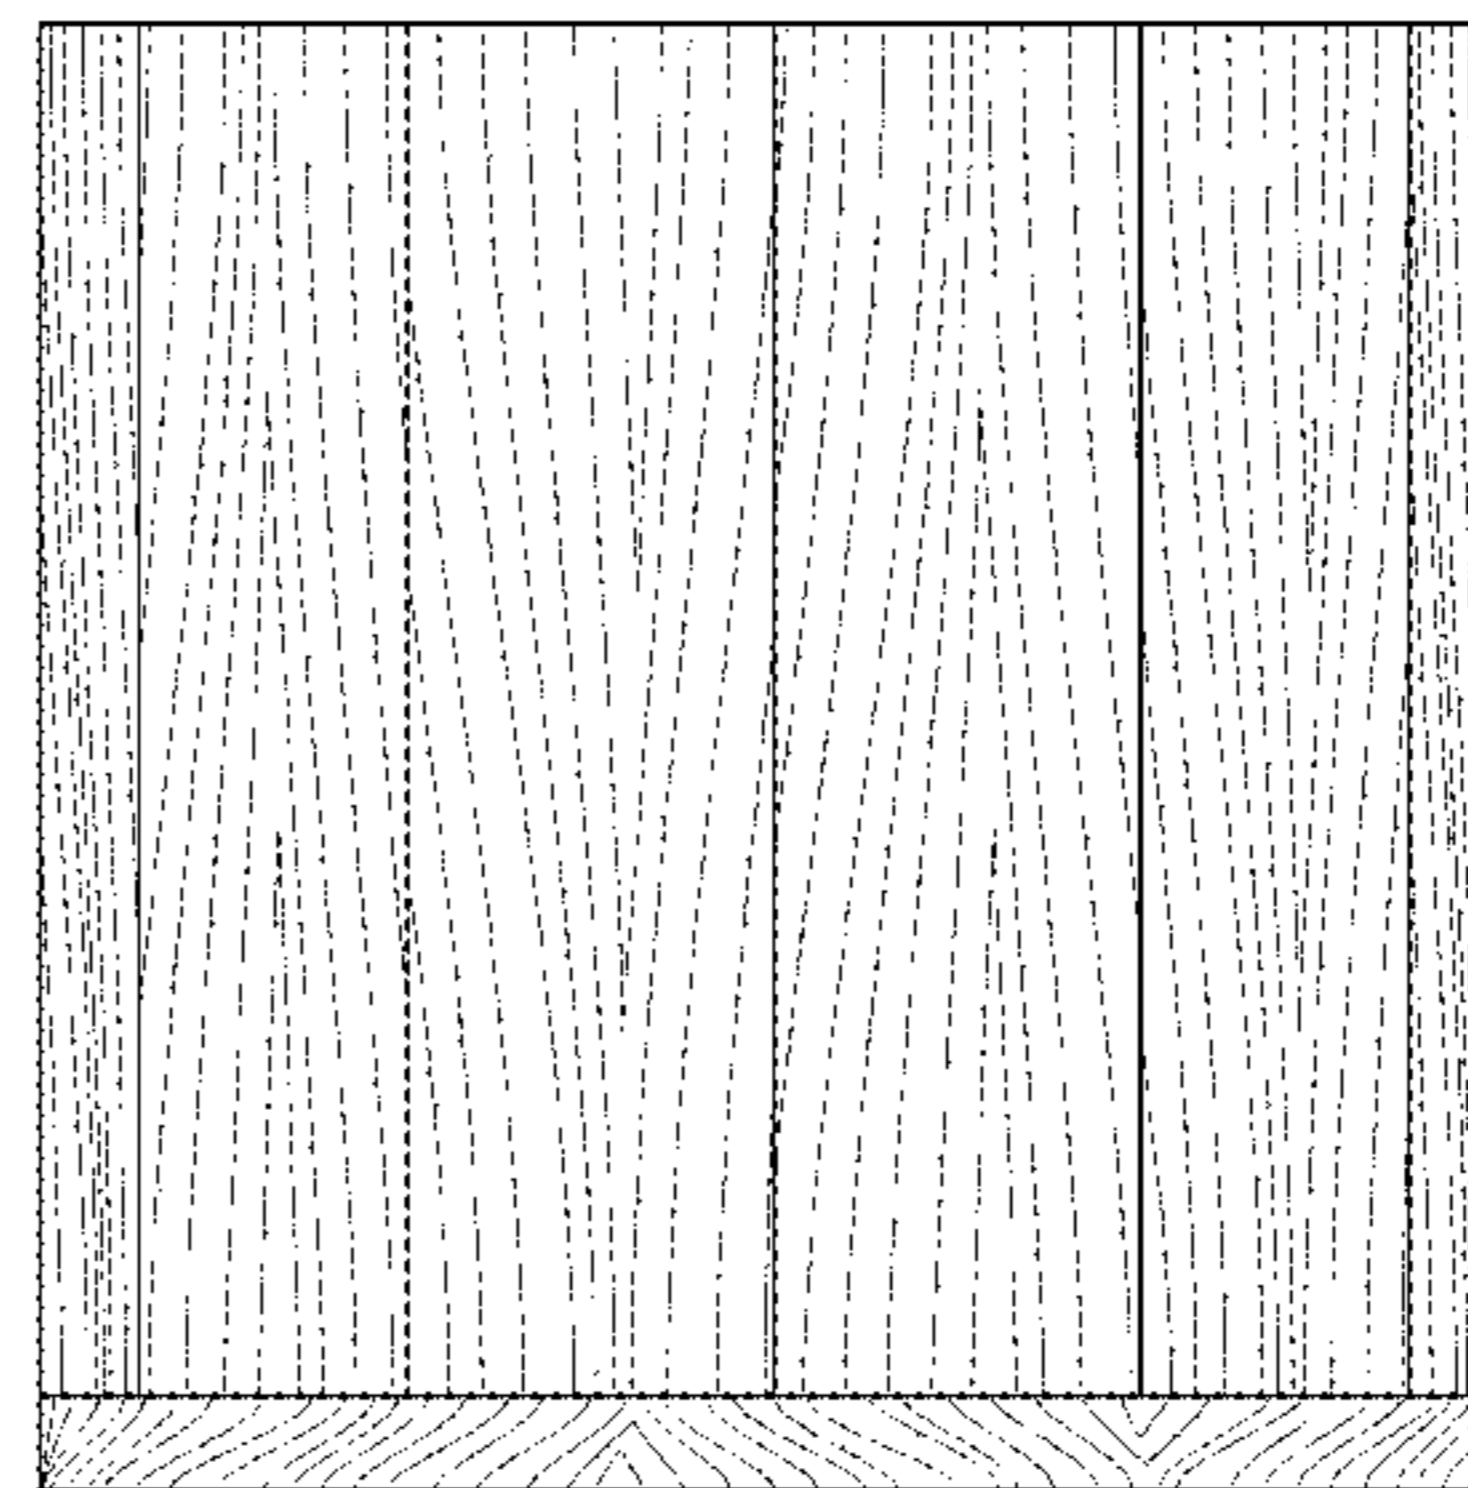

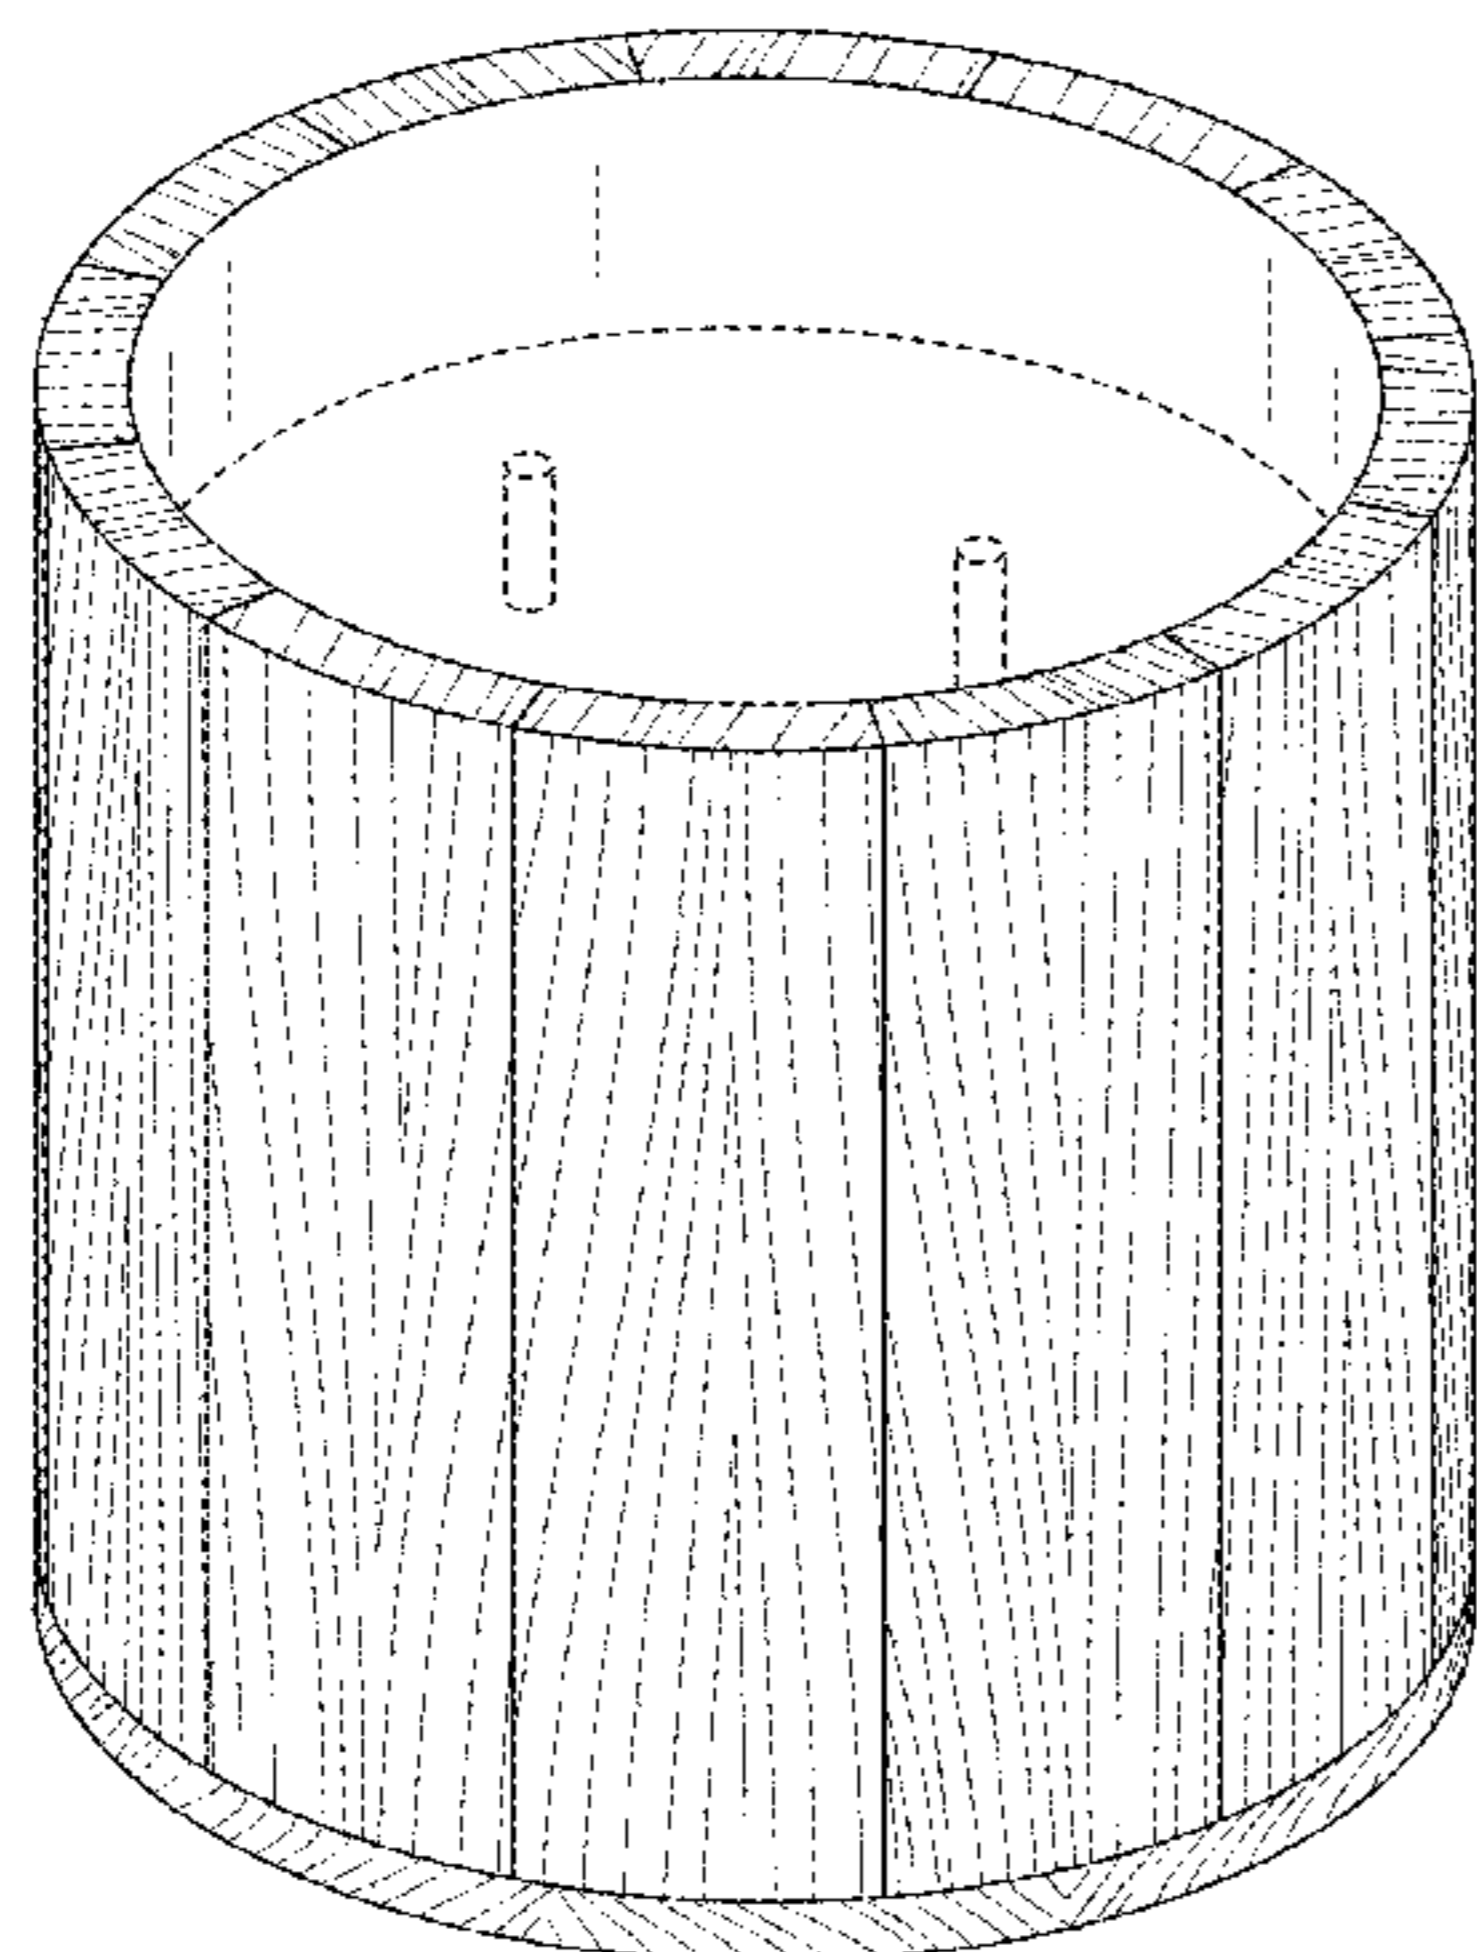

FIG. 3 is a top plan view of the vessel of FIG. 1; and,

FIG. 4 is a bottom plan view of the vessel of FIG. 1.

The exterior shading in FIGS. 1-4 indicates wood grain.

The short-dashed lines in the central cavity of the vessel indicate environmental structure—the candle wax and wicks—that forms no part of the claimed design.
