(57) **CLAIM**

The ornamental design for a shoulder for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a shoulder for a tire showing our new design, it being understood that the pattern repeats uniformly throughout the circumference of the tread; FIG. 2 is a front elevational view thereof; FIG. 3 is a right side elevational view thereof; the left side elevational view being a mirror image thereof; and, FIG. 4 is an enlarged fragmentary front elevational view thereof. In the drawings, the broken lines adjacent to the shaded surfaces define boundaries of the claim, and all other broken lines depict environmental subject matter only and form no part of the claimed design.
