FIG. 1 is a front, left, top perspective view of a sandwich.
FIG. 2 is a rear, right, bottom perspective view thereof;
FIG. 3 is a front elevational view thereof;
FIG. 4 is a rear elevational view thereof;
FIG. 5 is a right side elevational view thereof;
FIG. 6 is a left side elevational view thereof; and,
FIG. 7 is a top plan view thereof; a bottom plan view would
be a mirror image thereof.

Applicant reserves the right to file a continuation case in
which the fluted portions are stippled. This provides support
for such a case. The stippling would represent the texture of
sliced bread that has been crimped (i.e., the texture of the
flat, sliced portion of a slice of bread that has been pressed).
Applicant reserves the right to file a continuation case in
which the upper and lower domes are both stippled. This
provides support for such a case. The stippling would
represent the texture of sliced bread or other baked good.
Applicant reserves the right to file a continuation case in
which only the lower dome is shown in broken lines. This
provides support for such a case. The broken lines would
form no part of the claimed design.

Applicant reserves the right to file a case in which the entire
bottom of the sandwich is shown in broken lines, e.g., by
adding a bottom view all in broken lines and by putting
corresponding portions of FIG. 2 in broken lines. This
provides support for such a case. The broken lines would
form no part of the claimed design.
