(57) **CLAIM**

The ornamental design of a ceiling transition within an internal cabin of a vehicle, as shown and described in FIGS. 1-6.

DESCRIPTION

FIG. 1 is a central longitudinal axis perspective internal view of a ceiling transition within an internal cabin of a vehicle, according to a first embodiment of the present disclosure.

FIG. 2 is an offset left from a central longitudinal axis perspective internal view of a ceiling transition within an internal cabin of a vehicle, according to a second embodiment of the present disclosure.

FIG. 3 is a central longitudinal axis perspective internal view of a ceiling transition proximate to a monument within an internal cabin of a vehicle, according to a third embodiment of the present disclosure.

FIG. 4 is a central longitudinal axis perspective internal view of a ceiling transition proximate to a monument within an internal cabin of a vehicle, according to a fourth embodiment of the present disclosure.

FIG. 5 is an offset left from a central longitudinal axis perspective internal view of a ceiling transition proximate to a monument within an internal cabin of a vehicle, according to the third embodiment of the present disclosure shown in FIG. 3; and,

FIG. 6 is an offset left from a central longitudinal axis perspective internal view of a ceiling transition proximate to a monument within an internal cabin of a vehicle, according to the fourth embodiment of the present disclosure shown in FIG. 4.

Central longitudinal axis perspective internal views of a ceiling transition within an internal cabin of a vehicle from a fore-to-aft perspective and an aft-to-fore perspective, respectively, according to an embodiment of the present disclosure, may be mirror images of one another.

Offset right and offset left from a central longitudinal axis perspective internal views of a ceiling transition within an internal cabin of a vehicle, according to an embodiment of the present disclosure, may be a mirror images of one another.

Any broken lines shown in the drawings illustrate environmental structure only and form no part of the claimed design.

The ceiling transition within an internal cabin of a vehicle shown herein is used to provide an ornamental and aesthetically-pleasing transition between different ceiling panel configurations within the internal cabin.
