(12) **United States Design Patent**
Laflamme

(10) **Patent No.:** **US D847,160 S**
(45) **Date of Patent:** **** Apr. 30, 2019**

(54) **DISPLAY SCREEN WITH TRANSITIONAL GRAPHICAL USER INTERFACE**

(74) *Attorney, Agent, or Firm* — Sheridan Ross PC

(71) Applicant: **GECKO ALLIANCE GROUP INC.,**
Quebec (CA)

(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described herein.

(72) Inventor: **Benoit Laflamme,** Quebec (CA)

(73) Assignee: **GECKO ALLIANCE GROUP INC.,**
Quebec (CA)

DESCRIPTION

(**) Term: **15 Years**

(21) Appl. No.: **29/550,966**

(22) Filed: **Jan. 8, 2016**

(30) **Foreign Application Priority Data**

Dec. 11, 2015 (CA) 165941

(51) **LOC (11) Cl.** **14-04**

(52) **U.S. Cl.**
USPC **D14/486**

Primary Examiner — Jack Reickel

FIG. 1 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of images according to one embodiment;

FIG. 2 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 1;

FIG. 3 is front view of a display screen with transitional graphical user interface showing a third image in a sequence of images according to the embodiment of FIG. 1;

FIG. 4 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of images according to another embodiment;

FIG. 5 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 4;

FIG. 6 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 4;

FIG. 7 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of images according to another embodiment;

FIG. 8 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 7;

FIG. 9 is a front view of a display screen with transitional graphical user interface showing a third image in a sequence of images according to the embodiment of FIG. 7;

FIG. 10 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of images according to another embodiment;

FIG. 11 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 10;

(Continued)

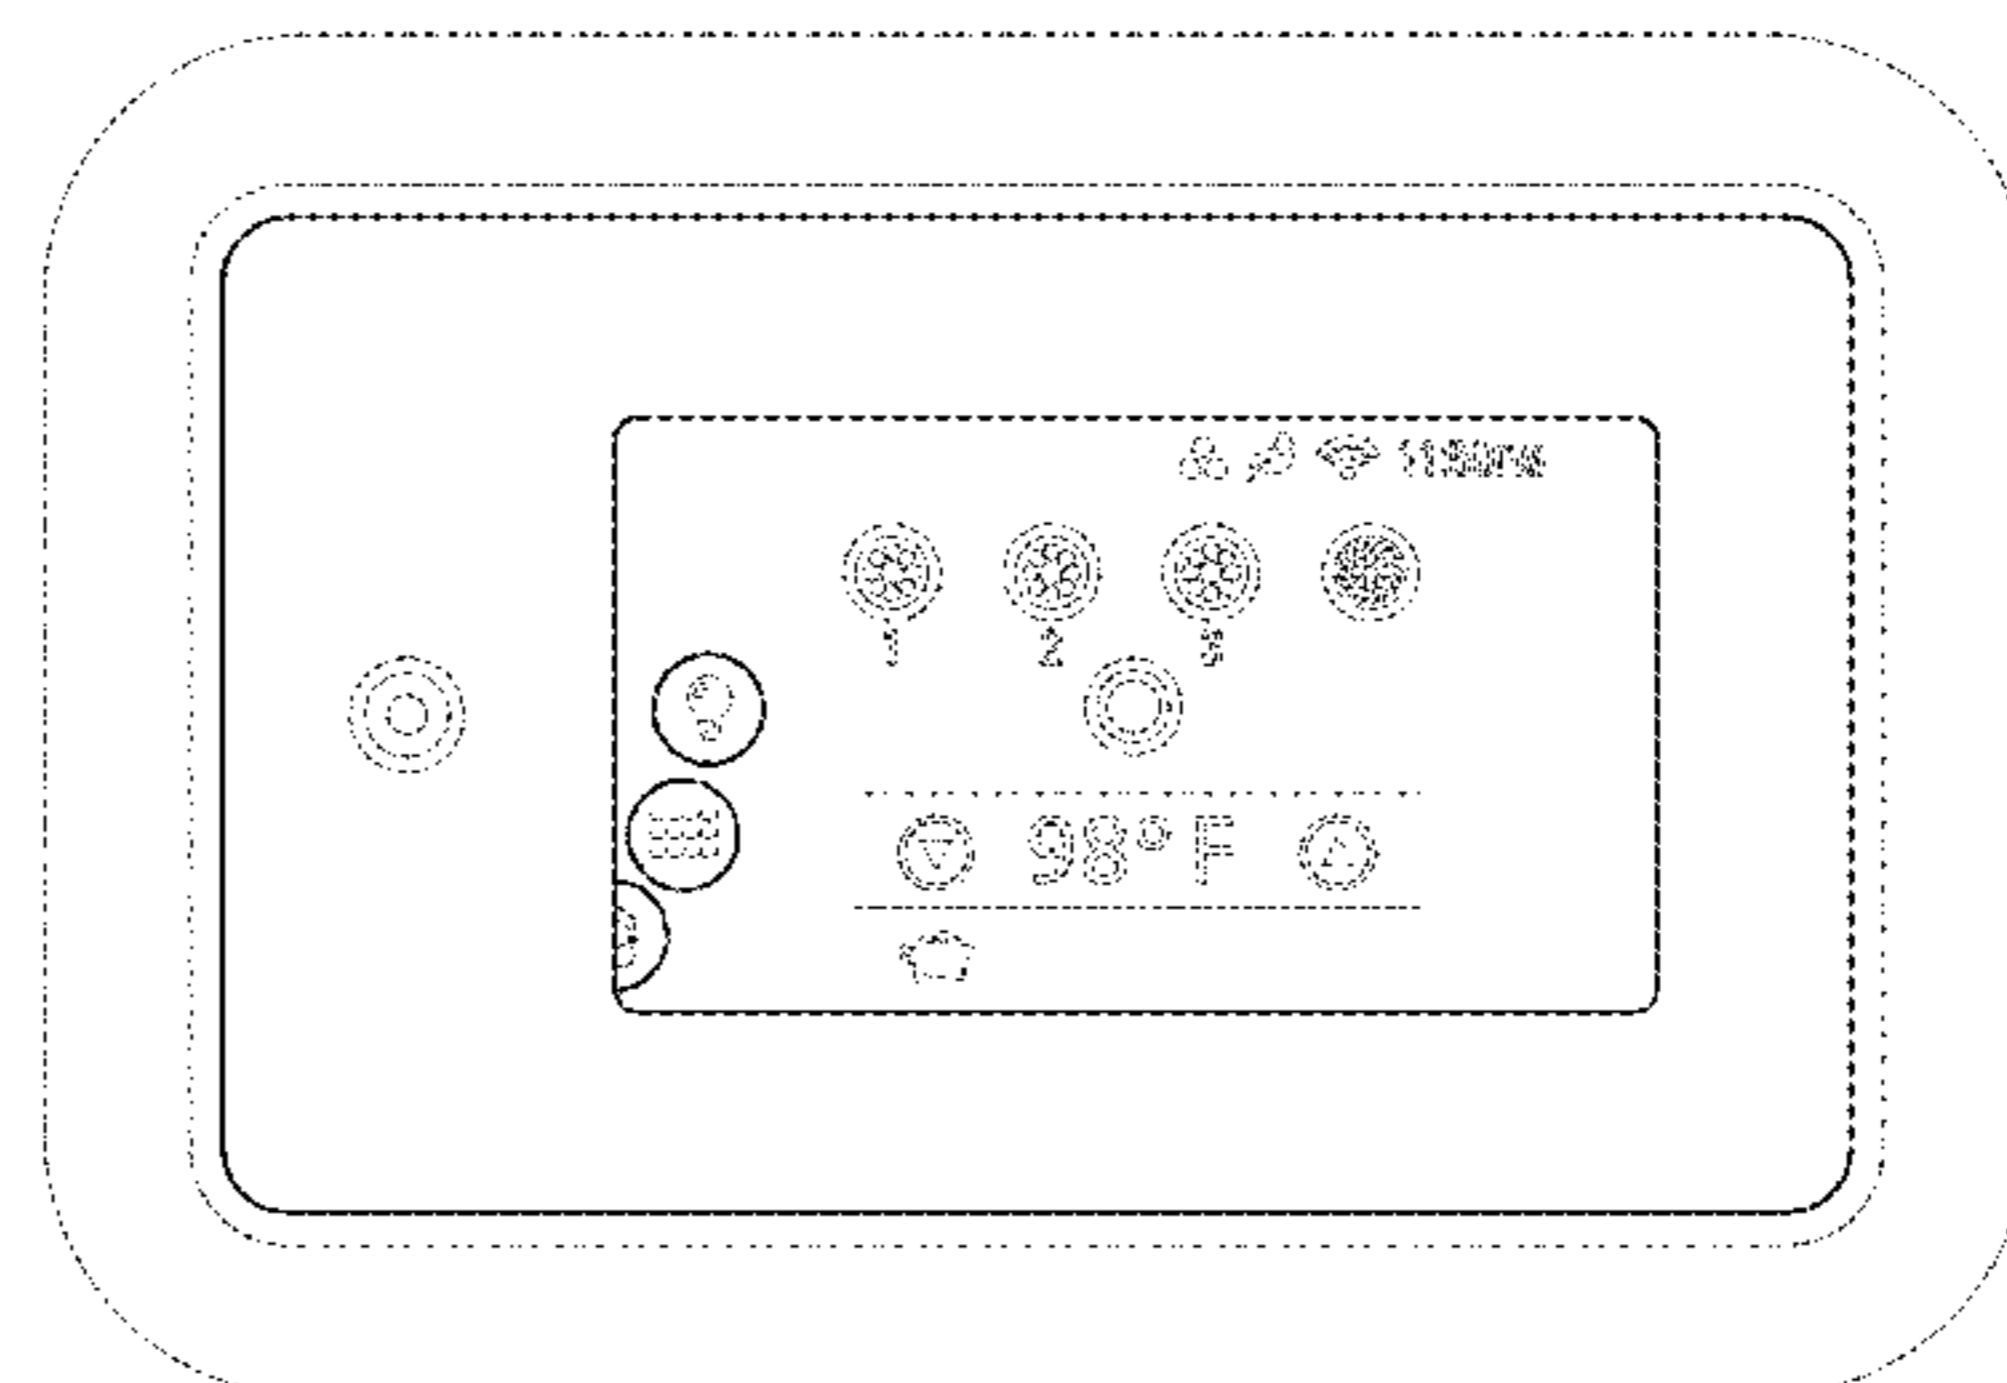

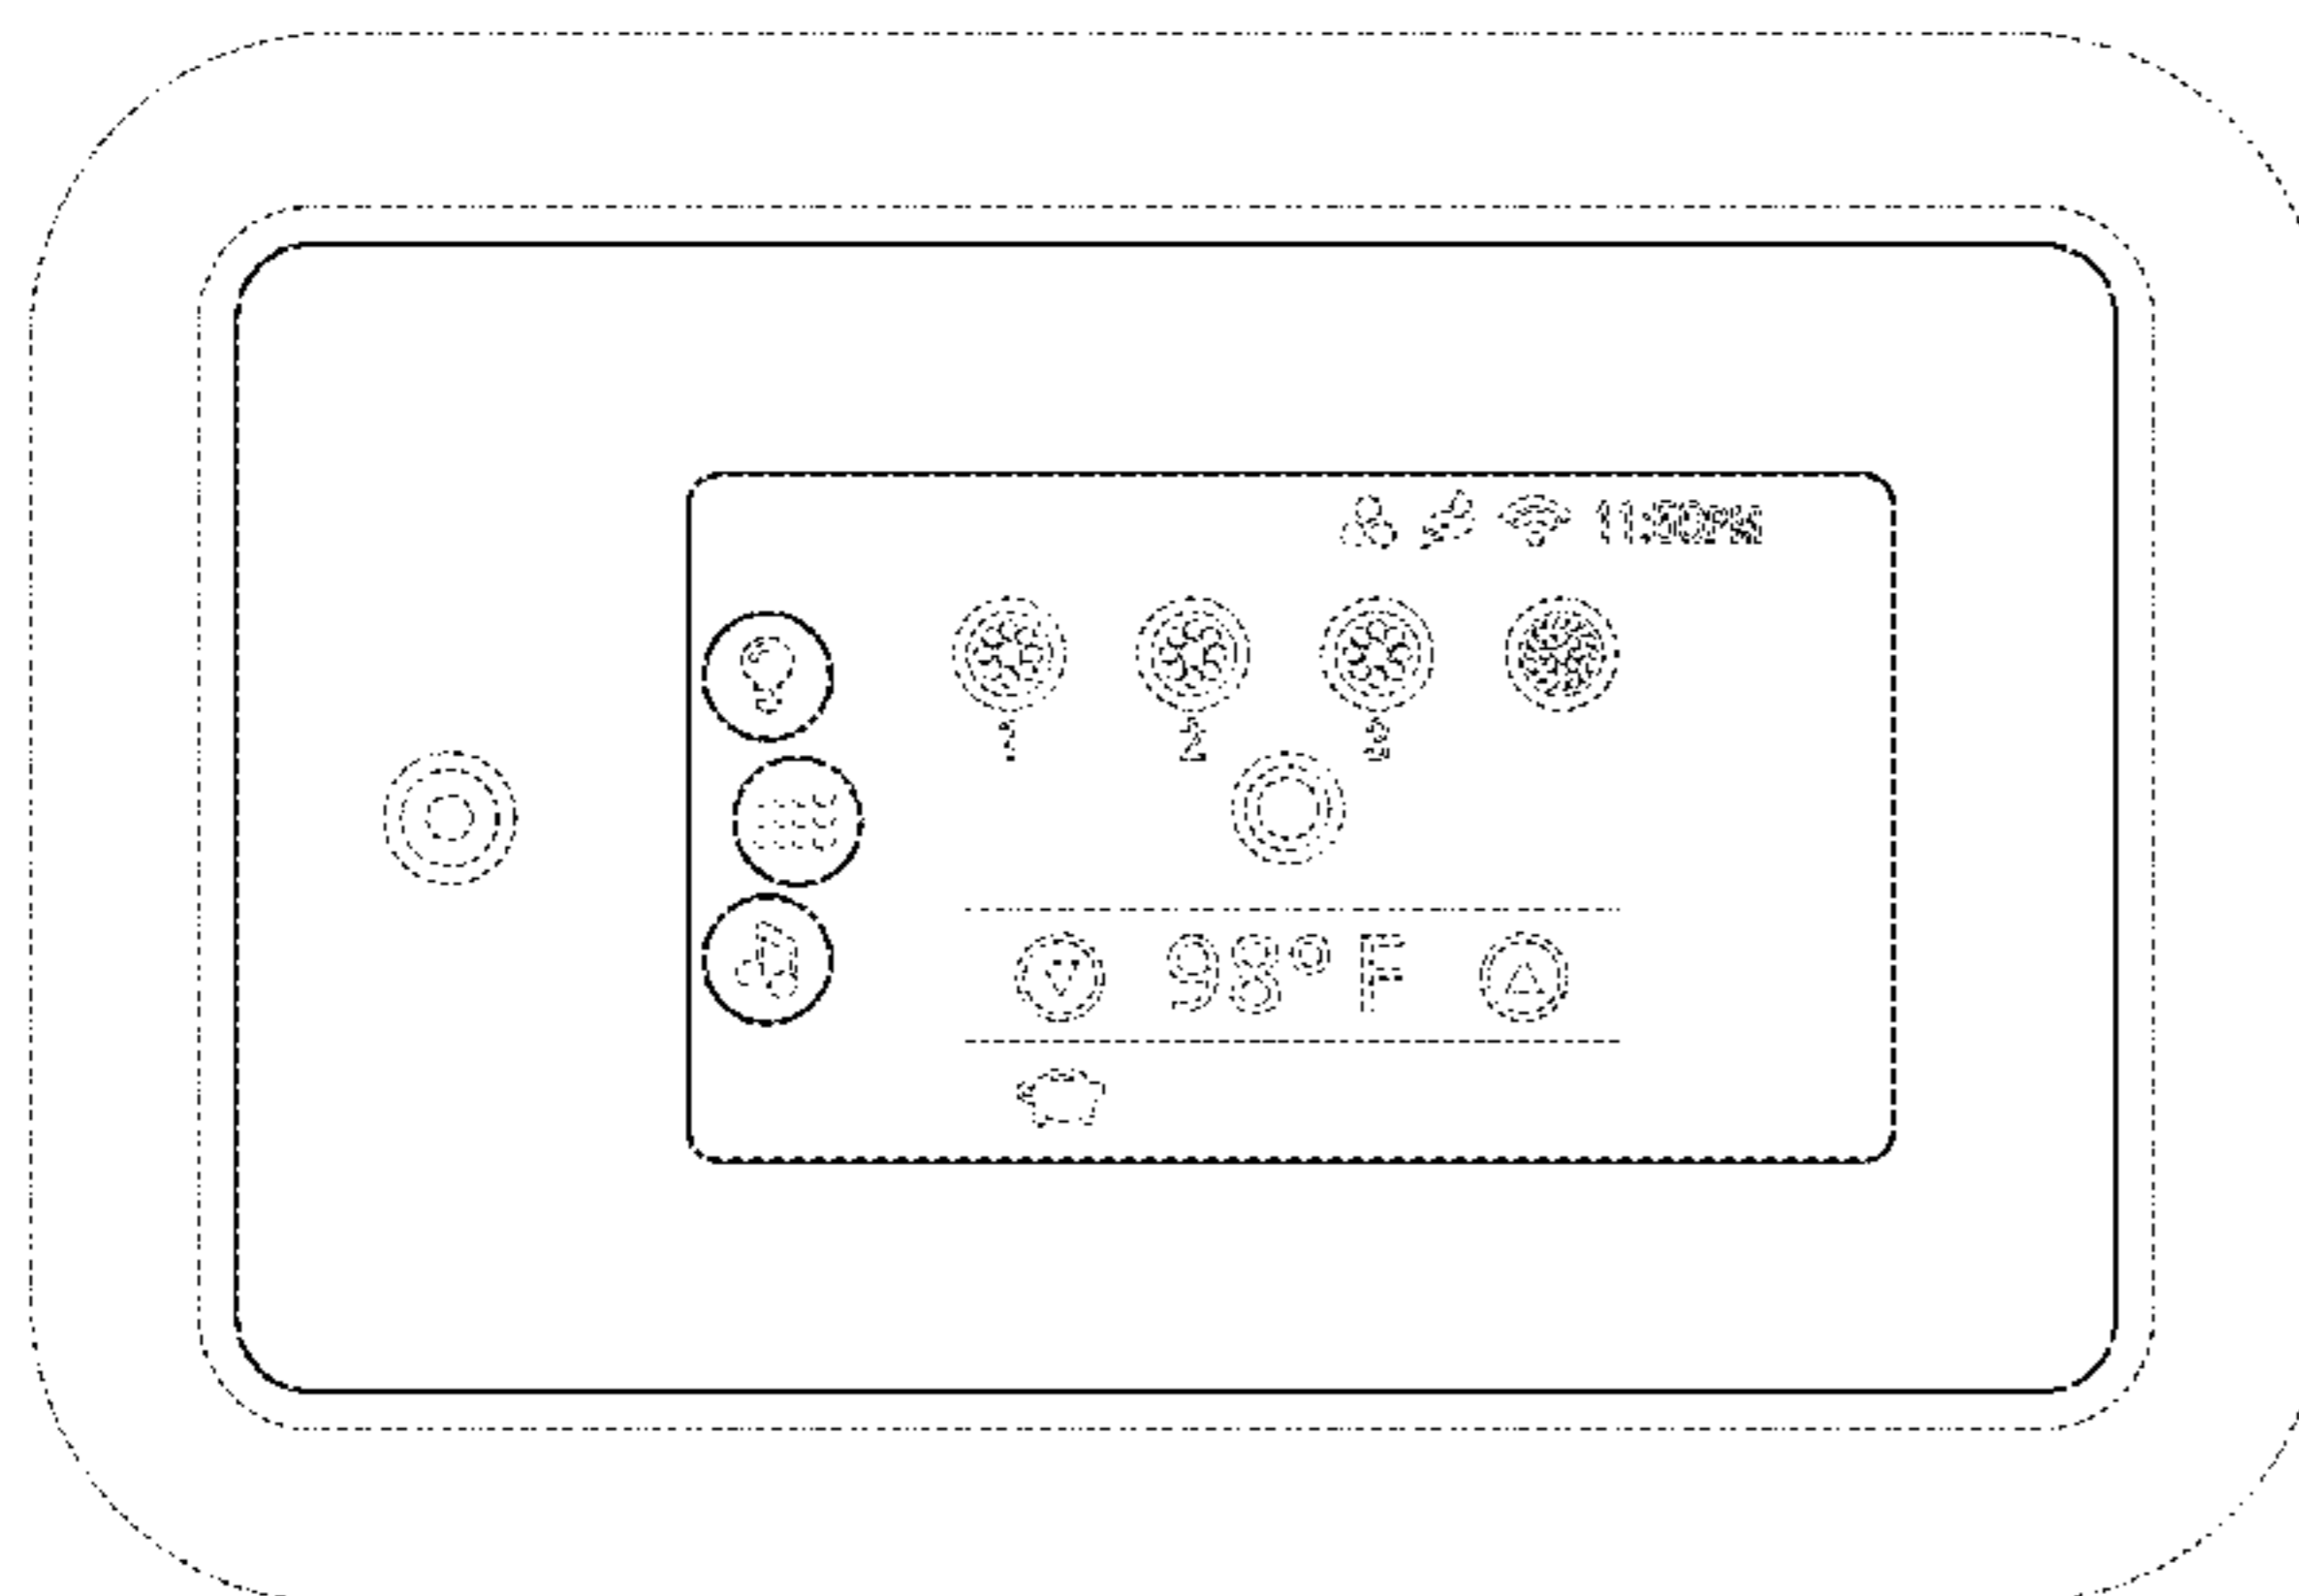

FIG. 12 is a front view of a display screen with transitional graphical user interface showing a third image in a sequence of images according to the embodiment of FIG. 10;

FIG. 13 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of images according to another embodiment;

FIG. 14 is a front view of a display screen with transitional graphical user interface showing a second image in a sequence of images according to the embodiment of FIG. 13; and,

FIG. 15 is a front view of a display screen with transitional graphical user interface showing a third image in a sequence of images according to the embodiment of FIG. 13.

The broken lines showing portion of a display screen, text and other elements in the Figures are provided to illustrate environment only, and form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-3, 4-6, 7-9, 10-12, and 13-15. The process or period in which one image transitions to another image forms no part of the claimed design.
