(57) **CLAIM**

The ornamental design for a nursing and feeding cover, as shown and described above.

**DESCRIPTION**

FIG. 1 is a top plan view of an exemplary nursing and feeding cover of the present invention comprising a neck piece and a detachable blanket portion removably connected thereto;

FIG. 2 is a top plan view of the exemplary nursing and feeding cover of FIG. 1 showing an example of how the blanket portion may be selectively detached from the neck piece of the nursing and feeding cover;

FIG. 3 is a top plan view of the neck piece portion of the exemplary nursing and feeding cover shown in FIG. 1 showing the closing portion of the neck piece turned upward to illustrate how snaps may be configured thereon;

FIG. 4 is a top plan view of a second exemplary neck piece portion of a nursing and feeding cover showing the closing portion of the neck piece turned upward;

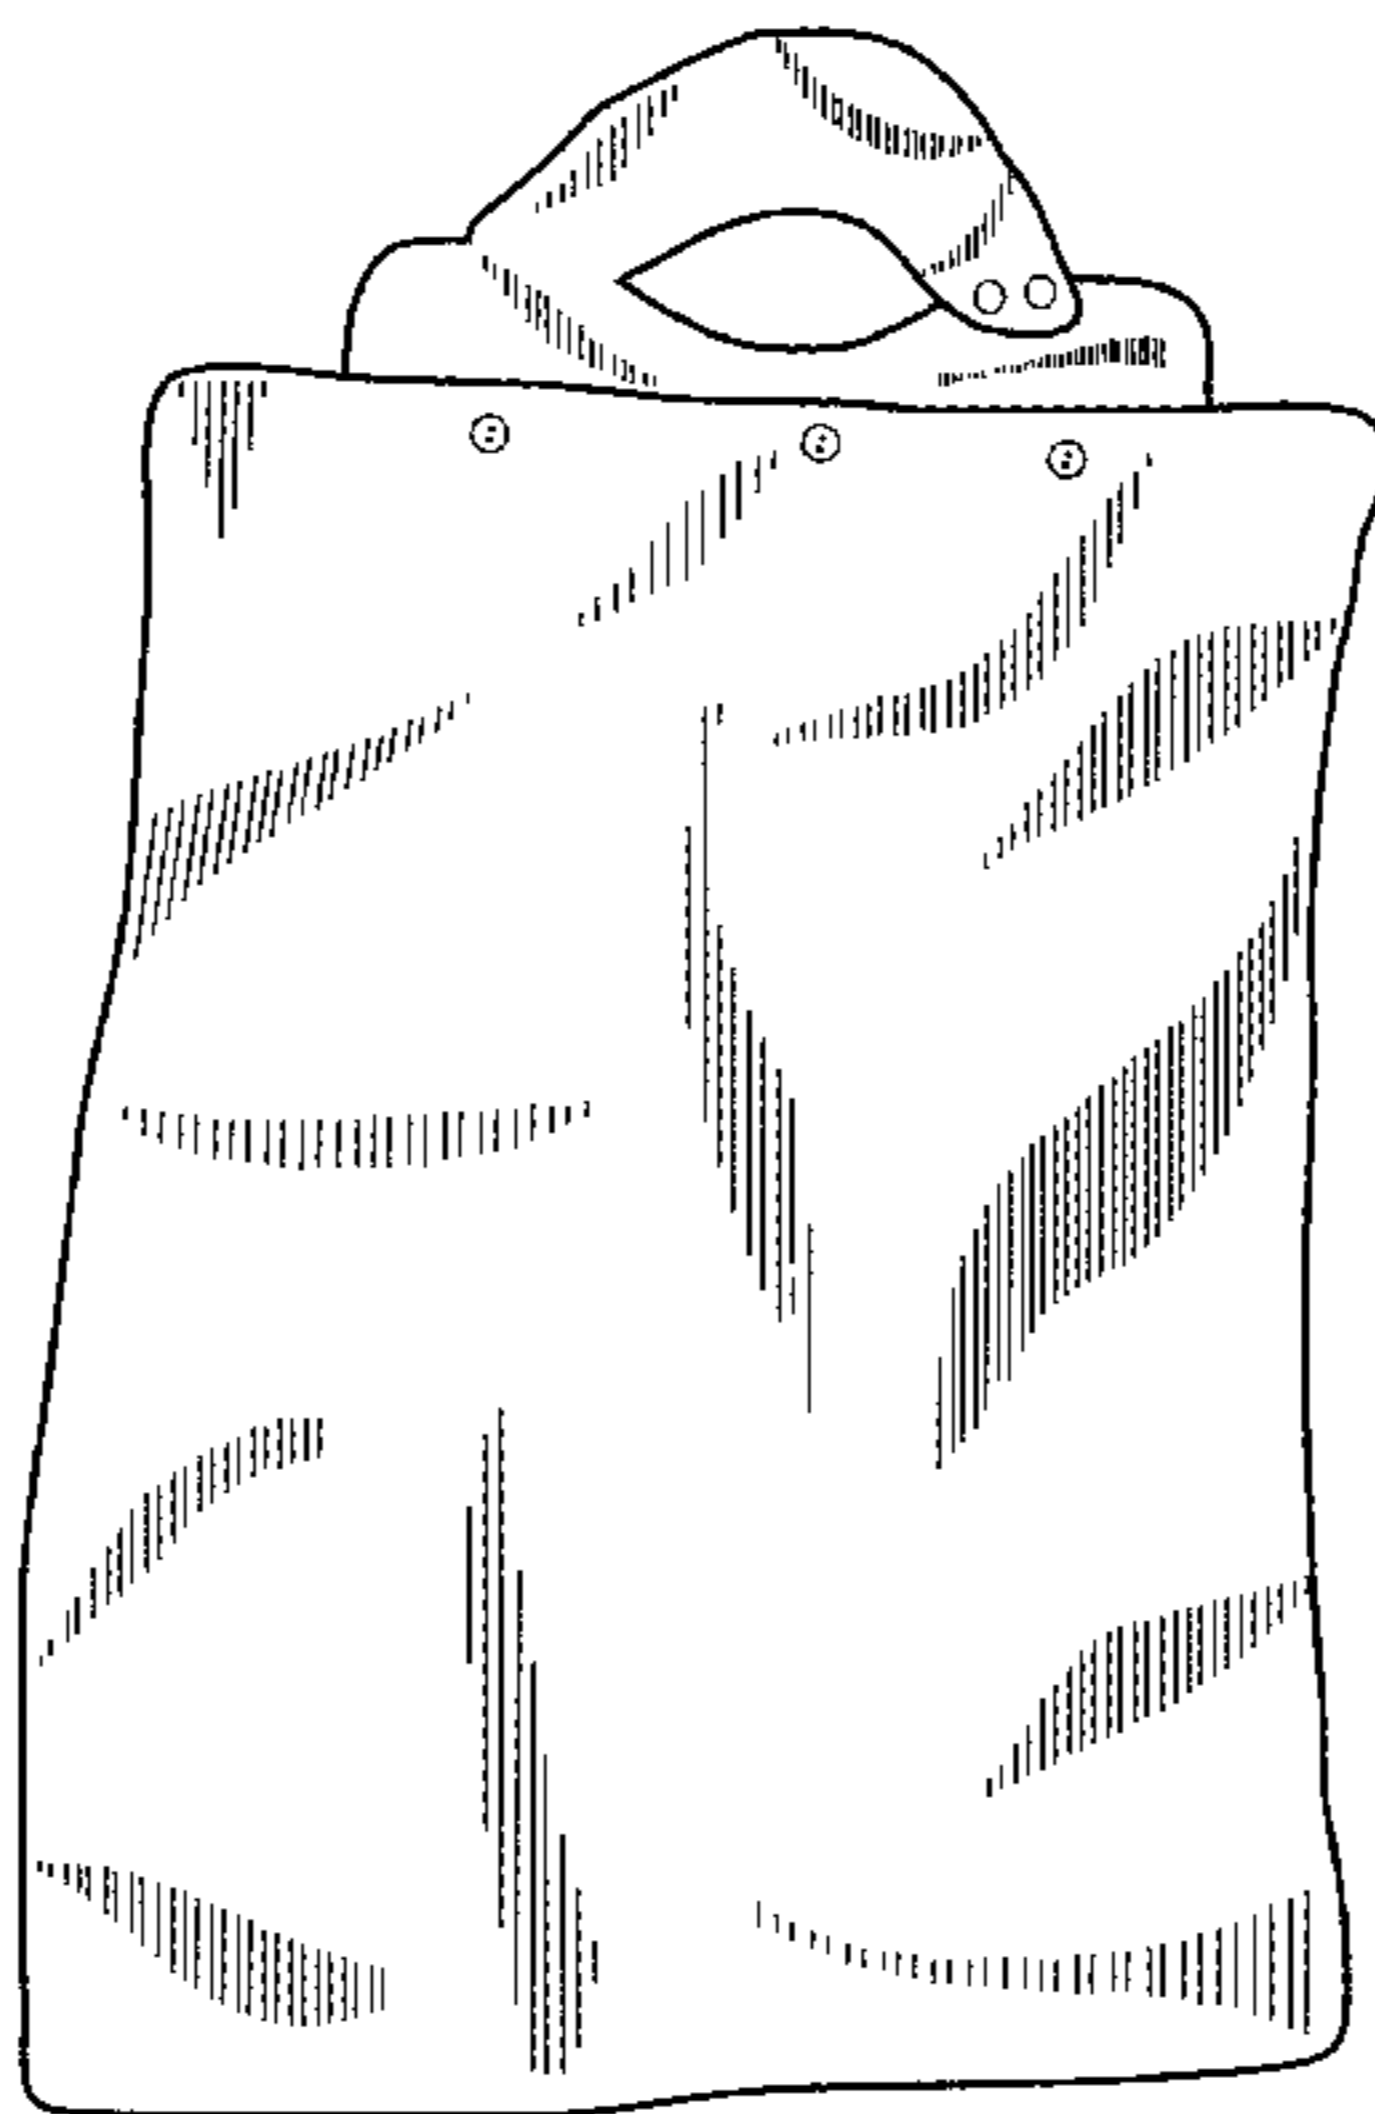

FIG. 5 is a top plan view of the neck piece embodiment shown in FIG. 4 showing the closing portion of the neck piece in a closed position; ps FIG. 6 is a top plan view of a third exemplary neck piece portion of a nursing and feeding cover wherein the FIG. 6 embodiment illustrates a zipper being utilized as a closing means;

FIG. 7 is a top plan view of a fourth exemplary neckpiece portion of a nursing and feeding cover wherein the FIG. 7 embodiment illustrates Velcro being utilized as a closing means;

FIG. 8 is a top plan view a fifth exemplary neckpiece portion of a nursing and feeding cover wherein the FIG. 8 embodiment illustrates a tie being utilized as a closing means; and, FIG. 9 is a front perspective view of the exemplary nursing and feeding cover shown in FIG. 1 shown being worn by a user.

The broken lines illustrating portions of the cover, the user and infant shown in the figures are for illustration only and form no part of the claimed design.
