(57) **CLAIM**

The ornamental design for a display screen portion with graphical user interface of a model for replication in structured block play, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting an upper right front isometric view of the model, that illustrates the novel design;

FIG. 2 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting an upper left rear isometric view of the model of FIG. 1;

FIG. 3 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a front orthographic view of the model of FIG. 1;

FIG. 4 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a right side orthographic view of the model of FIG. 1;

FIG. 5 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a left side orthographic view of the model of FIG. 1;

FIG. 6 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a top orthographic view of the model of FIG. 1;

FIG. 7 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a bottom orthographic view of the model of FIG. 1; and,

FIG. 8 is a front view of a display screen portion with graphical user interface of a model for replication in structured block play depicting a rear orthographic view of the model of FIG. 1.

The appearance of the graphical user interface sequentially transitions between the images shown in FIGS. 1-8. The process or period in which one image transitions to another image forms no part of the claimed design.

(Continued)

The broken lines illustrate a portion of a display screen and form no part of the claimed design. In the drawings, different line patterns illustrate a contrast of appearance but do not depict any particular color, texture or material.
