(57) **CLAIM**

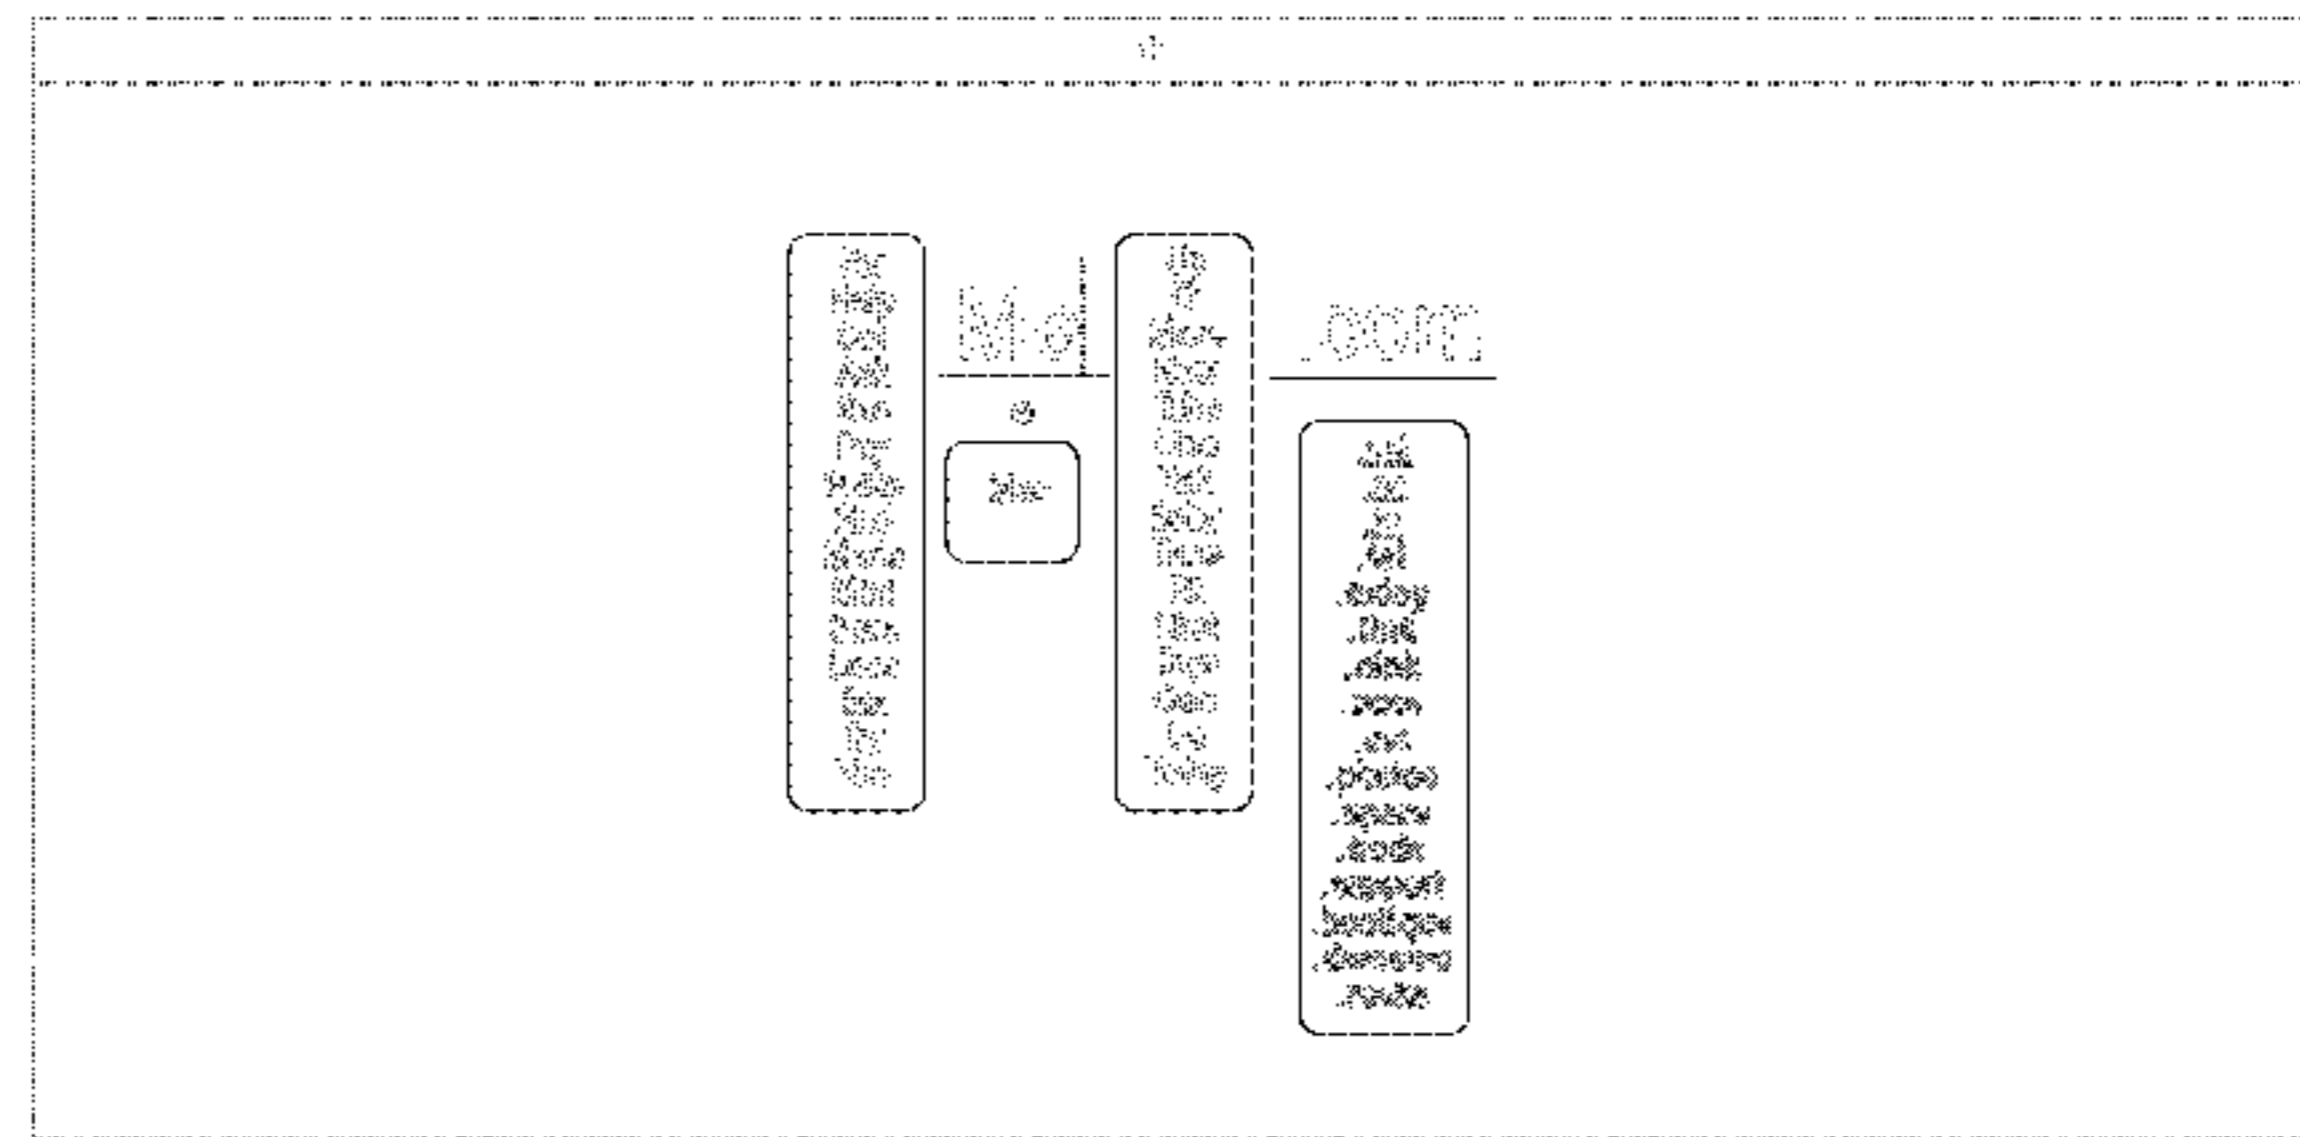

The ornamental design for a display screen or portion thereof with a sequential graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with a sequential graphical user interface showing a first image in a sequence according to the new design; and, FIG. 2 is a second image in the sequence.

The broken lines showing a display screen with graphical user interface are included for the purpose of showing portions of the article which form no part of the claim. The subject matter in this patent application includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
