(57) **CLAIM**

The ornamental design for a computing device display screen with animated graphical user interface to provide geographic-based service information, as shown and described herein.

**DESCRIPTION**

FIG. 1 illustrates a first view in a sequence for a computing device display screen with animated graphical user interface to provide geographic-based service information.

FIG. 2 illustrates a second view in the sequence of the computing device display screen with animated graphical user interface.

FIG. 3 illustrates a third view in the sequence of the computing device display screen with animated graphical user interface.

FIG. 4 illustrates a fourth view in the sequence of the computing device display screen with animated graphical user interface.

FIG. 5 illustrates a fifth view in the sequence of the computing device display screen with animated graphical user interface.

FIG. 6 illustrates a sixth view in the sequence of the computing device display screen with animated graphical user interface.

FIG. 7 illustrates a seventh view in the sequence of the computing device display screen with animated graphical user interface; and,

FIG. 8 illustrates an eighth view in the sequence of the computing device display screen with animated graphical user interface.

The broken lines, which depict a portion(s) or element(s) of a graphical user interface, are provided for the purpose of illustrating environment and/or context, and form no part of the claimed design. The claimed embodiment(s) are applicable to mobile devices, laptops, tablet devices, and other computing environments which can generate a graphical user interface or other display elements for a display screen of a computing device.
