(57) **CLAIM**

The ornamental design for a computer display panel with a graphical user interface for displaying predicted traits of prospective children based on parental genomic information, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a computer display panel with a graphical user interface for displaying predicted traits of prospective children based on parental genomic information, showing my new design; and,

FIG. **2** is a front view of a second embodiment thereof.

The broken lines in the drawings represent portions of the computer display panel and graphical user interface that form no part of the claimed design.
