(57) **CLAIM**

The ornamental design for a mobile phone protective case, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first component, which includes a first cover and a clip coupled thereto, of a mobile phone protective case of the present invention, wherein the clip is in a closed configuration.

FIG. 2 is rear view of the first component as shown in FIG. 1.

FIG. 3 is a left view of the first component as shown in FIG. 1.

FIG. 4 is a right view of the first component as shown in FIG. 1.

FIG. 5 is a top view of the first component as shown in FIG. 1.

FIG. 6 is a bottom view of the first component as shown in FIG. 1.

FIG. 7 is a perspective view of the first component, wherein the clip is in an open configuration.

FIG. 8 is another perspective view of the first component, wherein the clip is in an open configuration.

FIG. 9 is a front view of a second component, which includes a second cover and a support stand coupled thereto, of the mobile phone protective case of the present invention.

FIG. 10 is a rear view of the second component, wherein the support stand is in a passive, undeployed configuration.

FIG. 11 is a left view of the second component as shown in FIG. 10.

FIG. 12 is a right view of the second component as shown in FIG. 10.

FIG. 13 is a top view of the second component as shown in FIG. 10.

FIG. 14 is a bottom view of the second component as shown in FIG. 10.

FIG. 15 is a perspective view of the second component, wherein the support stand is in an active, deployed configuration.

FIG. 16 is another perspective view of the second component, wherein the support stand is in an active, deployed configuration.

FIG. 17 is a front view of the mobile phone protective case of the present invention when the first component and the second component are assembled together, wherein the clip of the first component is in a closed configuration, and wherein the support stand of the second component is in a passive, undeployed configuration.

FIG. 18 is a rear view thereof.

FIG. 19 is a left view thereof.

FIG. 20 is a right view thereof.

FIG. 21 is a top view thereof.

(Continued)

FIG. 22 is a bottom view thereof.
 FIG. 23 is a perspective view thereof.
 FIG. 24 is another perspective view thereof.
 FIG. 25 is an exploded perspective view of the mobile phone protective case of the present invention wherein the first component and second component are separated, wherein the clip of the first component is in a closed configuration, and wherein the support stand of the second component is in a passive, undeployed configuration.
 FIG. 26 is another exploded perspective view of the mobile phone protective case of the present invention wherein the first component and second component are separated, wherein the clip of the first component is in a closed configuration, and wherein the support stand of the second component is in a passive, undeployed configuration.
 FIG. 27 is a front view of the mobile phone protective case of the present invention when the first component and the second component are assembled together, wherein the clip of the first component is in an open configuration, and wherein the support stand of the second component is in an active, deployed configuration.
 FIG. 28 is a rear view thereof.
 FIG. 29 is a left view thereof.
 FIG. 30 is a right view thereof.
 FIG. 31 is a top view thereof.
 FIG. 32 is a bottom view thereof.
 FIG. 33 is a perspective view thereof.
 FIG. 34 is another perspective view thereof.
 FIG. 35 is an exploded perspective view of the mobile phone protective case of the present invention wherein the first component and second component are separated, wherein the clip of the first component is in an open configuration, and wherein the support stand of the second component is in an open configuration; and,
 FIG. 36 is another exploded perspective view of the mobile phone protective case of the present invention wherein the first component and second component are separated,

wherein the clip of the first component is in an open configuration, and wherein the support stand of the second component is in an open configuration.
 The broken line showing in the drawings is for illustrating purpose only and does not form part of the claimed design.
