(57) **CLAIM**

The ornamental design for a display screen with a graphical user interface for a measurement device, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen with a graphical user interface for a measurement device showing a first embodiment of our new design in a first state;

FIG. 2 is a front view thereof showing the first embodiment of our new design in a second state;

FIG. 3 is a front view thereof showing the first embodiment of our new design in a third state;

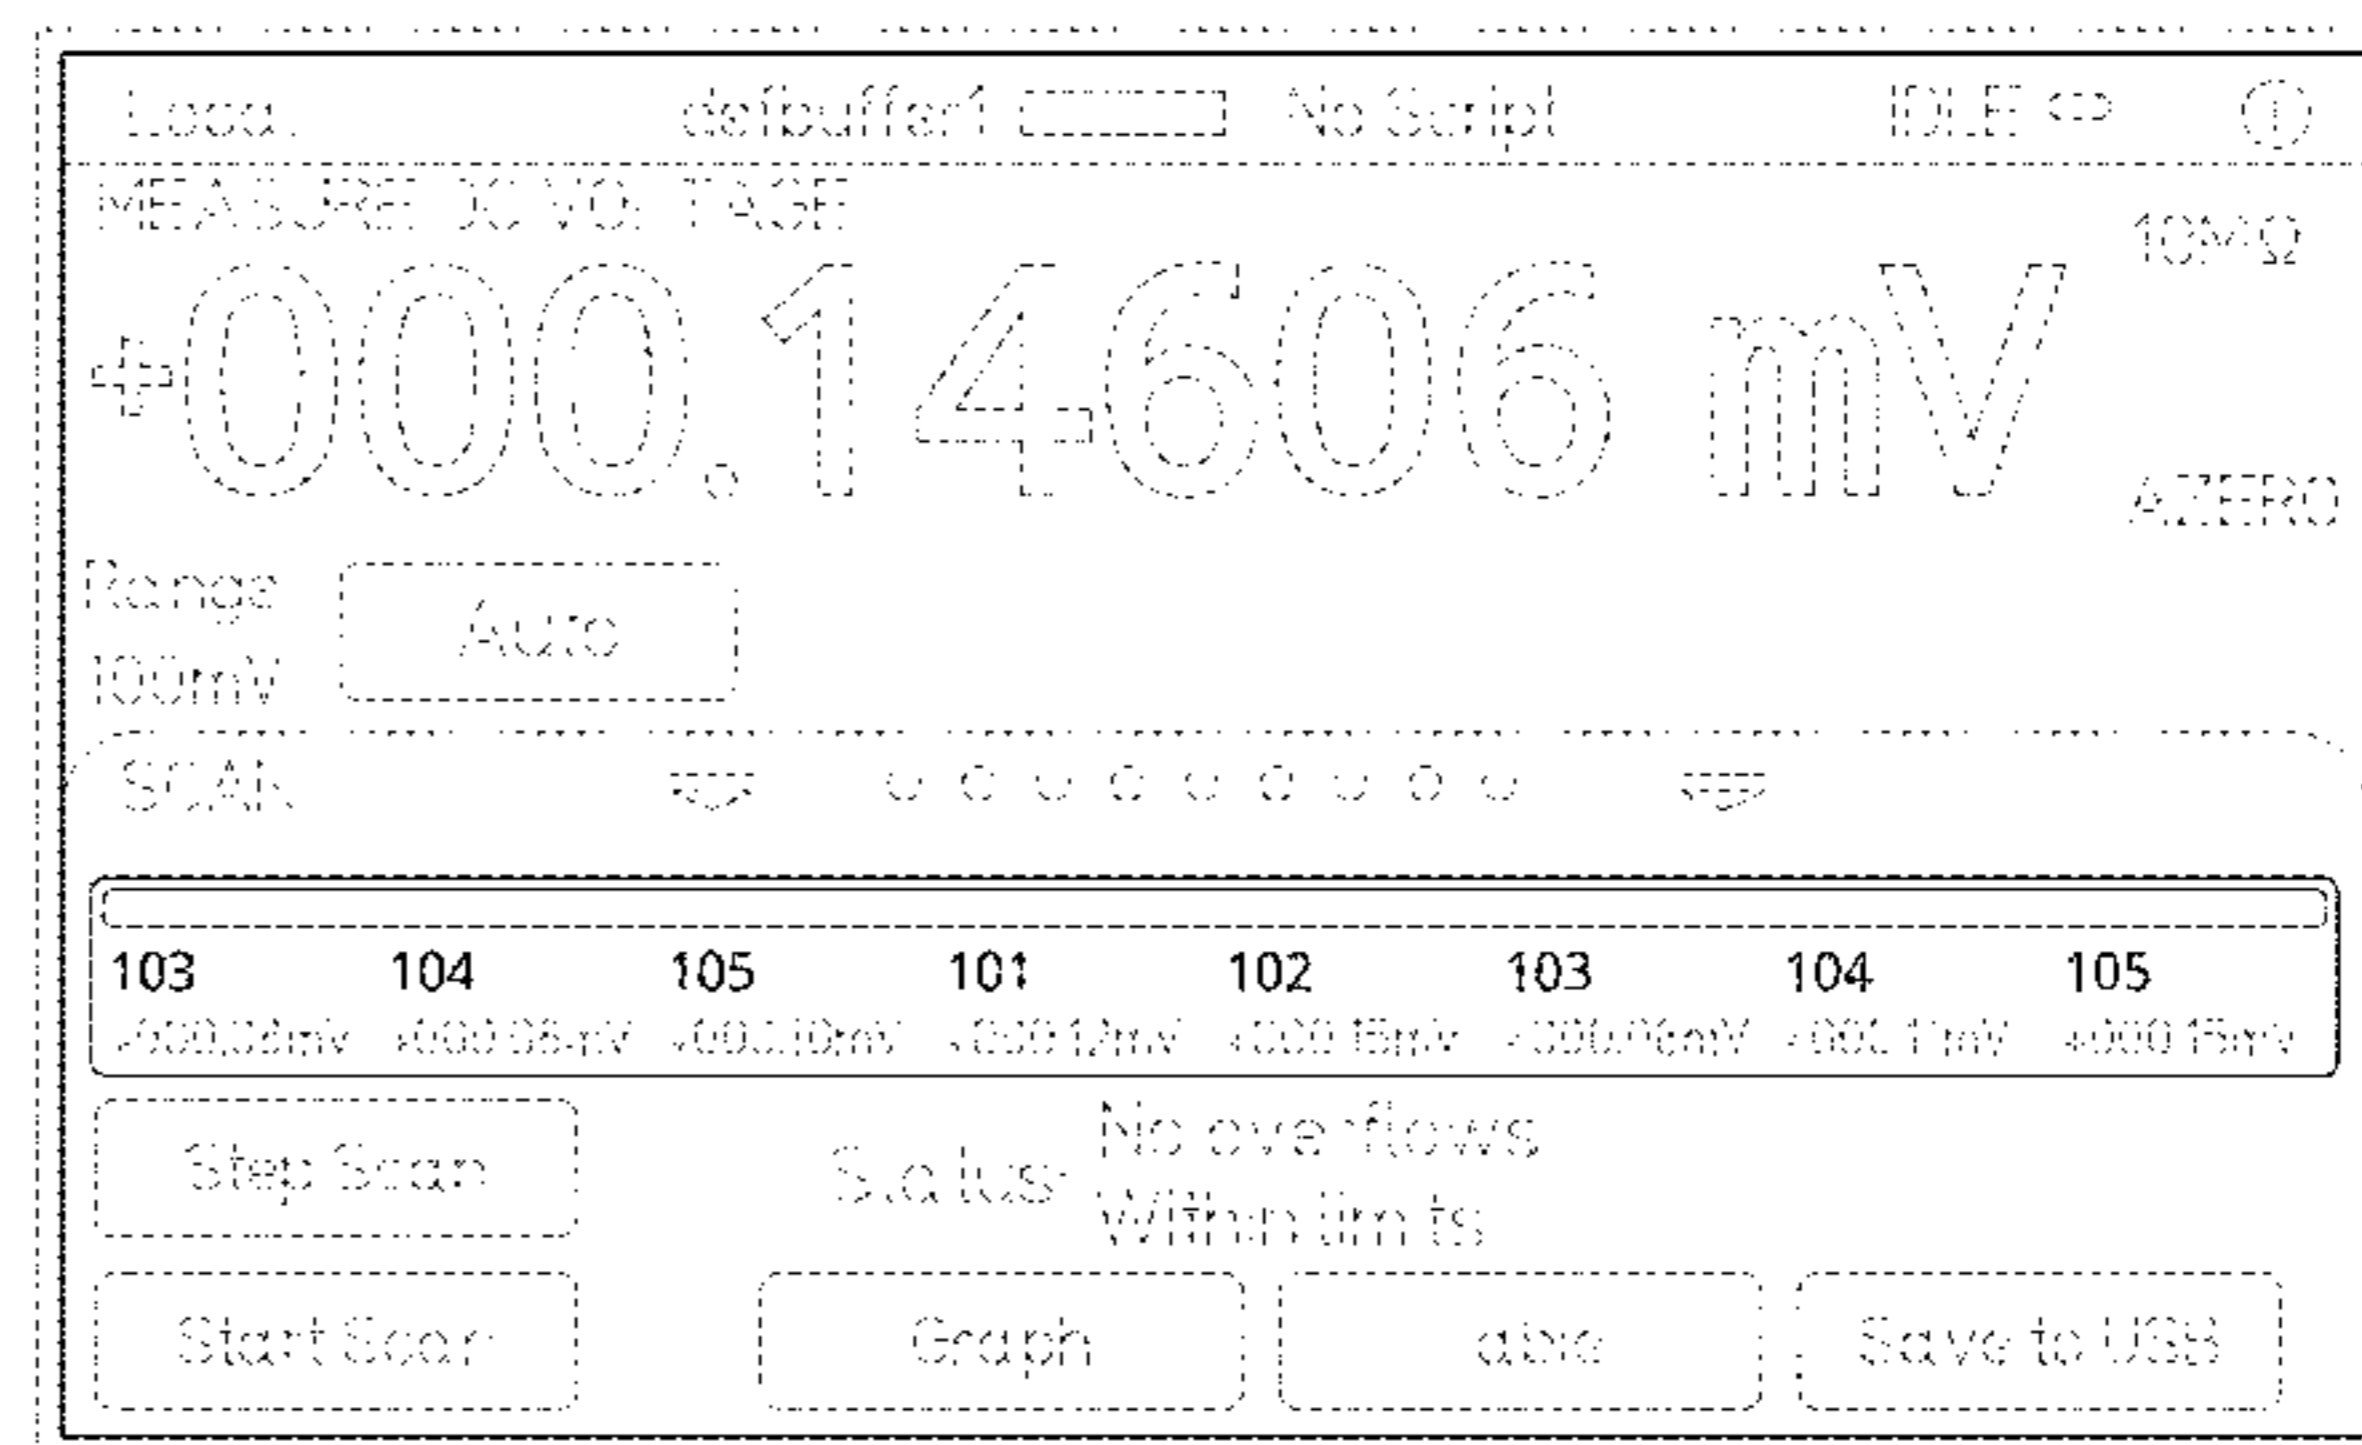

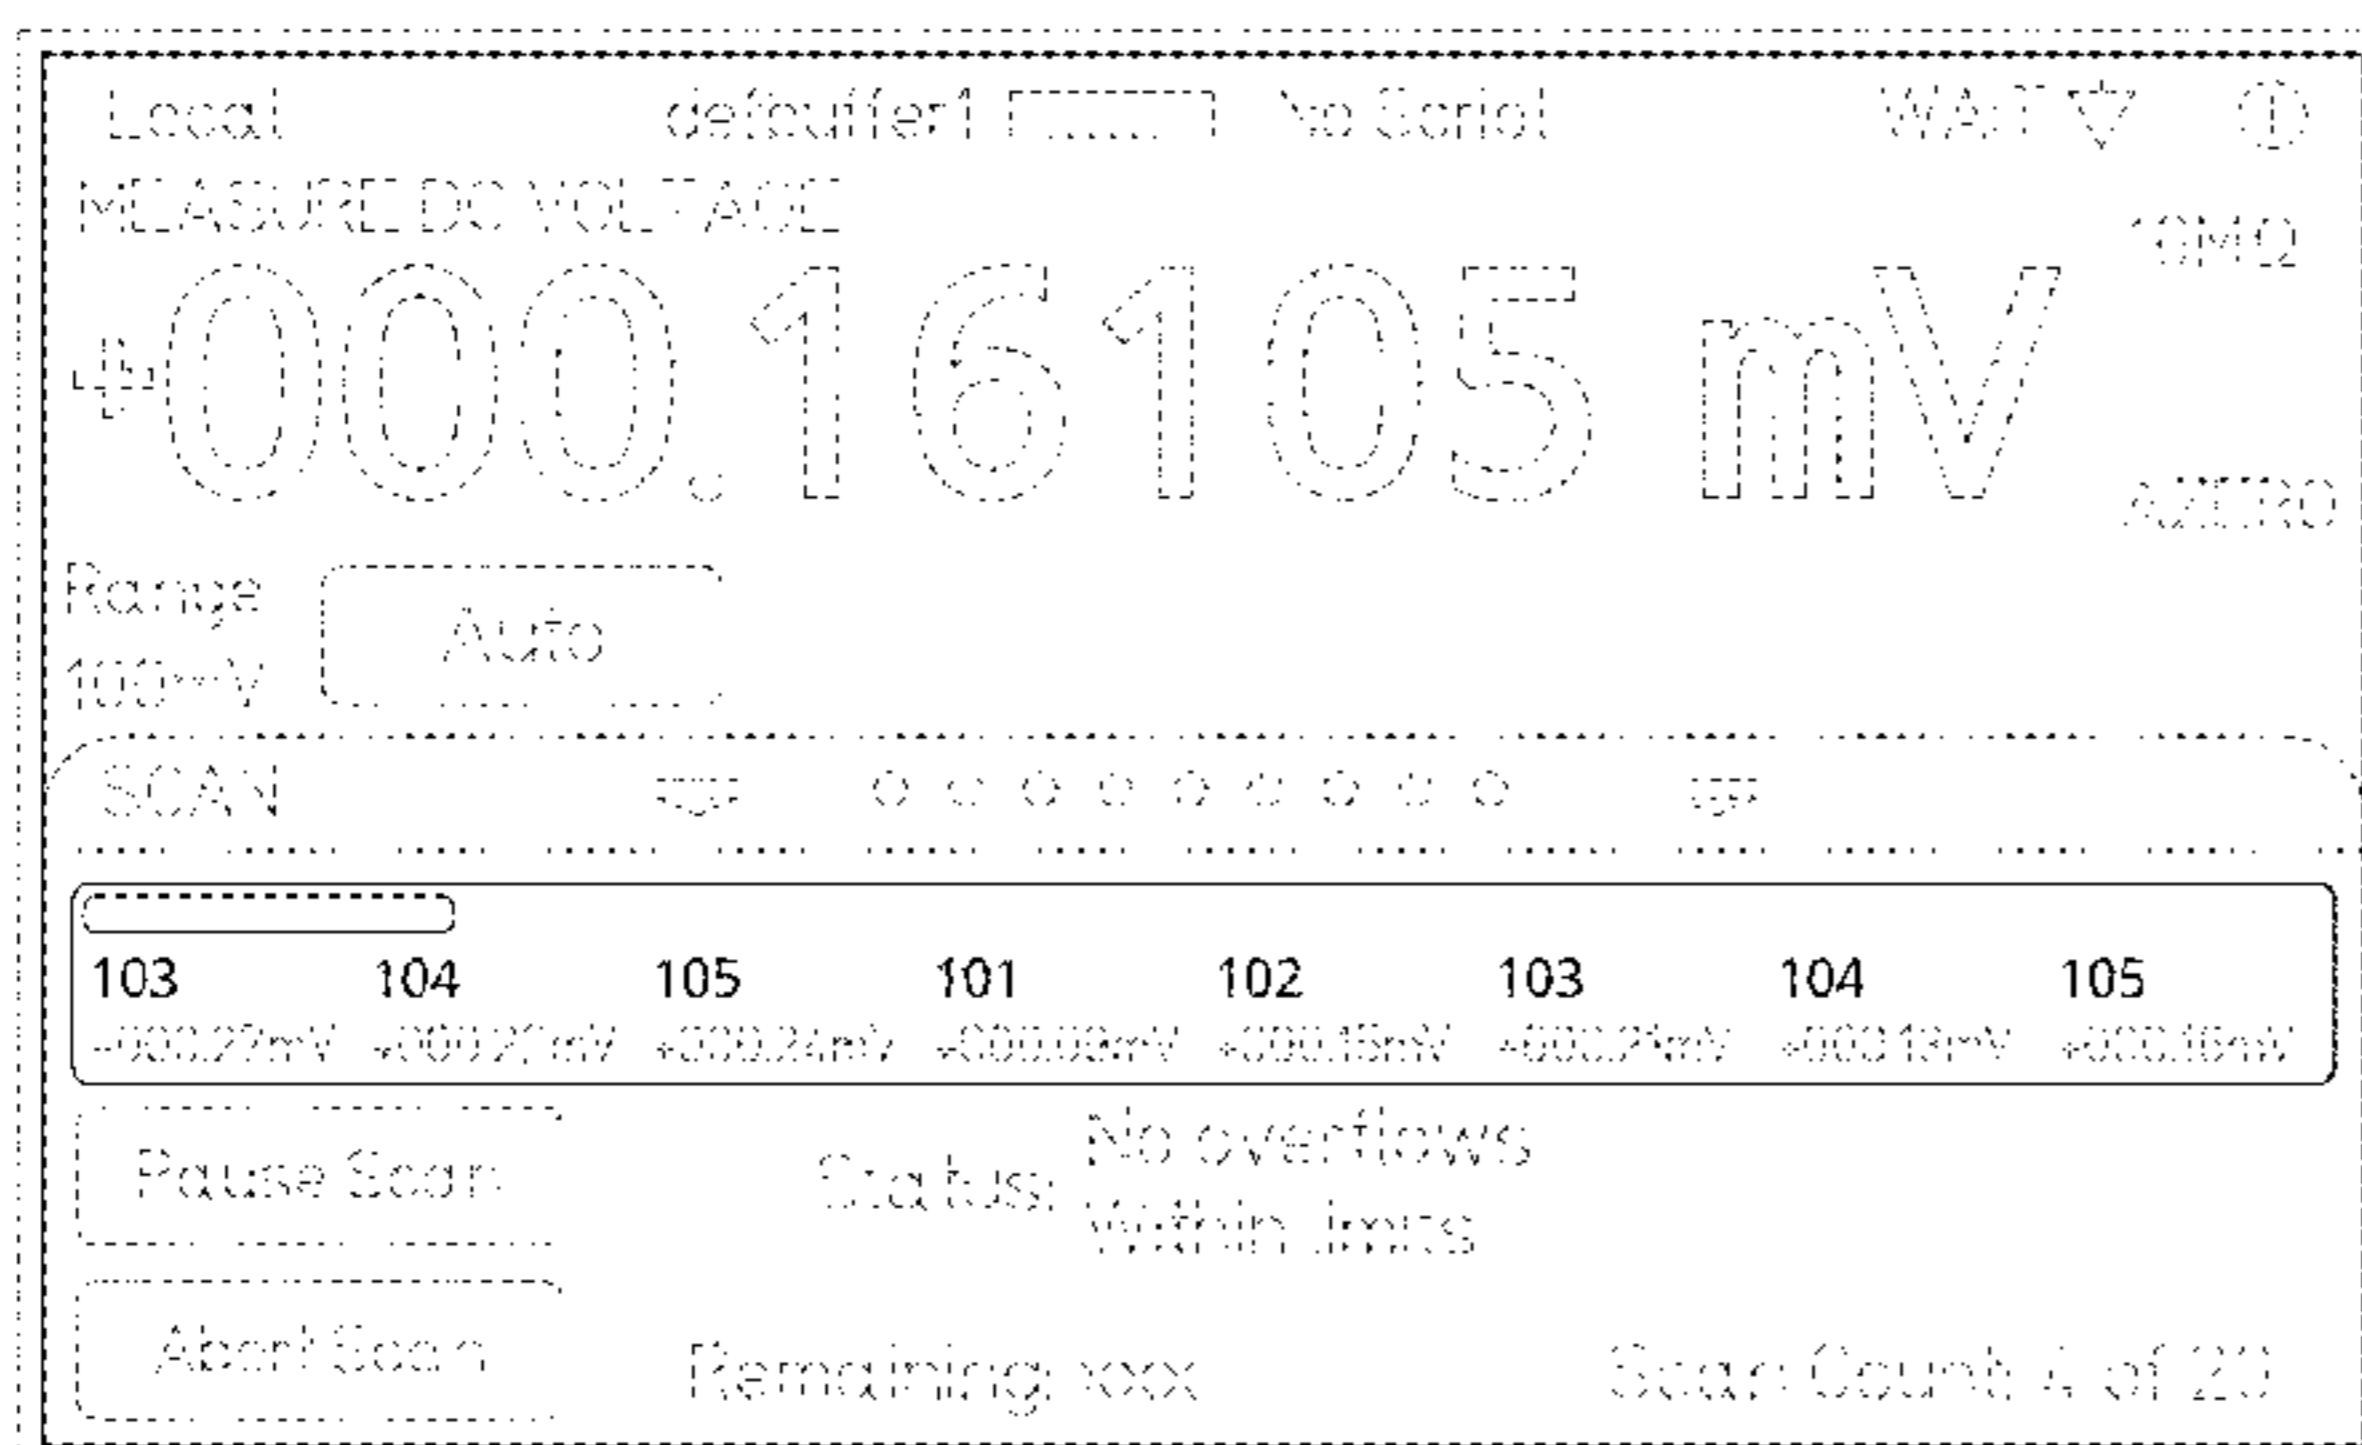

FIG. 4 is a front view thereof showing a second embodiment of our new design in a first state;

FIG. 5 is a front view thereof showing the second embodiment of our new design in a second state; and,

FIG. 6 is a front view thereof showing the second embodiment of our new design in a third state.

The broken line showing of a display screen with graphical user interface is included for the purpose of showing portions of the article which form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-3 and FIGS. 4-6. The process or period in which one image transitions to another image forms no part of the claimed design.
