(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire including the tire tread of the present application taken generally from the front and a first side of the tire;

FIG. 2 is a front view thereof;

FIG. 3 is a side view thereof;

FIG. 4 is an enlarged, partial perspective view thereof taken generally from the front and first side of the tire;

FIG. 5 is an enlarged, partial front view thereof; and,

FIG. 6 is an enlarged, partial side view of the first side thereof.

It is understood that the broken line adjacent to the tread shoulder on either side of the tire depicts a claim boundary. The broken lines and the region between the broken lines defining the inner beads and the first and second sidewalls depict subject matter that forms no part of the claimed tire tread design, and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire.

1 Claim, 6 Drawing Sheets
