(57) **CLAIM**

The ornamental design for a headlamp for an automobile, as
shown and described.

DESCRIPTION

FIG. 1 is an outside elevational view of a headlamp for an
automobile in accordance with a first embodiment of our
new design;

FIG. 2 is an inside elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a front side elevational view thereof;

FIG. 6 is a rear side elevational view thereof; and,

FIG. 7 is a front side perspective view thereof.

The headlamp is configured to be mounted to an automobile.
The mounting structure and support structure of the head-
lamp, shown in broken lines in FIGS. 1 to 7, form no part
of the claimed design since the mounting structure and
support structure are hidden when the headlamp is mounted
to the automobile.

In addition, the appearance of the rear side structures and
inside structures of the headlamp as shown in broken lines
in FIGS. 1 to 7 is for purpose of illustrating the boundaries
of the exterior surface of the outside of the headlamp, and
forms no part of the claimed design. The headlamp has a
front lens that is transparent such that features behind the
lens are at least partially visible as illustrated.

A second embodiment of our new design includes the mirror
image of the headlamp shown in FIGS. 1 to 7.
