(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a first sequence according to a first embodiment of the claimed design;

FIG. 2 is a front view showing a second image in the first sequence according to the first embodiment of the claimed design;

FIG. 3 is a front view showing a third image in the first sequence according to the first embodiment of the claimed design;

FIG. 4 is a front view of a first image in a second sequence according to a second embodiment of the claimed design;

FIG. 5 is a front view of a second image in the second sequence according to the second embodiment of the claimed design;

FIG. 6 is a front view of a third image in the second sequence according to the second embodiment of the claimed design;

FIG. 7 is a front view of a first image in a third sequence according to a third embodiment of the claimed design;

FIG. 8 is a front view of a second image in the third sequence according to the third embodiment of the claimed design; and,

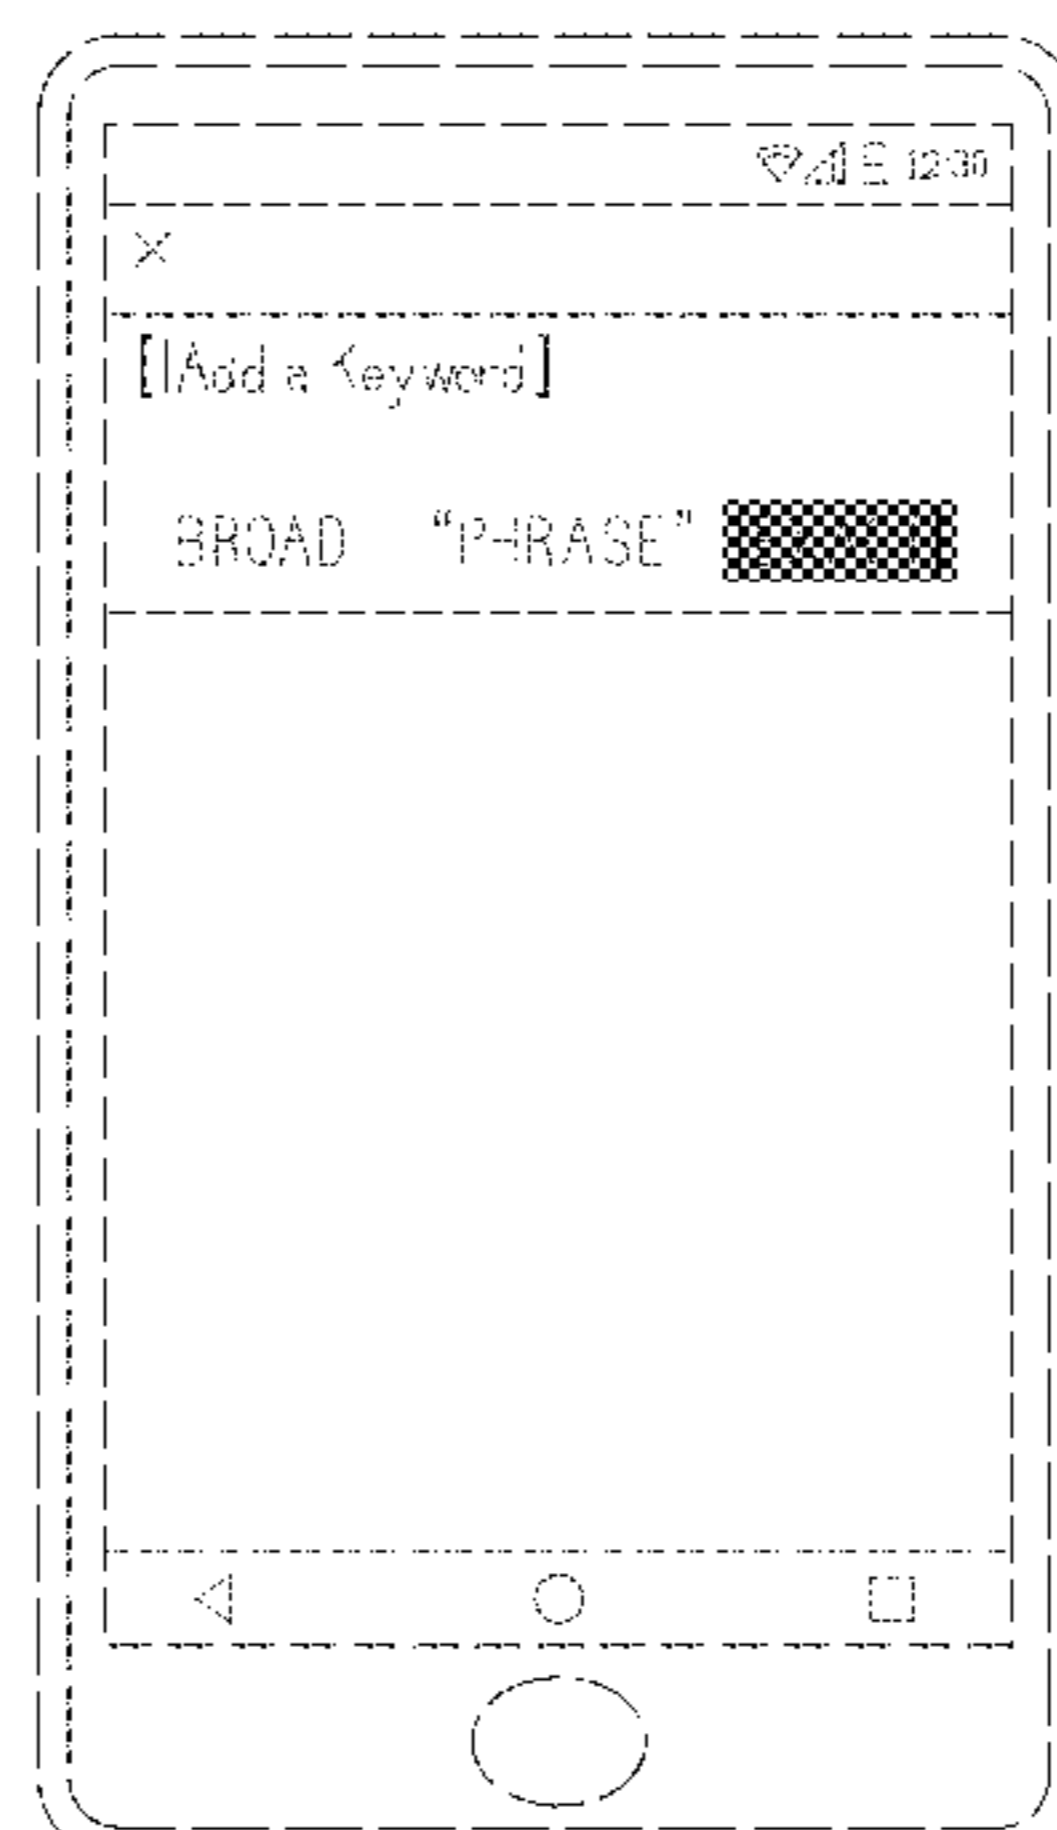

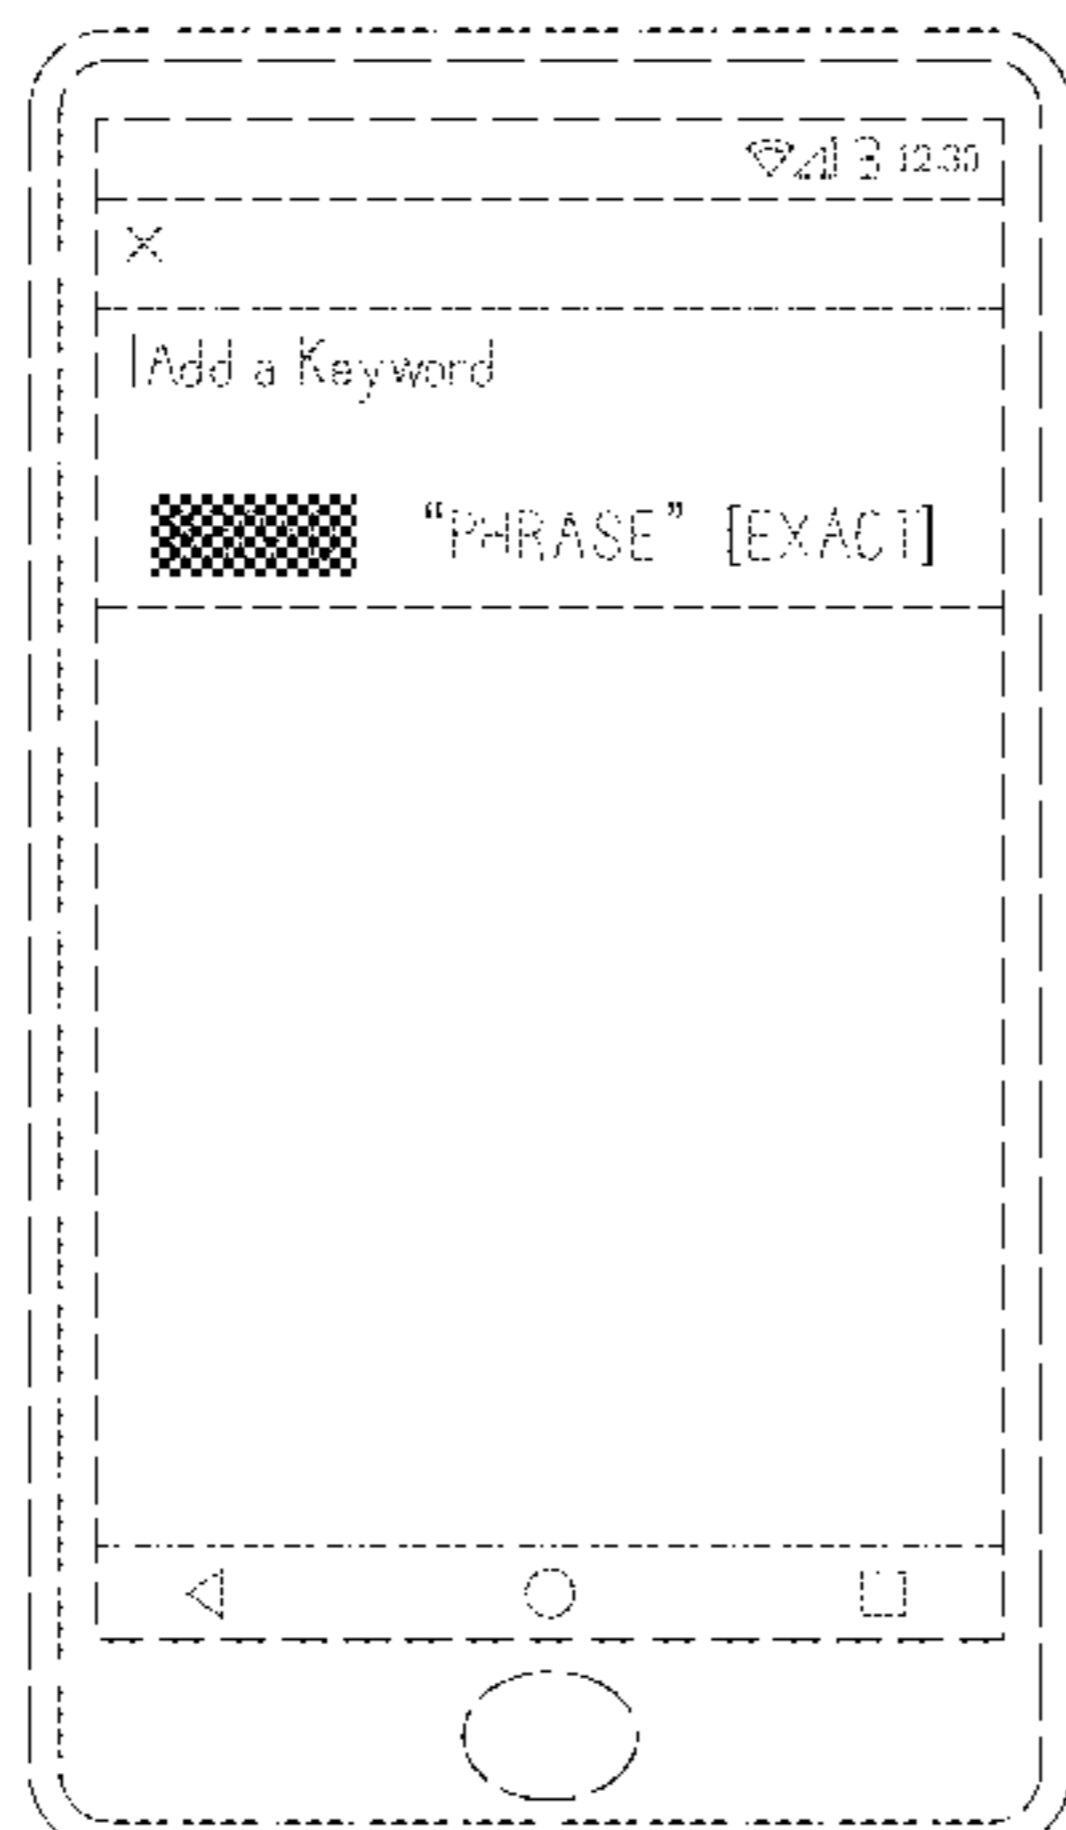

FIG. 9 is a front view of a third image in the third sequence according to the third embodiment of the claimed design.

The appearance of the image transitions sequentially between the images shown in FIGS. 1-3; FIGS. 4-6; and FIGS. 7-9. The process or period in which one image transitions to another image forms no part of the claimed design.

The shading depicts a contrast in appearance.

The outermost long-dash broken lines illustrate an electronic device, which is the environment of the design, and form no part of the claim. The remaining broken lines illustrate
