(57) **CLAIM**

The ornamental design for the display screen with animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a first image for a display screen with animated graphical user interface of a first embodiment showing our new design; and,

FIG. 2 is a second image thereof.

The appearance of the animated image sequentially transitions between FIGS. 1 to 2. The process or period in which one image transitions to another image forms no part of the claimed design.

The outermost set of broken lines and the broken line showing of rounded shapes illustrate an electronic device, the broken line at the periphery of the animated graphical user interface illustrates the display screen, and the remainder of the broken lines illustrate portions of the animated graphical user interface. None of the broken lines form part of the claimed design.
