(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen with animated graphical user interface showing a first image in the sequence;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a third image thereof;

FIG. 4 is a front view of a fourth image thereof;

FIG. 5 is a front view of a fifth image thereof;

FIG. 6 is a front view of a sixth image thereof; and,

FIG. 7 is a front view of a seventh image thereof.

The line made of outlined rectangular dashes at the left-side margin of the display screen forms part of the claim. All other broken lines showing a display screen with animated graphical user interface are included for the purpose of showing portions of the article which form no part of the claim.

The appearance of the transitional image transitions between the images shown in FIGS. 1-7. The process or period in which one image transitions to another forms no part of the claimed design.
