(57) **CLAIM**

The ornamental design for an operator console housing for measuring and control tool, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the operator console housing for measuring and control tool of the present invention.

FIG. 2 is a rear perspective view of the operator console housing for measuring and control tool of the present invention.

FIG. 3 is a first side view of the operator console housing for measuring and control tool of the present invention.

FIG. 4 front elevational view of the operator console housing for measuring and control tool of the present invention.

FIG. 5 is a second side view of the operator console housing for measuring and control tool of the present invention.

FIG. 6 is a top view of the operator console housing for measuring and control tool of the present invention.

FIG. 7 is a bottom view of the operator console housing for measuring and control tool of the present invention; and,

FIG. 8 is a rear elevational view of the operator console housing for measuring and control tool of the present invention.
